

Union and American.

BY F. C. DUNNINGTON & CO. Daily, 1141, Tel. Weekly, 87; Weekly, 88. WEDNESDAY, JUNE 6, 1906.

THE WEEKLY UNION AND AMERICAN. Published every Tuesday, Thursday and Saturday, each number containing the matter of two issues, is now being issued from our office to supply the wants of the many who are not satisfied with a Daily. Price 75 cents and not returned to a Daily. Weekly and not returned to a Daily. Price 75 cents and not returned to a Daily. Price 75 cents and not returned to a Daily.

OUR OUTSIDE PAGES. First Page.—Resources of the South—A Black Month Reported.—The Southern States.—The Affairing Incident—The Witness Against Mr. Davis.

Second Page.—Bricks Flung by Tilted Hoop.—TRENDS OF GENERAL NEWS.—Lionel Hayes, late President of the Merchants' National Bank in Washington, has been arrested and held for trial for violating the National Currency Act.

Our Consul at Liverpool, England, in a letter to the State Department, received here a few days since, says the declared value of British exports shipped to the United States during the quarter ending the 31st March, amounted to upward of \$30,000,000, against about \$12,000,000 for the same period last year. This does not include foreign products, such as tea and silk from China, spices from India, wool from the Cape, etc., which are shipped to these shores to the United States.

About three hundred colored couples were present at the wedding ceremony of the late Arlington Heights, in presence of Hon. Howard's recent relatives to each other.

The street car drivers in Cincinnati are on a strike for higher wages.

A Mr. Hays of Cincinnati proposes to build a large opera house in that city on the corner of Vine and Sixth streets, and to employ 1000 citizens to be held at the exchange a day or two to consider Mr. Hays's offer.

John Leavitt, United States District Court at Cincinnati, continued his hearing of cases assigned to the Government for violation of the internal revenue law.

At San Antonio, Texas, Freedman's Bureau examiners were in Augusta, Georgia, last Saturday.

A writer in the New Orleans Advertiser, who has been making some inquiries into the destruction of churches, says that, so far as he has ascertained, between 1890 and 1895 there were burned during the war. These churches, he thinks, had cost the people no less than \$50,000,000.

In the late Methodist were the greatest victory, the Baptists next, then the Presbyterians and the Catholics last.

On June 20th exchanges came to us filed with the pertinent facts of the case of the late Gen. Winfield Scott. It is a singular fact that among those who composed the grand jury there was not one who had in a nearer relation to the deceased than "intimate friends" and "family servants."

The New York papers treat the great Fenian case with the greatest indifference. There is no interest in Mr. James Stovall's fear that it will seriously injure the cause of Ireland, believing that Canada cannot be made a more important link upon the British power in the mother land.

Mr. White, late of Moho's guerrillas, has been elected Mayor of San Antonio, Tex. He was pardoned several months ago.

High Fenian officials say, W. H. Jackson, late of the Confederate army, has accepted a commission of Major General in the Fenian army. It is not credited by his friends.

A leading London journal now suggests that the Fenian movement in the British army is little more than a political party, and that it is not to be taken as a serious threat to the British Empire.

THE TRICHINE HEMORRHOID.

We are those who never believed in trichine. The Northern press in this country, for a year or two past, has treated with faithful accounts of the prevalence of trichine in pork, and a good many people have been led from their property by the statements paraded before the public regarding the ravages of this animalcule.

The trichine sensation started in Cincinnati, Ohio. Some parties, plodding German with a microscope, set out on a voyage of scientific discovery, with a full determination to find something. He found certain minute bodies in the muscular tissue of hogs, and connecting that fact with the fact that the poorer orders of the peasant class in interior Europe are subject to a peculiar form of paralysis, he announced that his new-found microscopic animalcule was a prolific source of disease, and that by the use of pork the great public was being victimized. Such an announcement in the pretentious style of pseudo-science captivates a certain class, especially new-writers and editors. By this latter we mean the trichine hemorroid, which is now spread to this country, and is being held as no sensational. This is a brief but fair statement of the case as it now stands.

