### ECZEMA CAUSED YEARS OF INTENSE AGONY

"I have suffered intense agony from eczema on my leg and other parts of my body for years, and received only temporary relief from other preparations. It is only a month since I started to use PETERSON'S OINTMENT, and there is no sign of eczema or itching. You can refer to me."—Geo. C. Talbot, 27 Penfield Street, Buffalo, N. Y.

I've got a hundred testimonials, says Peterson of Buffalo, just as sincere and honest as this one. Years ago, when I first started to put out PETERSON'S OINTMENT, I made up my mind to give a big box for 25 cents, and I am still doing it, as every druggist in the country knows. I guarantee PETERSON'S OINTMENT because I know that its mighty healing power is marvelous. I say to every one who buys a box that it is rigidly guaranteed for eczema, salt rheum, old sores, blind, bleeding and itching piles, ulcers, skin diseases, chafing, burns, scalds and sunburn, and if not satisfactory any druggist will return your money."

### OVER 3,000,000 SOLDIERS ATTEND FREE 'Y' MOVIES IN BRITAIN MONTHLY

Report Reveals Audiences Total More than 100,000 Men Every Day

London, Feb. 27.—More than 3,000,000 soldiers, English-speaking fighters all enjoyed without cost American motion pictures last month in Y. M. C. A. huts throughout the British Isles, a report just compiled revealed. The combined audiences totaled more than 100,000 men a day. Americans, British and fighters of the British dominions and colonies. The Australians, Canadians, New Zealanders and even the British Tommies have cultivated a keen taste for the cowboy drama of the mythical Wild West, the crook and society dramas of the American metropolis and the comedies in which the American style pie figures prominently.

Charles B. Cole, of Boston, Mass., is chief supervisor for the Community Motion Picture Bureau, the movie branch of the Y. M. C. A. and has built up what is probably the biggest motion picture distributing agency in the United Kingdom. Just at present the work of this bureau is in a transitional period which started with the signing of the armistice and the almost immediately subsequent evacuation of American military and naval camps and bases in the United Kingdom. As the American establishments are "washed out," however, the returning Tommies take them over with the American Y. huts and buildings going over to the British Y and the American patronage of the motion picture bureau becoming British.

### Murdock Calls the Delinquent Boards

"Lack of interest being shown by many board members in the final work of the boards is very pronounced and is delaying the closing up of the work in the State," says Major W. G. Murdock, chief draft officer, in a statement issued from the State Draft headquarters. The members are reminded that they are still responsible for properly administering the duties of their office and also that they are not to do clerical work and render vouchers for pay as members of boards.

These criticisms have been evoked by the failure of some of the boards to have their records completed and prepared for shipment and due to the fact that efforts to communicate with some of them have not been successful, leading to the present situation, says the major, that they are not at the offices. Other boards are praised for the manner in which they have prepared for the winding up of the work of the draft boards in Pennsylvania. Regulations regarding disposal of government owned property will be issued within a few days.

"Board members have not yet been released from service," says Major Murdock in conclusion, "although at present they have no functions to perform," except to follow out instruction as to preparation of records, completion of histories and working up of desertion records.

### Find Over Supply of Clerical Work

Washington, Feb. 27.—According to Captain Felton, who is handling the discharged soldiers in the employment service is having little difficulty placing in employment men with trades, but difficulty is being experienced in placing those who merely have clerical ability and training. That statement was made in a weekly report on the Washington branch of the United States employment agency engaged in finding work for the men being discharged from army and navy.

### Famo Must Grow Hair or Money Is Returned

FAMO is sold by the druggists named in this advertisement, on a positive money-back basis. Unless you are absolutely satisfied with FAMO, you may return the bottle to the druggist and he will refund your money.

But we know you will not have to take advantage of this offer. The results achieved by FAMO are so wonderful that every purchaser is more than satisfied. FAMO destroys the dandruff bacilli. It stops all scalp itching.

It checks the deadly seborrhean excretion which causes dandruff and makes the hair and scalp healthy. There has never been anything like the way FAMO nourishes the hair. Even when baldness has appeared, FAMO will encourage and stimulate the growth of new hair—unless the roots are absolutely dead.

New, luxuriant hair appears when FAMO is used regularly. When FAMO is used, the seborrhea microbe dies. The dandruff disappears. Nature has its way. The hair flourishes as it never did before. FAMO contains no alcohol. The persistent use of alcohol on the head causes grayness and falling hair.

