I am Sincere! Stop Calomel!
I Guarantee Dodson's Liver Tone

Listen to me! Calomel sickens and you may lose a day's work. If bilious, constipated or headachy read my guarantee.

Live up your sluggish liver! Feel fine and cheerful; make your work a pleasure; be vigorous and full of ambition. But take no nasty, dangerous calomel, because it makes you sick and you may lose a day's work.

Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel crashes into sour bile like dynamite, breaking it up. That's when you feel that awful nausea and cramping.

Listen to me! If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced, just take a spoonful of harmless Dodson's Liver Tone for a few cents under my personal money-back guarantee that each spoonful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.

Dodson's Liver Tone is real liver medicine. You'll know it next morning because you will wake up feeling fine. Your liver will be working; headache and dizziness gone; stomach will be sweet and bowels regular.

Dodson's Liver Tone is entirely vegetable, therefore harmless, and can not salivate. Give it to your children. Millions of people are using Dodson's Liver Tone instead of dangerous calomel now. Your druggist will tell you that the sale of calomel is almost stopped entirely here. For sale by Jo Anderson and all leading dealers. (Adv.)

**JAPAN HOLDING OFF
IN DEFERENCE TO U. S.**

Await Developments—Pro-Germanism Spreading in Siberia.

(Albert W. Fox in Washington Post.)
The view expressed in entente diplomatic circles here yesterday was that Japan, in deference to the wishes of the United States government, had decided to await developments before pressing forward with her military expedition into Siberia. The Tokio government apparently believes that developments in Siberia will speedily show that military action is essential, not only to safeguard Japanese interests but the interests of China, the entente allies and the Russian people as well.

Meanwhile Japan is understood to be negotiating with her allies and the United States regarding enforcement of emergency military measures at a time when all agree that something must be done. The policy of restraint which the Japanese government is exercising has evoked sincere expressions of approval in diplomatic circles here. It is fair to assume that this spirit of commendation is shared at the state department here.

More and More Threatening.
If latest reports can be taken as an indication of the trend of events in Siberia, the situation there appeared last night to be rapidly assuming a more and more threatening attitude to the interests of the coalition powers against Germany. There are indications from all sides that pro-Germanism is spreading like a prairie fire. There is not a single report indicative of pro-ally sentiment.

Gen. Semenov, who apparently was in command of sufficient anti-bolshevik forces to hold temporary away, is now reported to have been decisively defeated. Nurses and Red Cross units are attempting to reach the shattered remains of his army. The bolshevik so-called troops, which have been referred to as without training or organization, seem now to have undergone an almost miraculous transformation. The dispatches refer to their accuracy of fire and draw the conclusion that the training given by former German war prisoners in Siberia to the bolshevik commands is responsible. Anyway, Gen. Semenov appears to have shot his bolt and to have disappeared as a factor.

China's Troops Ready.
Meanwhile China expresses anxiety over the situation at Harbin, where Chinese troops are stationed. If the bolshevik penetrates into Chinese territory there it will be considered an act of war by China, according to the latest reports. The Chinese troops are apparently ready to defend Chinese territory at the drop of the hat. The tenor of late dispatches does not indicate any conciliatory feeling between the Chinese and the bolshevik.

**MESSAGE TO RUSSIA
REVEALS DIPLOMACY**

Wilson's Note Indicates Hope Lies in Peasants' and Workers' Government.

(By C. W. Gilbert, Staff Correspondent New York Tribune.)
Washington, March 11.—President Wilson's message to the soviet congress in Moscow discloses his diplomacy with regard to Russia. It is to trust Russia herself to build up a government that will resist Germany's incursion into her territory, and one that will keep at least a part of the German army occupied on the eastern front.

Moreover, it sees the hope of Russia not in the revolt of the constitutional democratic element against the bolshevik rule, not in such a movement as that which Prince Lvoff is said to be heading in Siberia, but in the peasants' and workers' government of which this congress of soviets is the expression. Addressing a message to the congress comes nearer to recognizing it as a government than this country has come to recognizing anything in Russia since the downfall of Kerensky.

Where the allies, as indicated in Lord Robert Cecil's speech, believe that no hope lies in Russia herself, that the only prospect of offering any resistance to Germany in the east lies in the intervention of Japan without regard to whether Russia wishes such intervention or not, the president apparently holds that the workmen's government in Russia should itself have sympathy and support and the promise of aid against Germany.

Hints United States Would Like to Aid. The words of Mr. Wilson do not expressly oppose the program of Japanese intervention; indeed, they imply that Russia might properly seek the military aid of its allies, for he expresses a wish that this government were in a position now to render "direct and effective" aid. If these words mean anything, they mean that this government would like to offer military support to Russia.

It is thought here that the president's message will have the effect upon the soviet congress of strengthening those who oppose the acceptance of the peace with Germany, and perhaps of bringing about the overthrow of Lenin. The bolshevik leader is thought to be now none too strong. The triumvirate of Lenin, Trotsky and Krylenko has fallen to pieces. The Lenin policy has brought neither peace nor food.

**HUNDRED SLAUGHTERED
BY ZAPATA'S RAIDERS**

General Jose Cabrera Reports Outrages Inflicted by Mexican Rebels.

Mexico City, Feb. 12.—(Correspondence of the Associated Press.)—One hundred persons were slaughtered by Zapata's men in their latest known raid on Feb. 2, according to statements made by Gen. Jose Cabrera. Taking advantage of the smallness of the garrison in the little town of Agua Blanca, state of Mexico, a force of Zapata adherents, estimated at 2,000, captured the place, killing 100 peaceful inhabitants and committing every sort of an outrage upon the defenseless men, women and children. According to Gen. Cabrera, he immediately led a force of government troops to Agua Blanca and routed the rebels after inflicting serious losses. Gen. Cabrera is in command of military operations in the southern part of the state of Mexico.

Gas Masks Sold Popularly During Weeks of Expectation.

Paris, Feb. 2.—(Correspondence of the Associated Press.)—The German bombing expedition which took place Jan. 31. Fifty new relief posts had been established in Paris and the suburbs, where "first-aid" could be given to the wounded or to the "gassed." These preparations along with daily warnings in the newspapers and hints as to what to do in case of alarm had given a sort of official support to rumors that had been in the air for months.

**LARGE BANKS IN GERMANY
ABSORBING SMALLER ONES**

Amsterdam, Feb. 5.—(Correspondence of the Associated Press.)—"If it is true to say that our industry is twice as rich as it was before the war, it is equally true that our big banks are twice as strong." Thus commences the year's review of the German banking position in the Frankfurter Zeitung, the leading organ of Germany's high finance.

According to the reviewer, 1917 was a year of amalgamation and extensions in the German banking world. Many small private banks have been absorbed by their bigger brethren and the latter have branched out in the allied countries and the occupied territories.

There was an enormous increase in the number of new companies organized and of new stock issues, according to the Berliner Tageblatt. One of the largest stock increases noted is that of the German Aniline combine.
