Second Notice Harrisburg's Most Remarkable Clothing Sale. TO THOSE WHO WERE NOT SERVED LAST SATURDAY — We wish to state that owing to the unprecedented crowds during the sale our force was not adequate to attend to all who came. This we regret, but we are sure you will understand conditions such as would prevail under the circumstances. We especially invite those who were not able to select their suits last Saturday to come in again, as the sale will last a few days longer with the same values.

FARMERS ATTENTION! See the Demonstration of the Wonderful Moline Tractor Harvesting Wheat and Cultivating Corn at Bonnymead Farms Tuesday July 9th, 1 O'clock Ask Us If You Do Not Know Location of Farms

ONE MAN CAN FARM MORE LAND with the

MOLINE UNIVERSAL TRACTOR

It Solves The Farm Help Problem

With the Moline-Universal—the original two-wheel tractor—One Man can farm more land than was ever before possible, because— One Man has power at his command equal to six horses, capable of doing the work of nine horses, due to its greater speed and endurance. One Man operates the Moline-Universal from the seat of the implement to which it is attached, where he must sit in order to do good work. One Man can start in the spring and go from one operation to another—plowing, harrowing, planting, cultivating, sowing, harvesting grain or corn, spreading manure, fire, the silo, cutting wood, etc., doing all farm work from one year's end to another, independently of horses or hired help. All these one-man operations are possible with the Moline-Universal because it is mounted on two wheels. It attaches direct to the implement, making one compact unit—the tractor front wheels and the implement rear wheels. One man controls the entire outfit from the seat of the implement. There has been good reason in the past for putting a seat on implements, for it is from this point that the work must be observed and that adjustments must be made.

Being close coupled to the implement, the Moline-Universal Tractor backs as readily as it goes forward, and turns in a 16-foot circle. It steers so easily that a boy or woman can handle it as well as a man. With the Moline-Universal one man can take care of all the requirements on the average size farm. Plowing with two-bottoms, the Moline-Universal Tractor does as much work in one day as the ordinary three-plow tractor, due to the higher speed at which it operates, 3 1/2 miles an hour. It has the power to run at this high speed because all of its weight is traction weight—all of it is converted to pull. The light weight of the Moline-Universal Tractor, 3380 pounds, and its high clearance—greater than that of the average cultivator—make it perfectly adapted for cultivating. It isn't the kind of tractor that does your plowing and seed bed preparation and then rests while your horses do the planting, cultivating and harvesting. Mechanically, the Moline-Universal is the most modern tractor built, containing more refinements and improvements than any other tractor on the market.
