I was advised to use May's Wonderful Remedy. Since taking a course of it, four years ago, my trouble has disappeared and have felt like a young man. Although 80 years old, I feel fit as a fiddle." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. WOULD CUT OFF COAL TO CANADA

Chicago Daily News Manager Urges Newsprint Retaliation

Washington, Dec. 16.—Suggestion that an embargo be placed on coal to Canada until Canadian newspapers, which he said, were using all the newsprint they desired, agreed to submit to the same conservation program forced on the newspapers of the United States was made by H. L. Rogers, business manager of the Chicago Daily News. This action could be justified, he added, by the fact that Canadian pulp mills used American coal in making their product. The prospective shortage of print paper for 1920 was estimated at 200,000 tons by Frank P. Glass, publisher of the Birmingham, Alabama, News and president of the American Publishers' Association. He predicted, however, that relief from the shortage would come within six months. "Congress, Mr. Glass declared, either should give the Federal Trade Commission full power to handle the entire newsprint paper situation or should appoint a paper controller with powers similar to those of the fuel administrator. The Anthony bill," asserted Bradford Merrill, business manager of the Hearst group of newspapers, "would destroy some 65 great newspapers, representing in every case a life time and in some cases three or more generations of effort to benefit in only a small degree the rest of the newspapers of the country. It would place an embargo on initiative and tend to encourage sluggards." Speaking for the Kansas-Missouri Publishers' Association in support of the bill, Herbert Cavness denied statements by metropolitan publishers that the country's plenty of weeklies could obtain a plenty of print paper if they had the initiative and courage to contract for it. "Scores of publishers in his section," he said, "were running a day to day basis, had no visible supply and were utterly unable to make contracts at any price for the coming year." "Many of them must cease publication unless something is done," Mr. Cavness declared. "They do not ask class legislation; only a change to live. We have in the United States the only real country newspaper system that exists in the world. It is endangered. The end is in sight. The country newspapers

are fighting a losing fight for their very lives. The large newspapers can save them by cutting down the size of their own editions and if the large newspapers will not do this voluntarily then the country dailies will keep at Congress until that body, which we have been taught to believe is all wise and all powerful, takes some action." Representative Randall, Prohibitionist, California, suggested that the situation might be remedied if the newspapers would all refuse to accept cigaret advertising and thus body, which we have been taught to

Chambersburg, Pa., Dec. 16.—Poor Director Jacob W. Lehman and Director-elect Ira B. Wenger will soon elect the third member to succeed Sheriff-elect Jacob H. Mayer who is expected to resign from the board within a short time. A deadlock now appears likely. Director Lehman favors Davison Greenwalt of Hamilton township, Greenwalt served on the board ten years ago and Lehman recalls he made a good director.
