CUMBERLAND VALLEY

Sow Kills Wildcat in Protection of Her Young

Waynesboro, Pa., Jan. 29.—With their normal food supply buried under more than two feet of snow and ice, wild animals are getting desperate in their search for food in the mountains, especially in the vicinity of Horse Valley. During the latter part of the past week, in broad daylight, a large wildcat entered the shed on the farm of Charles Mackey in the valley, where a sow and eight pigs were sheltered. The cat caught one of the pigs with the intention of taking it away and making a meal on it. The mother hog made for the cat and a terrific fight ensued. The wildcat fought furiously, scratching and lacerating the hog in a frightful manner. In the light the hog finally caught the cat by the neck and with her teeth crushed the bones, killing its antagonist almost instantly.

SERG. EMPY ASKS FOR TOBACCO FUND

Sergeant Empey spent the night in Harrisburg after being snowbound here while on his way from New York to Altoona. Because of the nature of the address, the patriotic one he gave here several weeks ago, he was permitted to attend his lecture at Altoona this evening. Incidentally, while here the sergeant's first thought was to do something for the tobacco fund being raised by the Harrisburg Telegraph. It was the sergeant who bid in his own book in the Chestnut Street Auditorium for the benefit of the tobacco fund when bidding of Harrisburgers grew lax. This book was afterward purchased by a syndicate of Harrisburgers who contributed about \$400 which was sent to Sergeant Empey for the fund.

MAINTAINING OWN ARMY

But despite the conditions of France's railroads, he said, it was found necessary to provide transportation facilities for the American Army in France because of the great demands upon those already there. "In other words," he said, "France was a white sheet of paper. As far as we were concerned we not only had to write an army on that sheet, but we also had to provide maintenance. We have been building facilities and agencies in France, just as much as in this country, of the same character. We have built docks, terminals, sent over dock machinery, cranes, even piles, warehouses at ports of disembarkation and the shortage of vast supplies needed being distributed. We are taking snow and ice from fire escapes and using a railroad 500 miles long from our ports of embarkation to our base of operations."

GERMANY MYSTIFIED

"No," replied Secretary Baker. "The German government is still mystified regarding the number of men now in France. They know what is doing at the front, but Germany is still mystified regarding the number of men now in France." His statement, Mr. Baker added, was made on the basis of the reliable confidential reports received by the War Department.

GOING IN UNBROKEN STREAM

"Of course, they welcomed the British, but then their need was so great, nor was the need in England so close," he said. "So an instant response came from France, and our soldiers have continued to go over in an unbroken stream. At this hour we have a fighting army in France, seasoned and trained to warfare. Joffre said it might take some time for us to get a trained army over there, but that we were a great industrial country and could meet the demand."
