KEEPER OF THE PENITENTIARY. A bill has passed the House of Representatives by nearly a party vote to take the appointment of Keeper of the Penitentiary, who, under the present law, is appointed by the inspectors nominated by the Governor and confirmed by the Senate, from the Inspectors, and give the election to the Legislature. The bill has passed one reading in the Senate. When it came up on the second reading, an amendment was offered by Mr. Moone, providing that the change shall not take effect until 1855; and the bill and amendment were laid on the ta-

No complaint is made that the present mode of appointing the keeper has not worked well. The whole cause of the proposed change is, to secure in office a whig by legislation. No other reason can be offered for the attempt to take from the Governor the supervision of the Penitentiary. This is certainly a very paltry business for a Legislature to be engaged in. It exhibits a greediness for spoils rarely witnessed. We look to the Senate, regardless of party, to crush the life out of the thing. The good one solitary good reason for making the

cear be given, aside from its party bearing, We have only heard one other reason attempted to be offered, and that is, that it is more democratic to elect by the Legislature than to appoint by the in England and France, and, in fact, in most of the Governor! This reason is tirged by tehigs. This the Governor is more democratic than an election from Egypt after a certain date, not far distant.by the Legislature—an hundred times more so .- The Nile overflowed before the harvest was over, The Governor is directly responsible to the people of and destroyed a great portion of the crop. The the State, and can be much more easily reached if exports from the Baltic will be in a great measure Legislature. While we should be glad, therefore, to see whigs become real converts to democracy in anything, they must permit democrats to underto suspect their actual devotion.

We repeat, that to make the keeper of the Penitentiary responsible only to the Legislature is really not to hold him to any responsibility at all. Formerly the Physician of the Lunatic Asylum was elected by the Legislature. This did not work well at all, and the plan was abandoned.

The people have lately forced the Legislature to give back the election of Judges and Attorneys General into their own hands. At such a time, the Legislature proposes to take from the Governor and give to itself the appointment of keeper of the Penitentiary, for the very patriotic reason that a whig may be elected, while the law as it at present stands might enable a democrat to be chosen !-The interests of the State of course sink into significance when so grand a design is to be accom-

We are certain that no democratic Senator will lend himself to the purposes of whiggery in this matter; and without democratic aid, the scheme will fail.

THE PARTY CAP PAULPOAD

Gov. Mansing, of South Carolina, in his annual message to the Legislature of that State, gives a statement of the prospects of this road, which will be of great interest to many of our readers. As we understand the statement of the means of the company, it does not include the subscription of \$400 .-000 by the State of Tennessee, included in the omnibus bill lately passed by the Senate. If this bill passes the House, it will reduce the means yet to be provided to build and equip the road from Charleston to Knoxville to \$400,000. This is really a very gratifying prospect for the friends of the road.

By the act of incorporation of the Blue Ridge Railroad Company, passed by the last General Assembly, the guarantee of the State upon the bonds of the Company, to the extent of \$1,250,000 was secared, upon the following conditions: First, that \$500,000 should be previously subscribed to the capital stock of the said Blue Ridge Railroad Company in South Carolina, by responsible persons, companies or corporations. Secondly, that such subscriptions should be made, or aid furnished to the Railroad Companies in North Carolina and Tennessee, designed to connect with that portion of the Road lying in this State, as would give reasonable assurance of the construction of the said North Carolina and Tennessee Roads. These conditions have been complied with. The city of Charleston has subscribed \$500,000 to that portion of the Road lying within this State; and Messra Anson Bangs & Co. have contracted for the construction of the entire Road, from Anderson, in this State, to Knoxville, in Tennessee, which renders the connexion not only reasonably assured, but as certain as any enterprise of such an extent can be. By the terms of this agreement the contractors are to receive in payment one-half in cash and the other half in capital stock and mortgaged bonds of the Company. By this mode of payment, the ultimate estimated cost of the Road is brought much more nearly within the scope of the resources of the Company than is usual in enterprises of such magnitude. At rates agreed upon with contractors the entire cost of the Road from necessary appurtenances, including interest accruing upon the bonds of the Company until the comple tion of the Road, will amount to the sum of about \$7,500,000. To meet this outlay, the Company es- purchasers. timate their resources as follows, viz. Subscription by the city of Charleston to

the Blue Ridge Railroad in South Carolina. Subscription by the same to the Blue Ridge Railroad in Georgia, Subscription of Knoxville and Charleston Railroad Company, Other subscriptions, estimated at State endorsement of bonds of the Com-

