

Must Co-Operate to Retain Huge Trade With Latin-America

Atlantic City, N. J., Nov. 14.—John Barrett, retiring director general of the Pan-American Union, in an address at the annual banquet here last night of the National Coffee Roasters' Association, declared the present enormous volume of trade with Latin-American countries could not be maintained unless there was a co-operative effort among the manufacturing, financial and commercial interests of the United States. He advocated improved steamship service between this coun-

try and South America and urged the lending of money to Latin-American governments by financial interests of the United States. Mr. Barrett said the total value of products exchanged between the United States and 20 Latin-American countries has passed the \$2,000,000,000 mark. "This is especially significant," he added, "when we recall that the value in the last fiscal year before the war was approximately only \$800,000,000."

FEAR ONE CARRIER LOST

Sault Ste Marie, Mich., Nov. 14.—From reports of wreckage off Manitow Island, at the tip of Keweenaw Point, it is feared the big ore carrier, John Owen, reported overdue was lost in the heavy gale that has raged over Lake Superior through-out the week.

Dr. Phillips, Dentist. 320 Market St. HARRISBURG, PA. It didn't hurt a bit."

WILL CLEAN OUT NESTS OF REDS

Department of Justice Agents Are on Their Way to West Virginia

Charleston, W. Va., Nov. 14.—Agents of the Department of Justice are en route to the coal mining districts of northern West Virginia. Governor Cornwell announced, following advice from Washington, it will be their purpose to "clean out radical centers" and round up I. W. W. and Russian agitators, he said.

Despite the assurance of officials of the United Mine Workers that they have the situation in control, coal operators and state officials expressed uneasiness over the reports from coal fields in the northern counties of the state that radicals threatened trouble.

Since the recall of the strike order, reports have been current that radicals and I. W. W. agitators have been largely responsible for the reluctance of the miners to return to work, especially in the northern districts.

Men Returning to Work. While C. F. Keeney, president of the District No. 17, United Mine Workers, claimed that "about 50 per cent" of the miners in the state were working, coal operators said "not more than 30 per cent" of the men had reported at the mines yesterday. Mr. Keeney expressed the opinion that by Monday "every man would be back in the mines."

In the meantime, reports from the northern part of the state, received at the governor's office indicated that radicals were active in Marion, Taylor and Monongalia counties to prevent miners from returning to work. The presence of several "radical agitators" were also reported in the southern mining fields, but the presence of Federal troops had prevented "any open demonstrations."

Governor Cornwell has expressed the belief that "if a half a dozen of these aliens can be arrested and immediately and promptly deported," the situation would be "smothered." He said "there were a few leaders who should have been deported long ago."

MEXICANS WERE ARMED BY SPAIN

Munitions Shipped Them Last Year, Government Is Informed

Washington, Nov. 14.—Large orders for arms and ammunition placed by Mexico in Belgium and Spain, in preparation for the possibility of American intervention, came to light to-day when the State Department let it become known that the Government had taken steps to prevent their shipment.

The charge d'affaires of the United States embassy in Brussels has protested, under instructions, that shipment of the munitions would be in violation of the international arms convention. As Spain is no party to the agreement which was designed to aid in keeping the peace of the world during the after-war transition period, no such direct action is probable at Madrid.

The order in Belgium was placed with the Fabrique Nationale d'Arms at Liege, probably under the direction of Candido Aguilar, Mexican minister of foreign affairs and President Carranza's son-in-law, who went to Europe recently after stopping here and placing a wreath on George Washington's tomb at Mount Vernon.

The orders in Spain, which included rifles, millions of rounds of ammunition and a large number of machine guns, were negotiated through the Mexican minister there, Eusebio Arredondo, formerly ambassador to the United States and President Carranza's nephew.

The Spanish munitions according to information in the hands of the Government, began passing into Mexico more than a year ago, while the European war still was going on, and in violation of the interallied embargo. Rifles and ammunition and some sample machine guns are reported to have passed Havana on their way to Mexico as late as June of this year.

For later shipments cargo space had been reserved for October 19 on Holland-American Line steamships sailing out of Antwerp, and further space had been reserved for Tampico, Vera Cruz and Puerto Mexico on December 3.

SEND HOUSES TO ENGLAND

British Columbia Will Help Solve the Housing Situation

Vancouver, B. C.—British Columbia is preparing to send ready-made houses to Great Britain to help solve the acute housing problem in the British Isles.

If the output of brick in Great Britain were increased 250 per cent, according to Sir Charles Ruthen of the Society of Architects, it would be 20 years before the present shortage of brick in relation to housing needs would be overcome. There are it is estimated, 7,000,000 people in the island inadequately housed. The impossibility of obtaining enough brick has necessitated the use of lumber in the building of dwellings. Frame houses are contrary to British precedent, but the present housing crisis has broken down ancient tradition. A total of 1,044,000 dwelling houses, Sir Charles Ruthen declares, must be built in the next five years or well over 200,000 per year if the needs of the population are to be met.

The British government already has contracted 70,000,000 feet of lumber to be shipped from British Columbia. Of this amount, 39,000,000 feet has arrived on the other side or is in transit on the sea. This timber has been in the vast virgin forests of central British Columbia traversed by the transcontinental line of the Grand Trunk Pacific Railway. The great saw mills along the railway have been working at capacity for months. Recently a company was organized to manufacture houses on the cut and fit together plan exclusively to supply British demands. It has secured a 60-acre site in the waterfront in Vancouver and has started building its plant which by the end of the year, it has been announced, will have a capacity to turn out five houses a day. All the houses made by the company for a long period will be shipped under contract to England.

