### LACK OF FUNDS HOLDS UP R. R. IMPROVEMENTS

Congressional Inaction Suspends Program For New Work This Year

By Associated Press

Washington, March 20.—The War Finance Corporation is considering floating a large bond issue, probably of \$200,000,000 within a few weeks, to meet any other demands on the corporations. The interest rate contemplated is 4 1/2 per cent. The bonds would run for a year or possibly a year and a half, according to tentative plans. They would be sold privately to banks and big business interest in order to minimize interference with the popular Victory Liberty loan campaign.

Washington, March 20.—Instructions issued by the railroad administration will result in the temporary suspension or postponement of millions of dollars of railroad improvement work, because of the financial predicament caused by failure of Congress to pass appropriations for the administration's revolving fund. The suspension of work applies to many new stations, tracks, road bed improvements, elevated tracks and construction of bridges and buildings.

Railroad administration officials said comparatively few men would be thrown out of work as a result of the orders, but admitted that the railroad improvement program, planned for this year partly as a means of employing large numbers of laborers during the readjustment period, probably would not be carried out.

The orders sent to regional directors to be forwarded by them to federal managers, specified that if corporate officers of railroad companies withdraw or withhold approval of any improvement project for financial reasons or otherwise, the proposals are to be sent to the railroad administration for further review.

In cases where approval is not given, procedure was to be as follows: "Work not started shall not be commenced without further approval of the division of capital expenditures. As to projects already started and actually under way, please see that no further work is done except when necessary to insure safety; where the project is so far completed that to stop work would be more expensive than to continue it; and where a job is covered by bona fide contract and stopping the work would seriously demoralize conditions, especially as to working forces."