Estimated amount of stock and bonds to be issued to Messrs, Bangs & Co , being one half of \$7,500,000 3,750,000

6.700.000It will thus be seen that the means of the Company will fall short of the estimated cost of the work

This enterprise is undoubtedly the wisest and the greatest which has ever been projected in this State, and the ultimate results will be as beneficial to her interest, proportionably, as the great western lines of road to New York, or the Baltimore and Ohio Railroad now are to each of those cities respectively, and commenced under circumstances much more favorable to its completion. It is a more important measure than the proposed Charleston, Louisville, and Cinconnati Radroad, because it is a shorter route, embracing all the advantages of the other, and is less liable to the diversions of the trade from the valueys beyond the Alleghanies, owing to its peculiar location. By an arrangement shortly to be consummated, the charters granted in Georgia, North Carolina and Tennessee, will have all their privileges ceded to the Blue Ridge Railroad Company in South Carolina, so that the latter named corporation will exercise entire control over the affairs of the whole line of the road. By this it will be seen that all means have been adopted to give security to whatever capital the State, or citisens within the State, may contribute to this great work, by confining the control of its affairs altogether within our own borders. To perpetuate this power is in the highest degree descrable. It will give to the State the indefeasible right to a railroad ommunication from Knoxville, in Tennessee, to Charleston, and the exclusive power to control and manage the affairs of this company; thus establishing in perpetuity a highway of trade and travel from the remote West to our own seaports, the value and

importance of which can hardly be estimed. By the communication which was established by the charter between this department and the Blue Ridge Railroad Company, I have been enabled to ascertain, that by the terms of contract between Messrs. Bangs & Co., the work was to be com- next season's trade are coming forward slowly, and menced on the first of this mouth—and that a large being sold quite readily at buoyant prices. Satinets portion of the surveys are completed, and found to are dull and heavy. Shawls are less active, but present fewer obstacles than was at first supposed | stifly in private trade. Sheep's grays are in mode-A location has been made for tunnelling the Blue | rate demand at 50c a 60c. Tweeds are pretty free-Ridge, and work allotted to contractors—that their | ly bought, but at rather languid figures.

wardness—that the Di-tries through which the road will pass in this State will abundantly supply all the necessary labor.—that the citizens, both in this State and beyond it, have with extraordinary unanimity ceded the right of way without compen--and that every circumstance tends favorably to an early and thorough completion of this enorise, which was projected by the President and Company with so much patriotism and zeal, and prosecuted with such signal industry and ability. I have thus laid before you at some length, but

as briefly as possible, all the facts in my possession with regard to the condition of the Blue Ridge Railroad enterprise. I now recommend that the State subscribe to the capital stock of the company the sum of \$750,000, in order to put the enterprise beyond the reach of ordinary reverses, and in this way to secure to the citizens residing in this State the control of a majority of the stock of the Company, in reference to the contingencies which may frequently arise, where trade and commerce are to be controlled for our benefit. Nor would such a step be unusual or partial, since the Legislature has not only extended important aid to railroads con-structed entirely within the State, but to roads which have been projected beyond its limits, as in the case of the Charleston, Louisville and Cincin nati Railroad, and in the Wilmington and Manchester Railroad. The endorsement of the bonds of the Blue Ridge Railroad Company cannot be regarded as a subscription, for it is totally dissimilar in its character, and far less beneficial in its operation. In the one case the State becomes a co-partper, and risks her capital, and awaits the distant returns of dividends; in the latter case she simply makes herself liable as an endorser, and takes the

first mortgage on the property of the stockholders to secure herself against the possibility of loss. THE NEWS FROM EUROPE. The Turks have no doubt thus far been success

ful in resisting the monstrous power of Russia.-In every engagement they have been victorious. The accounts in relation to the deficiency of food countries of Europe, are as serious as ever; and implies a compliment to the democracy certainly, the certainty of such a deficiency is fully revealed. -to want to adopt the most democratic mode of Several of the usual sources of supply no longer election! But the profession is utterly insincere, exist. The Sultan has forbidden the export of and the assertion incorrect. An appointment by grain from his-dominious None is to be exported he eris than can the hundred men who compose the | stopped by the Russian war. | Want will breed insurrection and perhaps revolution, in many places, whatever the result of negotiations in regard to the Russian and Turkish war. Already a large porstand what democracy is better than they do, and tiou of the mills of England are stopped by strikes of the operatives for increase of wages; and their demands must be acceded to, or more serious difficulties follow. The increase in price of food renders an increase of earnings necessary to subsistence. Seventy thousand operatives have struck in

