

**Dates Successfully Raised in Arizona**  
 Tucson, Ariz.—Dates are being successfully grown in Arizona at orchards in the Salt River Valley

and at Yuma. The Tempe orchard of the Agricultural Experiment Station of the University of Arizona contains 508 trees and includes 125 varieties. The fruit is artificially ripened by a method devised by Dr. A. E. Vinson, agricultural chemist of the station. The crop is marketed

in the eastern states. Dr. Vinson said he believed that if there were enough orchards so that dates could be put on the market at two pounds for a quarter, they would become a staple article of food within the reach of every one. A date tree will bear for a century, he said, and

grows especially well on alkaline soil and brackish water may be used for irrigating it without injury to the tree. The trees are propagated from offshoots of the parent tree and usually bear in the fifth or sixth year, according to Dr. Vinson.

**Belgian Soldiers Eager to Chase Hun Back Home**  
 Ghent, Belgium, Nov. 22.—Entering a little village near Ghent the

correspondent passed an American regiment at rest. It belonged to an Ohio division that has had its share of knocks, having done its part in the fighting at St. Mihiel and in the Argonne forest. The men were relieved five days ago, but were go-

ing up again. "Things are coming our way," said a doughboy. "We are going in to end this thing. Do you think we will be home by Christmas?"

Among all the soldiers the Belgian seems the most anxious to enter Germany. More than half his country has been occupied and the lib-

erated portions are strewn with the wreckage of former happy homes. "We have got the Boche going," said a Belgian officer to-day. "Let's keep chasing him. A little trip into Germany will do us good." Use McNeil's Pain Exterminator—Ad

Our Store Will Be Open Saturday Evening Until 9 O'clock
