

NEW IMMIGRATION BILL MOST DRASTIC BEFORE CONGRESS

Washington, Aug. 21. — A new method of dealing with the incoming alien problem is embodied in a bill introduced late yesterday by the House Immigration Committee. It is regarded as the most drastic measure of the kind ever presented to Congress.

Adoption of the bill would mean, framers say, literal fulfillment of the so-called "gentlemen's agreement" between the United States and Japan with respect to immigration and would keep out Japanese coolies.

Under the Root-Tokihara agreement, Japan is obliged to send no coolies to this country, but it charged the records disclose that they arrive by the thousands, with passports as merchants, students, and the like. Once here it is alleged, they remain, send for "picture brides," raise families and their children become citizens of the United States by right of birth.

Representative Albert Johnson, of Hoquiam, Wash., chairman of the House Immigration Committee, says

the requirement that aliens landing at American ports must have passports with a time limit will break up the great inflow of foreigners. The bill provides that aliens coming within exemption clauses of the present law must obtain passports from their own Governments, viced by consular agents of the United States, and limited as to time.

But the bill does not stop there. Aliens, who under present laws are eligible to citizenship, would be permitted to come to the United States without passports providing they state in writing their belief that they intend to reside here and become citizens. They must agree to register at least once a year, failure to do so being a cause for deportation. Failure to take out first papers at the end of two years' residence, also is cause for deportation.

After taking out papers, aliens must remain here five years for final citizenship, with a time allowance off for knowledge of the elements

of the American plan of Government and proficiency in the English language. If an alien does not acquire citizenship in eight years he is sent home.

May Visit Here by Card
The committee hopes to provide a plan by which citizens of contiguous territory, Canada and Mexico, may visit the United States on cards issued annually.

Chairman Johnson is trying to have Congress send a special committee comprising Eastern and Middle West members to the Pacific coast to study the Japanese situation. "We want the East to study it," he said.

"Immigrants now come to the United States freely and are required to pass mental and physical tests," Chairman Johnson said, explaining his bill. "Many classes, such as lawyers, teachers, students, merchants and actors, are exempted from these tests. These are the

classes that it is proposed to have come with limited passports. That is to say, they are to come as visitors, and not as prospective citizens. If one comes as a prospective citizen he must so state, and agree in writing to place himself under probation, reporting at stated intervals. That is all there is to it. Visitors are welcome. We have room for desirable immigrants, but must have a guarantee as to their continued desirability and their willingness to acquire not only American citizenship but all that the word Americanism implies."

Members of the committee say it is not likely a bill suspending immigration for any stated period could pass Congress now. A year ago it could have passed, they add. There is a demand, according to members, for a provision in the new bill for deportation of aliens who withdraw their first papers in order to avoid service with the armed forces of the United States.

SPROUL BLAMES CONTROL OF RAILS

Big Factor in Raising Living Costs, He Declares in Conference of Governors

Salt Lake, Utah, Aug. 21.—At the governors' conference yesterday, Governor Sproul, of Pennsylvania, declared that Federal rail control was contributing to the high cost of living. Governor Sproul scored the Plumb plan by which it is proposed by the workers that the railroads be governed by a committee of fifteen, five members to represent the general public and ten members

to represent the employed, as unfair. The Warfield plan, by which the railroads are to collect six per cent. on their investment, any surplus to be divided equally between the public, the workers and the earning railroad, he characterized as a makeshift.

"The Plumb plan is the most Socialistic doctrine that has been expounded in the country," Governor Sproul declared. "The government might just as well turn the Post Office Department over to the workers as to turn the railroads over to them. There is just as much reason for the one as for the other."

"The Warfield plan is merely a makeshift, and does not cover the situation. It is unwise to place any arbitrary limitation upon the earning capacity of any corporation or individual. Railroads, like private industry, like to save a little for a rainy day." Governor Sproul stated that he

had been given some new ideas while in Salt Lake with regard to the fight being waged by other states against the high cost of living.

"While I believe that Pennsylvania has done as much as possible in this regard, I have gained some ideas which worked out, will make the co-operation between the states and the Federal government more effective."

HAWAII GREET'S DANIELS

Honolulu, Aug. 21. — Ancient Hawaii, through the sons and daughters of its warriors, welcomed Secretary of the Navy Daniels and his party and the officers and men of the dreadnaught New York which arrived here to-day. Rear Admiral Albert M. D. McCormick, who underwent an operation for appendicitis at sea last Monday, was reported to be in a dangerous condition.
