

STRIKES DELAY STEEL OUTPUT

Actual Stoppage of Pig Iron and Steel Making Possible

New York, Aug. 7.—Actual stoppage of pig iron and steel making by railroad strikes in the Cleveland and Chicago districts in the past week have given more weight to the possibility of curtailment by strikes in the steel industry itself, says the Iron Age to-day. Blast furnaces and steel works operations of the American Steel & Wire Company at Cleveland have been largely suspended. At the South Chicago works of the Illinois Steel Company 7 out of 12 blast furnaces are banked, and at Gary 14 out of 44 open-hearth furnaces are idle. The unionizing of blast furnace and steel plant workers in the Pittsburgh and Ohio districts has shown no marked progress in the week, but the outlook is more brightening because of the railroad shopmen's strike, and a new uncertainty has entered into the prospect for the remainder of the year.

The increase in pig iron in July was pronounced, as was expected, the total for the month being 2,428,541 tons, or 78,340 tons a day, as against 2,114,738 tons in June, or 70,495 tons a day. The blowing in of furnaces kept up through the month so that 239 were in blast on August 1, against 290 one month previous.

Pig iron production at the beginning of August was at the rate of 83,635 tons a day, as compared with 71,760 tons a day at the beginning of July, the present operation being at a yearly rate of about 31,500,000 tons, whereas the 1918 output was 29,100,000 tons.

Export trade picked up toward the

end of July after a quieter fortnight. The placing of 150 locomotives for Poland with the Baldwin Locomotive Works, which accepts 10-year equipment notes, came after long negotiations. Orders for 8,000 to 10,000 cars are expected to follow, but the arrangements of a car trust may be long drawn out. Thus far manufacturers have been more active than bankers on these European deals and the need of strong leadership has been marked.

A fully financed enterprise, the Tata Steel Works in India, is figuring on American steel for large additions which will take nearly 20,000 tons of structural shapes. British works cannot meet the deliveries wanted.

American Oil Men Tried to Bring War With Mexico Charge

New York, Aug. 7.—American oil interests are charged with manufacturing propaganda to force the United States into war with Mexico in a report on the Mexican situation made public yesterday by the Board of Foreign Missions of the Presbyterian Church. The report was prepared by Samuel G. Inman, executive secretary of the American section of the Committee on Co-operation in Latin America, representing the American and Canadian mission boards.

Mr. Inman charges that the American people are being deceived by inspired propaganda and that "intervention in Mexico is coming just as fast as certain interests can possibly force it." The oil men whom Mr. Inman accuses are declared to have large offices in Washington and New York and unlimited supplies of money.

"They are playing," the report says, "not simply for oil wells in Tampico and Vera Cruz, but for much larger stakes. They have found out that Mexico is full of oil. What they want is the United States to get hold of Mexico so that they can easily obtain these billions of dollars of oil properties which are certain to be developed in the future."

PUBLIC BUILDING CAMPAIGN STOPS

War Department Finds Marked Decrease in Unemployment

Washington, Aug. 7.—The War Department has to-day decided to stop the campaign for a public building throughout the United States, it is to-day announced by Colonel Arthur Woods, Assistant to the Secretary of War.

This decision was taken because the decrease of unemployment in many localities has been so marked that some difficulty is reported in obtaining soldier labor for the normal industrial operations. It is therefore considered that the further stimulation of public building at this time would be inadvisable.

The energies devoted in the past to the stimulation of public building, it was further decided, will now be turned particularly into assisting professional and technical men in finding jobs. The work of placing this class of ex-soldiers presents unusual difficulties because the demand for the high grade of ability possessed by these men is not at present in such great demand as ordinary labor.

An active campaign, however, is being conducted to secure information from trade associations, technical societies, professional societies and large employers with a view to finding all possible opportunities for discharged army men who qualify in this way.

WOULD RESTORE YANKEES SERVING WITH ALLIES AS CITIZENS AUTOMATICALLY

New York, Aug. 7.—Legislation to restore to citizenship automatically Americans who served in the military and naval forces of the Allied nations prior to the declaration of war by the United States will be fostered by The American Legion. If the immigration committees of the Senate and the House, respectively, do not contemplate such legislation, the legislative committee of the Legion of the United States, headed by W. Miller and former Senator Luke Lea are joint chairmen will prepare a bill and have it introduced in Congress.

According to the Act of March 2, 1907, no American citizen could expatriate himself while the country was at war so that Americans who entered the service of foreign governments after April 5, 1917, remained citizens. But those who took the oath of allegiance to any of the nations allied against Germany prior to April 5, 1917 did expatriate themselves and must apply for reinstatement as American citizens.

They are required to appear before any court of the United States or any state court authorized by

Philadelphia Transit Men Get Wage Increase

Philadelphia, Aug. 7.—An increase in wages averaging about seven cents an hour for its 6,000 motormen and conductors is announced by the Philadelphia Rapid Transit Company. Effective to-day

elevated motormen will receive 61 cents an hour and surface car motormen and conductors 58 cents. It was the second advance given the men within a month.

The increase, a statement by the company said, is in accordance with the terms of the plan by which the management undertakes, with the employees, that the scale of wages here shall equal the average in Buffalo, Cleveland, Detroit and Chicago.

FARMERS!

See the Wonderful Moline Universal Tractor

at the State Tractor Demonstration at Boyd's Bonnymeads Farms next Tuesday and Wednesday, August 12 and 13.

The Moline Tractor is doing absolutely perfect farm field work, such as plowing, cultivating, mowing, harvesting, spreading manure, etc., as well as perfect belt work on most of the largest farms in Dauphin County.

Mr. John Runkle on Cumler's Dairy Farm, Highspire, says: "My little 'Red Lady' (his pet name for his Moline Tractor) is a wonder. I just finished cutting 38 1/2 acres of wheat with a seven-foot Deering Binder and used exactly 34 gallons of gas at 26 cents, or a cost of 23 cents an acre. That beats horsepower, and I did it myself."

FARMERS

Order your Moline now and farm the modern way. It saves time, it saves dollars. It means better crops—at less cost—

See us now or at the Demonstration.

We Sent Our New Big Loaf of HOLSUM To Every Grocer's Home

Your grocer prefers to give you the bread he thinks best. It is human nature---and it is good business, also.

We wanted Harrisburg grocers, therefore, to make the intimate acquaintance of our new large-size **HOLSUM** the first day. So we sent a loaf to every grocer's home.

Grocers are closer than consumers to the bread supply. You can depend on it they know good bread when they see it and taste it.

HOLSUM has been cheerfully subjected to the acid test. The grocers have tried it themselves.

Ask your grocer what he thinks of **HOLSUM** in the new large size.
