

EXPECT LIVING TO STAY HIGH Philadelphia Board of Trade Compiles Scores of Statistics

Philadelphia, July 25.—The cost of living is likely to stay high for a long time to come in the opinion of the Philadelphia Board of Trade. This view is a result of a compilation of statistics from many lines of trade and industry.

According to these figures the advance in prices in this country since 1914 has been about 107 per cent. in Canada 115 per cent. Great Britain 132 per cent. and France 235 per cent. It is pointed out that, in spite of material reductions in the price of steel, the advance in other commodities since the armistice has been so great that the average price schedules have been reduced but 5.7 per cent. below prices prevailing October 1, 1918.

The following are given as reasons why wages will not be much less for a considerable period of time. Practical stoppage of immigration since 1914, depriving this country of several millions of workers who would normally have come to us and thus have relieved the labor shortage which confronts American industry upon the resumption of capacity operations.

Retention in the Government military service of nearly 2,000,000 workers, which, it is deemed, will undoubtedly continue an indefinite period.

Creation of new industries such as shipbuilding manufacture of chemicals and dyes. Urgent demand for building and construction of every class due to their having been forcibly held back for several years. Shortage of world food supplies and uniformly high prices. Proportionately higher levels of commodity prices existing throughout Europe.

Says Country Must Save Its Forests

Washington.—Plans for the perpetuation of the forests in New England and the East, and for the restoration of the denuded forest land should be thoroughly discussed by the Association of Eastern Foresters which meets at Kittery, Maine, on July 17," declares Charles Lathrop Pack, president of the American Forestry Association in issuing a call to the Eastern Foresters to express their view of the need of a national forest policy.

"The people of this country must be told how our forests are disappearing," said Mr. Pack, and must be aroused to the need of a policy which will result in our watersheds being protected for all time and for our forests to be managed so that they may provide for all our future lumber and forest product requirements.

"New England is no longer a factor in our lumber supplies, and its pulp-wood supplies are being rapidly exhausted. The paper mills of the country already import 3 per cent. of their raw material in the form of wood or pulp. Our hardwoods in the North and East are being rapidly used up and many wood using industries are already embarrassed for supplies.

"The Eastern Foresters are experts who should be able to offer a practical solution to the problem of how to conserve what forests we have remaining, how to restore what forests have been destroyed, how to protect our forests from fire and how to provide for perpetuation of our forests so that the lumber requirements of the nation may be assured for the future.

"We have the example of France which was able to successfully resist the onslaughts of the Hun because she not only had the men and munitions but also had a plentiful supply of lumber for her allies and herself because she adopted a practical forest policy over one hundred years ago.

"The American Forestry Association heartily supports the demand for a national forest policy and calls upon the lumbermen, timberland owners and foresters of the country to suggest plans for a policy which will be practical and which will assure the nation of ample forests for its future needs."

Prohibition Closes Famous Old Inns

Philadelphia, July 25.—Inns in existence since colonial days are among those closed by the wartime prohibition law.

One of the most noted is the General Wayne Inn, on the Montgomery Pike outside of Philadelphia, which was opened in 1704 as the Wayside Inn by Quaker settlers. "Mad" Anthony Wayne used the inn as his headquarters during the Revolutionary War and it has been a polling place for more than 200 years.

Turk's Head Inn at West Chester has closed its doors. In revolutionary times it was visited by General Washington, Lafayette, "Mad" Anthony Wayne, Colonel Taylor and many other officers of Washington's army.

Porto Ricans Are Receiving Re-education

Washington, July 25.—The Federal Board for Vocational Education is leaving no stone unturned in its efforts to find every disabled soldier who may, if he so desires, receive education from the Government. In Porto Rico there are at present 110 soldiers disabled in the service, who should be beneficiaries of the rehabilitation law. The special agent of the Board in the Island is interviewing these men with a view to their future vocations. Porto Rico has no trade schools, but training and placement may be made in shops and industrial establishments for those who desire it, and the Government Agricultural College at Mayaguez provides training for those who wish to go on the Island.

CAUSE AND EFFECT

Pa.—Have you seen with the microscope all the little animals that are in the water? Tommy—Yes, papa, I saw them. Are they in the water we drink? "Certainly, my child."

"Now, I know what makes the singing in the kettle when the water begins to boil."—Pearson's Weekly.

40 PER CENT UNSALABLE

Greencastle, Pa., July 25.—C. P. Onwaka, head of the Greencastle Elevator Company, estimates that 40 per cent of the wheat in the county is unsalable at the present time because of the continued wet weather.

Personal and Social Items of Towns on West Shore
