Baker Praises Army For Capture of Sedan

Washington, Nov. 8.—The taking of Sedan by American troops is a "great military achievement," Secretary Baker said yesterday when informed that detachments of Lieutenant General Laggett's first army had entered the historic French city. "The news of the taking of Sedan is very good news," said Mr. Baker. "It is a great military achievement. At our last report the Americans were at a distance, I believe, of five or six miles from Sedan, in the most difficult country along the western front, except the flooded territory in Flanders. The advance of Pershing's army from the 28th day of September to the first of November, slow, difficult, in the face of tremendous opposition and against the strongest kind of positions, and its very much more rapid advance, including the taking of Sedan, is a fine military achievement in a limited area as has taken place in the war at any time."

MORE NURSES ARE NEEDED FOR U. S. ARMY HOSPITALS

An erroneous impression has gone out that no more nurses are needed in military hospitals. It must be corrected or Uncle Sam's military forces will suffer. The Pennsylvania Council of National Defense has been authorized to state that more than 10,000 additional nurses will be needed for the Army Nurse Corps within the next two months. Not only that, but 25,000 will be needed by June 1, 1919, regardless of the military situation abroad. Nurses are needed for our tremendous armies to take care of the sickness and casualties that are inevitable from military service on a large scale, whether there is active fighting or not. The various agencies which are encouraging the recruiting of women for nursing are urged by the government not to relax their efforts.
