Pittsburgh, Sept. 27.—The National Committee for organizing iron and steel workers at a meeting here to-day ordered a general strike in the plants of the Bethlehem Steel Company to become effective next Monday morning at 6 o'clock.

Secretary William Z. Foster, of the committee, in announcing the strike, said that between 40,000 and 50,000 men were expected to be affected. He asserted the Bethlehem plants were among the best organized in the country.

Consider Reply The committee with John Fitzpatrick, chairman, present, met in a special session to consider the reply of E. G. Grace, president of the Bethlehem Steel Company, to the union's demand for a conference.

Ship Plants Not Affected The shipping plants of the Bethlehem Steel Company will not be affected Mr. Foster said, as they are working under union agreement.

The plants affected by the strike order are Steelton, Reading, Lebanon, Tittusville, South Bethlehem, in Pennsylvania, and Sparrows Point, Md.

The strike order was immediately telegraphed to the Bethlehem Steel workers' representatives. Plans were also made to rush organizers into the new strike zone to aid in handling the situation.

When Frank A. Robbins, Jr., general manager of the Steelton plants of the Bethlehem Steel Company was notified that the strike order had been issued he said he had received information from the heads of the order actually had been issued.

"It is impossible at this time to say just what will happen at Steelton," said Mr. Robbins, "but we shall continue to operate the departments and there will be work for all who do not desire to quit."

There has been considerable discussion of the strike, with a number of meetings but no demonstrations. Both union men and officials of the company have been busy making preparations during the week for actual eventualities and the order finds each prepared for coming events.