According to the Washington Union, Great Britain will want during the coming year, over 20,000,000 quarters of grain more than its own crop. From the facts above stated, it will be seen that nearly the whole of this demand must be supplied from this country. The wants of France are nearly or quite as large; and she must depend to a great extent on the same source of supply. And yet these are the two nations that, by protests and fleets, seek to set bounds to the limits of our republic. and suppress the "democratic instincts" of the American people. But, under present circumstances, there is no danger of anything more than profests. They cannot afford to go to war with this country. To sustain Turkey in the war commenced, is work enough for England and France

for the present.

FROM BRAZIL. By the arrival at New York of the clipper ship Union late and important intelligence has been received from Rio de Janeiro and the Argentine Republic. Gov. TROUSDALE, the new United States Minister to Brazil in place of Mr. Schenck, who returned home in the Union, was presented to the Emperor on the 8th of October. From the Argentine Bepublic we learn that the Constituent Congress of the thirteen Provinces, exclusive of Buenos Ayres, was still in session at Santa Fe, and had unanimously approved the treaties with the United States made by Urquiza, and had also refused to accept the resignation of that gentleman as Provisional Director. At Montevideo all was quiet under the Provisional Government. At Rio Janeiro when the Union sailed, coffee was still high. Washed 6]400, superior 5]100 to 5[200, 1st good 4]900a5[00, first regular 4|700s4|8000, 2d good 4|500 a 4|600, 7d ordinary, 4[200a4]000. The fever had entirely disappeared; there had not been a case in the city or harbor for three weeks before the Union sailed

and but very little sickness of any sort. GOOD NEWS. We are informed by Col. Ramser that a contract has been made by the Edgefield and Kentucky Company (from Nashville to Henderson, Ky.) with Vanbergen, Ward & Co., for the construction of the entire road, ready for the rolling stock, to be completed by the 1st of January, 1856. The portion of the road lying in Kentucky, is also, we believe, under contract. The speedy completion of this road will place Nashville in the way to secure an unlimited supply of coal, passing as it does through

The Supreme Court of Indiania has decided that portion of the liquor law submitting the question of "license or no license" to a vote of the peo-Anderson to Knoxville, in Tennessee, together with ple, to be unconstitutional. The effect of this decision will be to permit all who may give the required bond to deal out liquor in quantities to suit

NEW YORK DRY GOODS MARKET. The New York Herald of Friday says:

almost inexhaustible coal fields.

"The dry goods business displays very little ani-mation; but with diminished supplies of seasonable articles, and a great need of such among retailers, prices of most desirable fabrics are well supported. Brown sheetings and shirtings are in but very moderate request, partly for export, at former quotations. Bleached sheetings and shirtings, too, appear very quiet, being very sparingly purchased by local dealers and shippers at rather languid prices. Cotton flannels are in better supply, and tendered rather eagerly at old figures, but do not attracmuch notice. Denims are seemingly inactive, and tending downwards. Drills being neither over abundant nor in very brisk demand, are unchanged n price. Duck is still as rapidly bought as pro luced, and that too, at full quotations. All kinds of ginghams are saleable and firm, at 11c. The preparations for the spring trade are carried on with much energy, and factors are now getting in their The new year will witness a general revival of demand. Lawns and nankeens are essentially unaltered. Osnaburgs are in rather limited supply and fair demand, at full rates. Printing doths are quiet, but otherwise unchanged. Prints are still inactive, though the commencement of the spring traffic is not far distant. Already a few standard styles have been received, and some lots sold to buyers from remote, places. The prospects for the ensuing season are very bright. Stripes and ticks are without important variation.

