during the training period the actual flying hours at Carruthers field totaled 35,000, at Barron field 26,698, and at Tallaferro field, 32,488.

The tail spin and nose dive were responsible for a large majority of the accidents, according to officers. In the entire training period not a single American cadet was killed on the first solo flight. This is attributed to the thorough instruction in ground work.

While the tail spin and nose dive were chief factors in the fatality list, there were many other contributing causes.

Captain Vernon Castle, the American dance instructor, who had faced death numerous times over the German lines as a British aviator, swerved his machine sharply to avoid hitting another aviator here. He lacked height for the maneuver, crashed and was killed.

SAYS SALVADOR NEEDS MONEY

New Minister at Washington Has Reached United States

San Francisco, Cal., May 2.—The first and greatest need of the republic of Salvador is money, said Salvador Sol, new Minister of Plenipotentiary at Washington for that country who has just arrived from South America. The money is needed at once, according to Minister Sol.

"Twenty-five millions of dollars are needed to properly take care of our coffee crop and the government of the republic will not only welcome foreign capital but will make every fair inducement to attract it," he said. "We are particularly anxious to increase our commercial relations with the United States."

The reason that Salvador did not actively enter into the war against Germany, was the fact that there was an old clique of politicians favorable to that country. Since the war that element has been completely eliminated. The administration of the country is elected now is entirely in the hands of pro-American officials.

Our president, Jorge Melendez, was educated in the United States and is one of a number of others in official positions who have had the same advantages.

"We are particularly anxious for some large banks who can do business in a big way to open up in Salvador. There are two banks of a capital of a half million dollars who have started business but what we really need is an institution which will be a capital of at least ten millions of dollars."

"Any man who has capital, say about \$10,000, will find excellent opportunities for investment which, with work and care, will bring him returns well worth while. I should strongly advise against any young man who has only his hands and his brain to depend on from going down there."

"Our coffee before the war, was consumed in France, Italy, Germany and England. Now Germany is eliminated and the United States is getting one-half of our crop. "It will be my particular endeavor to foster the commercial relations between the two countries and to interest capital."

"We rely for our protection on the United States confident of its fairness; so much so that we sent our delegate to the Paris Peace convention instructed to concur with the vote of the United States on all questions which came up. We do not fear anything as we are united in the Monroe Doctrine will stand and that this country will safeguard the nations of this continent."