When you use FAMO you can see the difference almost from the first application. The natural color is intensified—the hair has a new luster and sheen. The hair grows like the hair of a healthy child. The scalp is as clean as a baby's—the hair luxuriant and soft.

FAMO is the result of three years of careful experimentation in the laboratories of one of the oldest pharmaceutical houses in Detroit. Before it was offered to the public, it had been tried and tested and had proven the wonderful results it accomplishes. FAMO is the answer of scientists to the ravages of the seborrhean bacilli which cause unhealthy hair.

Even if dandruff has not made its appearance, you should use FAMO to keep the scalp and hair healthy and make the hair fluffy and beautiful. FAMO comes in two sizes—35 cents and an extra large bottle at \$1.00. It is sold at all toilet goods counters. Seborrhea is a morbidly increased flow from the sebaceous glands of the scalp. The seborrhean excretion forms in scales or flakes and is commonly known as dandruff. Mfg. by The Famo Co., Detroit, Mich. Croll Keller and C. M. Forney, Special FAMO Agents.

### "Well then," asked the Ad man

"Do you think it pays to have such an elaborate system of testing your milk and cream?"

"I should say it does," shot back Mr. Hershey. "We know exactly where we stand when it comes to the quality of our milk and cream and furthermore we know that we have only pure cream—chemically pure—before we start to make our ice cream."

"Yes, it pays; it has proven to me beyond a doubt that it pays because we are selling more HERSHEY'S SUPERIOR ICE CREAM every day."

The Ad man mused a bit over the delicate chemical apparatus and remarked, "I would like to stay here a whole day, and watch you testing."

"Well now that you have seen the laboratory," said Mr. Hershey, "we will go a little further through the plant."

As the two men left the room they stopped for a moment at a big vat. "There's a fresh churn of rich golden butter," said Mr. Hershey, as he pointed to several hundred pounds.

Said he, "Last Thursday we shipped a truckload of nine thousand pounds of that butter to Philadelphia. So you see we can supply people anywhere."

Just think of it! 9,000 pounds of butter!—and the very best butter it is possible to make—chemically pure—and shipped all in one load to Philadelphia.

That's a pretty big piece of business in itself.

No doubt there are thousands of Harrisburg people who do not know that the Hershey Creamery Company makes butter.

There is a lot of butter shipped into Harrisburg from outside concerns, and probably is sold at the highest market price while the very best butter that you could put on your table is made right here in your own city.

It's a wonder Mr. Hershey hadn't advertised long ago that he makes so much butter—and such good butter, too!

You can see that this little trip which Mr. Hershey and the Ad man started out to make has proven so far to be a most interesting affair and yet they have only started.

Take for instance the laboratory. Who would have thought that an ice cream factory in Harrisburg was so large and doing such a large business that it would install a chemical laboratory which costs so many thousands of dollars and having in charge of it a high priced expert chemist?

But facts are facts, and it's a good thing for the people of Harrisburg that they have such an up-to-date ice cream concern.

No doubt most of the ice cream manufacturers call in chemists from time to time or send their products to chemists to be tested.

February 27, 1919. Harrisburg, Pa. Look for to-morrow's continuation of this—Signed The Ad-man.

### ONLY HALF A MAN! NEGLECTED BLOOD AND NERVES

Most men neglect the blood and nerves until too late. At once he becomes a prey to disease, because of this impoverishment. It doesn't take very much weakening of a man's blood, nerve and vital forces to cut his strength in half and leave him "only half a man." The dangerous feature of this impoverished condition is that much of the damage is done before the victim is aware of it.

When a man—or woman—begins to look or feel older than they really are, when they begin to tire easily, or early in the day, it is almost certain that impoverished blood, frazzled nerves or faulty digestion is the cause of the trouble.

**DR. CHASE'S BLOOD AND NERVE TABLETS** have restored health and strength in thousands of cases of general weakness and impoverished blood. They contain the vital element of Iron, Nux Vomica, Gentian and other remedies that build up body and nerves alike. It is interesting to note the steady gain resulting from taking **DR. CHASE'S BLOOD AND NERVE TABLETS**. It is urged that patients weigh themselves before taking them and watch the increase in weight from month to month. Price, sixty cents; Special Strength (stronger and more active), ninety cents.