Woollen productions continue in very moderate mand; at depressed prices. The stock on hand is not large, nor of the best kind. The current reccipts, which are all intended for spring trade, are extremely light, and not yet exposed to the public. A considerable number of orders have come to hand from distant markets for early supplies, and others will soon have to be filled. By the end of the holiday season we may expect a lively business. At present the operations are almost exclusively retail in character, and indicative of much languar in the traffic. Blankets are rather scarce, and generally firm, but not actively inquired for. A limited business is being transacted in fancy cassimeres, at a scompared with last year, is 352,928 bales. In the experts from 85c, to \$1 10, according to quality, per yard. The range is from 80c, a \$1 37½, though the experts with the same date last year, there is a decrease of 164,663 bales to Great Britain, 15,482 to France, and 12,612 to tremes are not current. Cloths are a little more sought after, chiefly by clothiers, who are about making up the spring supplies, at \$1.55 a\$1 a 75. Flannels are sparingly bought within the range of from 231 a 45c. Jeans are plenty and quiet .-The quotations vary from 18c a 30c. Linseys are unchanged. Mousseline de laines adapted to the

COMMERCIAL.

REPORTED FOR THE UNION & AMERICAN. ATLANTA, Dec. 2, 1830 Dear Sir -The weather is very pleasant, and rather unworable for killing Pork. Markets well supplied. Yesteday we hought a car lead to fill an order at 4e gross, which we thought low, but to-day holders are only asking 4c. We, under past experience, advise those who put up Ba con for this market to take all the rlb out of the Sides, as t is always with difficulty that we sell rib Sides, especially when the market is well supplied. Also, trim the Hams eatly and don't leave the tails sticking to them, it is out of lace and is very objectionable. When well trimmed they re the best Hams ever sold in Georgia. Ramsey's Hams have been taking the preference on account of their being rinard so neatly; but are there not others who can intro-

luce Hams to compete with friend Ramsey's? We will Lard 11c. Last winter and spring nearly all the Lard in East Tennessee was shipped to Augusta, Macon and other markets below this, and sold a large amount of it at one cent, per bbl. less than it could have been sold for in this narket, and left it very poorly supplied. Flour-This is another important article, and several

undred barrels can be sold weekly at \$5% per bbl.-the demand is very good. Eggs 20c.; Green Apples \$1a\$1 25; Cotton brisk at Sa10c. Respectfully. SEA90, Аннотт & Co., Cotton Factors and Commission Merchants.

UNION AND AMERICAN OFFICE,) The wearser in the early part of the week was pleasant, out the past two days have been quite winterish. The river s now navigated only by steamers of the smallest class,

there being about 30 inches water on the Shoals. COTTON.-There has been but little change in the Cotton Market since our last weekly report. In the early part of the week there was an improved feeling under which prices stiffened, but advices from New Orleans Friday of unfavorable tendency, caused them to droop, and to-day they have had a decided downward tendency. Factors are inclined to hold off, whilst on the other hand but little is offering. In New Orleans there is no demand for Nashville Cottons, a finer article being in request, and consequently they rule low, So being the highest figure, the following are the quotations for this market :

The receipts at the several ware-houses in the city this week amount to 607 bales, against \$59 last week, and the total receipts since 1st September to date are 8595 bales against 10,476 at a corresponding date last season, and TOBACCO .- There have been no receipts of the new

rop. We continue our que fation for the old crop at \$4 50a SUGAR -Our merchants generally have purchased their stocks, and so soon as navigation opens again the market will be supplied with this year's crep. Some has already arrived. There is no hanege in prices, which are 51/4 a716e by the barrel, and 5a6 by the bbd.

COFFEE-There has been an advance in this article is New Orleans, and prices here are consequently firm, Rio readily commanding 18c. MOLASSES-Sales at 25a28c per gallon for common New Orleans; Sugar House 35450—moderate demand.

FLOUR-The stock is gradually diminishing and prices inclice upward, though no positive advance has yet been realized. We still quote St. Louis at \$6 50; Tennessee \$5 50

SALT-Fine sask, \$2 50a89 75; coarse \$9 95a\$2 5 Kanawha 60c per bushel. WHISKY-Common rectified 20a38c, do Pike's Magne lia 23a25e: Harper's 23a25c: Lincoln 30a35c: Robertso: county 35a40; Monongahala 35a45e; Bourbon 35a45e; Rye 40a50e; Irish and Scotch \$8a\$8 50,

NEW ORLEANS, Nov. 26.

