Ex-President Taft Denounces "Sneakers" Philadelphia, Jan. 12.—After the war is divided and Congress will look for a scapegoat. That scapegoat will be the German Kaiser and his military system.

This statement was made last night by former President William H. Taft, who lectured before the Pennsylvania State Normal school at West Chester. Mr. Taft alluded to the industrial and American enlightenment, who holds "sneaking sympathies" with Germanism.

"These persons," said he, "are dangerous persons to have in any community. They may not know, perhaps, just what constitutes treason. But at the very best their patriotism is not of the order to inspire us to the great work of the hour—the winning of this war."

"Suppose," he said, "in discussing Senator LaFollette, that Haiti had been one of our vessels with the loss of fifty American lives. The President would demand immediate reparation and assurance against the repetition of such acts, and Congress, including its pacific element and pacifists generally, including Senator LaFollette, would heartily applaud his stand."

POWER COMPANY APPEALS FOR COAL [Continued from First Page.]

Washington, Jan. 12.—Purchase by housewives and holding by wholesalers, manufacturers and retailers of more than thirty days' supply of food, will be construed as a violation of the law and will be followed by speedy prosecution, the food administration announced last night. The American Army must be fed; the American people must be fed.

"There need be no fear," says the food administrator, "that our own supplies will not be protected, and if, as a result of misapprehension, any one should attempt to purchase foodstuffs for hoarding, it will be robbing the allies of just the amount and is a violation of the food law and will be followed up sharply."

"We have ruled that the holding of more than thirty days' supplies by dealers, manufacturers, wholesalers and retailers constitutes hoarding, and the purchase of more than usual amounts of such commodities will likewise be so construed."

"Legislation is being considered by Mr. Lever and Senator Pomeroy for presentation to Congress of a further extension of the President's powers to enforce conservation in manufacturing trades and in public places. Although the majority have co-operated willingly and effectively, there is a minority which patriotic appeals do not seem to reach. With such regulations, there will be no shortages, and there will be equal justice to all."

"The food administration announces also: "It is true that the allies need from 75,000,000 to 90,000,000 bushels more of American wheat. It is true also that we have already exported the theoretical surplus of last harvest over our normal consumption. The American people have saved a considerable amount, estimated from 25,000,000 to 50,000,000 bushels, during the last five months, and we are exporting this saving."

"We cannot and will not export more than our savings, for our own people must also be fed. The allies have reduced the ration to their people sharply the last few days, and if this lowered ration is to be sustained we must save more than hitherto."

"Every grain of wheat and every ounce of flour and bread saved now is exactly the amount supplied to some man, woman and child among the allies. We are asking the American people to further reduce their consumption of wheat products and use other foodstuffs instead, for the allies must also have some wheat as well as ourselves."

The same cash prices will remain on all tags, a small interest charge to be added for credit. A one-fourth deposit will be required, balance of account to be paid in 10 months in 10 payments.

This system is drafted only for the conservative credit buyer who does not wish to pay installment prices. Our prices as before will remain CASH PRICES.