We publish below a communication from the American Consul at Elmira, to the United States Department, giving the results of certain experiments touching these mysterious, morbid animalcules, and venture to say that the results arrived at in these experiments will be found almost invariably true, or in other words, that when the flesh of swine has been properly cured by salting and smoking, or properly prepared for human digestion in the fresh state by sufficient cooking, it is not only innocuous but nutritious, and that any sensible meat-grower or meat-eater who suffers his animal or stomach to be disturbed by talk about trichine is simply humbugged.

The following is a copy of a dispatch received at the State Department from our Consul at Elmira:

At Elmira, May 19th, 1896. J. W. S. W. Secretary of State, Washington, D. C.

Dear Sir: I have the honor to acknowledge the receipt of your letter of the 14th inst., in relation to the trichine hemorroid, and in reply to inform you that the results arrived at in these experiments will be found almost invariably true, or in other words, that when the flesh of swine has been properly cured by salting and smoking, or properly prepared for human digestion in the fresh state by sufficient cooking, it is not only innocuous but nutritious, and that any sensible meat-grower or meat-eater who suffers his animal or stomach to be disturbed by talk about trichine is simply humbugged.

TERMS AND CONDITIONS TO TRAITORS.

A leading Radical press, in speaking of the new reconstruction propositions now under discussion in the Senate, says "the conquering masses of the American people have never for a moment yielded their determination to secure such guarantees as would not only prevent the authors of the rebellion from retaining their power, but would also admit them to a share in the Government upon the clear and special conditions precedent," and recently a Senator in Congress, in the course of debate, inquired "whether the political crime of treason did not justify the political rights of the traitor." Both the assurance and the inquiry are in direct violation of the policy, and the very elemental principle of American republicanism, and the mind that could declare the one, or propose the other, must never have had any accurate conceptions upon the subject.

What, in the first instance, is called the "conquering masses" have, and can possibly have acquired no authority to declare terms, or prescribe conditions precedent to the admission of those lately in rebellion to their proper positions under the Government, or to the resumption of all powers attaching to such a position; nor have they any authority to release them from all due obligations, or from penalties attaching to violated obligations. The "conquering masses" in the recent case, do not subject all to the authority of the Constitution as it stood when the infraction was made, or at the time when the terms were made, or at the time when the terms were made. There are no other terms or conditions other than those therein laid down to which the yielding party can be rightfully made subject. The attempt by a political party, temporarily in control of one of the departments of government, to set up its views of social and political economy as the standard of orthodoxy, or to exact anything of the authors, aiders, or abettors of the rebellion except what the Constitution requires, is usurpation, which is but another name for treason. The men who yielded to the sword of the Confederacy, expected to ask a compensation with the terms of their surrender. If that life of some—the liberty of some—the property of some, be it so. They wish this done legally, however, for they yielded to the law. They did not surrender to the prejudice and bigotry of a malignant party, but to a great Government which they believed was as magnanimous as it was powerful, above all that it was just and fair. They did not surrender to the law, and that it would never permit them, whether they were regarded as unfortunate men, or criminal, to become the sport and victims of party hate.

To talk as did the Senator, from whom we have quoted, of political punishment for crime, treason, is to transport one two centuries back in time, and to put this Government to add one iota of punishment to the crime of treason beyond that affixed by the Constitution and laws at the time the offense was committed. Political punishment means bills of attainder, and bills of pains and penalties, and ex post facto laws to make offences where there were none.

The science of Government even in 1776, had advanced in this country beyond the point, and the Constitution of 1789 expressly forbids them all. The attempt to revive them, as we have said, is the overthrow of that Constitution, and the men who, in the hour of their triumph, proclaimed their faith to do so, are now the enemies of the people against whom they misuse their power.

REVENUE MOVEMENTS IN CUBA. From the Philadelphia Age.

The defeat of Spain in her attempt to reconquer the South American Pacific States, by the late war, has been followed by the defection of the containing parties. Cuba has been regarded for years. The Spanish yoke has been broken, and the people are now in a state of anarchy. Attempts have been made to establish a republic, but they have all failed.