20,000 Pounds of Fat Record For Creamery

The College Creamery of State College, Pennsylvania, has paid its patrons \$15,213.24 for September's delivery of butter, which amounted to 19,642.8 pounds. This sum was distributed to 258 dairymen in the vicinity of State College, and made the largest haul in the history of the College Creamery, which speaks well for its standing in the community. Sixty-seven milk patrons delivered 129,870 pounds of milk, containing 4,952.5 pounds of butterfat. One hundred and ninety-one cream patrons delivered 34,323 pounds of No. 1 cream containing 9,498.1 pounds of butterfat; also 19-

188.1 pounds of No. 2 cream containing 5,192.2 pounds of butterfat. During this month there was a large increase in the proportion of No. 1 cream. The price paid compares favor-

ably with New York City prices for a similar period. The average price for 4 per cent. milk in New York City for the month was \$3.53. The average price of the best grade of creamery butter in New York for the

month was \$0.597. The price paid by the College Creamery for butter fat was 70 cents per pound for No. 1 cream and 68 cents per pound for butterfat in No. 2 cream. There were 17 checks for amounts over \$100.

No mistake about it, Chesterfields sure do come through on 'Satisfy'! None but the finest varieties of Turkish and Domestic tobaccos, specially selected and expertly blended—is it any wonder that Chesterfields welcome comparison with the best you ever smoked? Ordinary blending brings out flavor, of course, but blending by Chesterfield's process brings out a new flavor—a flavor that 'they' didn't know was there. And this blend is exclusive—based on our private formula. It cannot be duplicated, or even closely imitated. You get 'Satisfy' in Chesterfields and nowhere else. And the special, moisture-proof wrapping lets none of their flavor escape. A man's best pal is his smoke. Chesterfield CIGARETTES They Satisfy."

Searches Baggage of Dead Soldier and Nearly Gets Beating

Hoboken, N. J., Nov. 14.—Former service men were with difficulty prevented by the police yesterday from severely beating Meyer Fayerman after he had been caught searching the baggage of soldier dead brought from Russia on the Lake Daraga. The man claims he was a seaman and the man he searched was a police officer and fined \$100, which he paid. The police had to escort the man to Manhattan to protect him from an angry crowd.

Alleged Anarchist Held at Scranton

Scranton, Pa., Nov. 14.—Pacific Bellante, who has been living in this city, was arrested yesterday while working in the Mount Pleasant mine by Detective John Cartusciello on a charge of being an alien anarchist. Bellante was arrested on a warrant sworn out by John W. Abercrombie, acting secretary of labor. Government officials have been trying to locate the man for some time.

Seattle's Imports From Orient Worth \$1,000,000 a Day

Seattle, Wash., Nov. 14.—More than \$1,000,000 a day; more than \$30,000,000 a month; more than twice as great as the same month in 1918, was the value of Seattle's imports from the Orient during September, according to statistics compiled by the Seattle port warden. This flood of shipments from the countries on the other side of the Pacific was made possible by the new fleets of carriers placed in service out of this port by the United States Shipping Board, which is steadily increasing its volume of business here.

Farmers Profit From State College Creamery

State College, Pa.—The sales of butter, cheese, ice cream and other dairy products at the Federal State College Creamery, during the past year have amounted to \$120,842.81. When it is considered that nearly all of this sum, outside of the actual expenses of operating the creamery, is returned to the dairy farmers living in the vicinity of State College, it is evident that the College Creamery is a splendid asset to the dairymen. The prices paid to the farmers for dairy products have been higher than the prices paid by dairy establishments in New York City purchasing milk and cream in Pennsylvania.

The creamery is equipped with over \$5,000 worth of machinery and fixtures, and makes up large quantities of butter, cheese and ice cream, besides operating a retail route in the borough of State College. The abundant supply of raw material and the complete equipment in the creamery affords excellent facilities for teaching dairy manufacturing work to students at the College.

TELEPHONE SOUGHT IN 1609. The principle of the telephone has been known for many years. The first idea of it in modern days being explained in a book published in 1609. Hook commenced to study the subject in 1661, and in 1667 he succeeded in transmitting sound by means of a distended wire. Wheatstone experimented in 1821, and succeeded in conveying the sounds of a musical box from cellar to attic of his home. In 1881 an instrument called the telephone was invented, which telegraphed musical sounds by means of a rod of soft iron in a coil of wire through which a current was sent. "The reproduced notes," to quote from an account of this instrument, "though of the same pitch, are not of the same quality as the transmitting (transmitted) notes. They are very faint and resemble the sound of a toy trumpet." However, experiment after experiment was made by different scientists, until finally Professor Bell invented the system which, with changes, is that used to-day.

Advertisement for Diener Jeweler featuring a diamond illustration and text: "What we say it is, it IS Well! Well! Well! It's nigh on to Christmas!! What are you doing about your gift buying? Surely. Surely you are going to give something in jewelry—for what is more acceptable and lasting than a gift in jewelry. And when you seek the gift with a personal touch—what is more apropos than the really personal gift, the diamond, the ring, the pin, the watch (a Gruen Watch)? And then, we come to a very, very important point: Where are you going to buy gifts? You very quickly say, 'at the store where I have confidence in their methods.' Right! Decidedly right! Is it not fitting then that we present our service to you in its true light? Surely. For twenty busy years we have been building a jewelry business in Harrisburg. Small at first—NOW 50 times as great as when we started. A record to be proud of but not content with. Why not content? Because we are ever improving and building, growing and growing. And what is more we have never had a dissatisfied patron. No, not one—because should anything prove not satisfactory to a customer we stand back of all our representations. There is one policy with us and for you—'What we say it is, it IS.' DIENER THE JEWELER 408 MARKET STREET."
