Hardacker, British consular officer, had been included with Jenkins in the kidnaping plans. The announcement of the removal of the restrictions, which was made without warning in the House of Commons by the food controller Tuesday, came as a surprise to the members, who greeted it with loud cheers.

WAR-TIME BAN ON WHISKY REMOVED

115,000,600 Gallons Released by the British Food Controller

The announcement of the removal of the restrictions, which was made without warning in the House of Commons by the food controller Tuesday, came as a surprise to the members, who greeted it with loud cheers.

The liquor trade was equally surprised, and was beset by the well-to-do among the public as soon as the unexpected news spread.

Many orders of from 50 to 100 dozens were placed immediately, in addition to numerous commissions for smaller quantities. Although it is figured that enough

spirits has been thus freed to supply every man, woman and child in the country with 36 bottles apiece, it is doubtful if the public will find it easy at present to increase consumption to a great extent. The government maintains control of the maximum price, which for whisky is 10 shillings and six pence per bottle, and it is not believed that the dealers will sell much below that figure, as the existing high duty will remain. Moreover, restrictions on distillation during the war and the necessity of maturing stocks may lead the dealers to hold large quantities. On the other hand, it will be possible now to sell all the American whisky which has reached and is still reaching England, though clearance from the customs may be slow.

SALE OF RUM BRINGS RICHES

Little French Colony on the West Indies Is Very Prosperous

St. Pierre, Martinique, Nov. 20.—The manufacture and sale of rum brought unusual prosperity to the little island of Martinique during the war. Hidden away among the West Indies this little French colony of 200,000 people, so small that it is found with difficulty on most maps of the world, sent its sons overseas to fight for the motherland while the folks at home prospered by raising sugar, coffee, cocoa and manufacturing rum.

This took place, too, during a period when prohibition was sweeping over America. Not only did the exports of this beverage increase from approximately 4,000,000 gallons in 1913 to 5,862,500 gallons in 1917, a gain of more than 40 per cent, but the value of the exports increased from approximately \$2,385,000 in 1913 to

\$9,933,000 in 1917, a gain of about 315 per cent. Exports of sugar, however, decreased from 39,089 tons in 1913 to 20,478 tons in 1917. The production of sugar cane was increased during the same period but the islanders found it more profitable to use the product in the manufacture of rum to export it. From 1914 to 1917 imports of molasses used in the manufacture of rum, increased from 1,857 tons to 8,475 tons.

Philadelphia, Pa., Nov. 20.—The steamship A. F. Luckenbach, loaded with 12,000 tons of coal here for Rotterdam recently, was loaded in the record time of two hours and thirty-five minutes. This record was announced yesterday by Director Webster, of wharves, docks and ferries, in an address at the Engineers' Club.

Director Webster asserted that this port is unexcelled on the Atlantic seaboard for cheap and quick loading of vessels, due to the installation of modern loading machinery.
