Get a few pounds of common potash, such as is used by soap makers, and expose it to the air until it softens to the consistency of putty, then spread it thickly in their runways, and wherever you find a hole stuff in as much as you can conveniently, you will in a short time be rid of all rats and mice. The caustic na-ture of the potash makes their feet sore, and then they lick their feet and that gives them trouble with their mouths; by that time they conclude the neighborhood has become unhealthy and they leave.

CYRUS FIELD, who knows a great deal about cables and railroads, predicts a about cables and ramous, predicts argreat fight between the giant corporations of this country. The cable fight will begin as soon as Gould's line reaches our shores, which will be in a few weeks. Rates will then fall, Mr. Field thinks, to 12 cents a word to Europe and 6 cents for press dispatches. As for the railroad war, it is impossible to predict when it will begin, for it is liable to break out at any minute. The present squabble between the presidents of the trunk lines, between Vanderbilt and Gould, Vanderbilt and Garrett, and Garrett and Gould, is the preliminary thunder that gives notice of the coming storm. When it does break upon us, however, it will reduce rates and bene-fit the public, Mr. Field says; and he is not very far from right there.

BAD ON THE BULL-FROGS .- Our enter-Bay on the Bull-Frogs.—Our enterprising citizen and harness-maker, Mr. Chas. Sonnemann, a few days ago discovered a monstrous bull-frog playing havor with a duck's nest in which was a full dozen of eggs. When seen, he was mounted on his after legs holding an egg, which he had slightly broken, to his mouth with his fore-legs, and thus sucking its contents. When his henor perceived Mr. Sonnemann, he quickly scampered for his hole in the nearest gutter, at the same hole in the nearest gutter, at the same time humming his favorite air of wa-rarum, wa ra-rum. This is a good one on bull-frogs and we are now convinced that they are possessed of more genius than we really had a right to expect at least this one.—[Iberia Star.

There are few noblemen who can trace their ancestry as far back as Iroquois, the American winner of the Derby. He can name every one of his ancestors to the eighth generation, although they number 540. Of course, a great many of these names are duplicated, as Iroquois is descended from some of the celebrated racers and breeders both on the father's and the mother's side. The following are the horms that figure most conspicuously. In his genealogical tree: Herod, Highflyer, Eclipse, Selim, Sorcerer, Eusebius, Penelope and Stamford.

To whom it may concern:
On the 18th day of June, 1879, an abcess formed
on the left hip of my wife, which destroyed the use
of the limb and left her helpless. Her sufferings were terrible, and her life was rapidly ebbing
away. After trying everything that could be
thought or heard of in medicine, without relief. 1
then heard of and sent for Dr. R. R. Roberst, who,
by his vital psycho-magnetic power, in a tew
week restored the use of the limb. She is now
able to walk to his office for treatment and back
home without assistance.
