

MILLIONS TO BE SPENT BY U. S. FOR RAILROADS

Bigger Expenditures Than Ever Are Planned by Government During Year

Washington, June 12.—In announcing today classified items of the \$946,293,000 railway capital expenditure budgets for this year, the railroad administration disclosed that it will pursue a liberal policy in the construction of new switch tracks, industrial sidings, shop buildings and freight stations at terminals but will cut expenditures for new passenger depots, office buildings and other enterprises not contributing immediately to war demands.

Railroads will spend \$98,661,000 for additional yard tracks, sidings and industrial tracks; \$16,979,000 for shop buildings, enginehouses and appliances; \$47,471,000 for additional main tracks; \$2,055,000 for bridges, trestles and culverts, and \$31,556,000 for rails and other track materials.

The total to be spent for improvements is \$445,639,000 and for equipment, \$482,417,000. This is approximately three times as much as railroads have spent for these purposes annually heretofore.