COTTON.—We left the market on Tuesday last with a very fair enquiry, which was resumed quite actively on Wednesday, but there was a general complaint on the part of brokers that they found the market poorly supplied with the qualities for which their orders most called for (viz. Middling, Good Middling and upward) and through this deficiency, and the more full rates claimed, the business of the day was confined to about 6600 bules, the advantage in the day was combed to about 500 bales, the advantage in prices being still more on the side of factors. On Thursday the market again opened with a very good enquiry, and a fair business was going on, when about noon the demand was stimulated into neusual activity by the receipt of the Canada's advices, which were looked upon in a favorable light, masmuch as the Liverpool Cotton market had slightly advanced, notwithstanding a confirmation of the reported commencement of hostilities between Russia and Turkey. Under the influence of this increased demand factors quite readily disposed of round lists, embracing low Cottons, that were previously rather neglected, and the sales reached fully 14,200 bales, which was much the largest day's business of the season. Yesterday the enquiry was less active and general, and at the same time the supply on sale was less ample, while the rates demanded by factors were more full than those obtained in the large business of the day previous. Under these circumstances the sales were about 4200 bales; making a total for the past three days of 25,000 bales, and for the week of 44,100 bales, taken for England, France, Spain, the Continent and the North, with some lots sail to be on speculation. With respect to prices, as we have already intimated the advantage has been on the side of sellers from day to day, and the advance within the week has been fully 'i_@', a cent at h, mostly within the past two days, and the greatest improvement being in the Middling and hetter grades. We alter our quotations to conform as nearly as possible to the rates current, though we must re-

ark that we find much diversity in the representations of different parties.

The question of crop, which for sometime past has been nearly lost sight of in the more immediate pressure of other influences, seems now to be assuming a position of some influences, seems now to be assuming a position of some prominence in the calculations of parties connected with the trade in our great staple. As we have already remarked in previous numbers, the prospects up to about the close of August, as gathered from the reports of the planters themselves, were considered quite flattering for a good yield, should the picking season prove propitious, but unfortunately the greater portion of the month of September, when dry weather was needed, proved musually rainy, and through this cause nicking was interputed and delayed the quite. this cause picking was interrupted and delayed, the quai-ty of the Cotton was injured, and the prospects of a libera yield were to some extent blighted by the shedding of bolls, the action of the "rot," the ravages of the worm, &c., which were the consequences of excessive rains. Since Septem-, however, the weather has been generally favorable for perking operations, but the reports that now come in of damage by frost, (of which, through the backwardness of the first portion of the season, and the rank growth subsequent ly caused by the laterains, the plant was unusually sus eptible particularly in Tennessee and North Mississippi, be region of country tributary to Memphis, and also in North Alabama, Arkansas, &c., are considered to be so well vouched for that reduced estimates of the crop seem now to be quite general, and as we have already intimated, appear to be exercising some influence upon the operations of parties connected with the trade, and also to some extent

in respect to the quality of the present crop, it is generally admitted to be the lowest in average of any that has come to market, at least for many years; and in view of the excessive proportion of low Cottons in the receipts thus far, and the very limited demand for them, compared with the better descriptions, even at an unusually wide difference in price, we deem it not improper to repeat the suggestion which we took the liberty to make about a month a nee-viz that it might be well for planters, so far as may be in their power, to handle the remainder of their crops with a view to quali-

ty as well as quantity.

The receipts at this port since 1st September (exclusive of the arrivals from Mobile, Florida and Texas,) are 269,446 bales, against 540,490 bales to same date last year; and the decrease in the receipts at all the ports, up to the latest dates other Foreign Ports.

College st., near Union. IMPORTANT IMPROVEMENT IN DENTISTRY. D. R. ROSS would respectfully invite the attention of the public to a NEW AND attention of the public to a NEW AND ACTURICIAL TERM, upon which he has been for some time practicing

with great success.

The improvement consists in the teeth being arranged upon a plate of oure pictinum, and by means of a silicious compound the teeth and plate are cemented firmly together. leaving no interstices for the ledgment or secretion o food, at the same time forming an artificial gum beautiful and life-like in appearance, and which is represented on the inside of the teeth as well as out. inside of the teeth as well as out.

Those interested are invited to call and examine specimens of this improved method at his operating rooms, No
