WEDNESDAY.....SEPT. 25, 1895. THIS PAPER RECEIVES THE COMBINED TELEGRAPHIC-NEWS SERVICE OF THE SOUTHERN ASSOCIATED PRESS AND THE UNITED PRESS.

Our State Committee. Our State Democratic Committee will meet here to-day. The present duty of the committee is to organize our party as to make sure that the efforts of General Mahone to ride into power on the "honest-election" hobby shall prove a disastrous failure.

Our people, in the many county conventions already held, have shown by the resolutions they have passed that they recognize the desirability of revising our election-laws. But this work they mean to do themselves. They do not propose to entrust it to the hands of General Mahone, who in the bill presented by him at the Petersburg conference, has displayed little acquaintance with the wants of our voters. His bill is ponderous and pompous. Very few people have ever read it, but those who have see that it is a copy of the law of some Northern State varnished over for use in Virginia. In our opinion, it will never be adopted by a Virginia Legislature.

But that our election-laws will claim a large share of the attention of the Legislature at its next session, we have no doubt. On all hands it is conceded that the Walton law can and ought to be improved in the light of the experiences that we have had with it. When the Legislature comes together and our senators and delegates congregate, we cannot but believe they will be able to agree upon some amendments as will make the law entirely acceptable to the great majority of the voters of Virginia.

We undertake to say that when reports on the state of our party are made to the committee by members it will be found that our party in Virginia is in good condition. In no other State that we know of is the Democracy in a better condition than it is in Virginia. Here and there in our ranks we have exciting local or personal issues, but the masses are true to Democracy, and haven't the slightest idea of dividing for the benefit of the Mahoneites and Populists. Herein we see the effect of the lessons of Read-juster days.

True, however, there are questions of great importance as to which we Virginia Democrats are not agreed; but they are not questions that need to be decided now, and happily our voters exhibit no purpose to make them issues in this campaign.

Judging by the nominations so far made by the Democrats, and the well-grounded hopes we have of electing our usual majorities in the Senate and House, the membership of the next Legislature will include many men of prominence and ability. While the faces of some veteran legislators will be missed, we shall have here some new men who seem destined to rise to distinction, and a considerable number of men who were members of the Legislature in past years will be returned.

Altogether, the prospect is pleasing. In very few localities will Mahone's "honest Injuns" be able to break the Democratic lines. It may be that the General will succeed in keeping himself before the public to a degree that will enable him to control his party convention in this State next year; but if he triumphs to that extent, we guess he will be satisfied. He has some fresh bait on his hook for this campaign, but Democrats can see the same old hook sticking out.

And yet we think it unwise to underestimate the capacity for mischief of our enemy. While we believe that it is utterly impossible for our opponents to elect many senators or delegates, we cannot be too careful to prevent them from making discord in any single county or district. In short, we trust that our State Committee will organize a campaign of vigilance and activity, to the end that no breaks shall be made in our ranks through which the enemy may enter, and that we shall be able to poll our full vote for our nominees on the day of the election.

The Vanderbilts and the Duke. Chauncey Dewey has been to Newport for the purpose, as is believed, of bringing about a reconciliation between Mr. and Mrs. W. K. Vanderbilt. If so, it is to be hoped that he will succeed. By the way, it is a coincidence that the Duke of Marlborough and Miss Consuelo both should be children of parents who were divorced. The father of the present Duke, after being divorced from his first wife, married Mrs. Hamersley, of New York, after whom Miss Consuelo Vanderbilt was named. Mrs. Hamersley is now the Dowager Duchess of Marlborough.

It is understood that the dowry of Miss Vanderbilt will be \$10,000,000, and she will have \$20,000 a year, which sum goes to every Vanderbilt girl "for pin-money." She will need all the money that she can get, as the Duke of Marlborough is comparatively poor, and Blenheim Castle, which will be their residence, cannot be successfully run with less than 200 servants and other employees.

Miss Vanderbilt will outrank all the American women who have married Englishmen, and will even take precedence over the Dowager Duchess of Marlborough.

The New Yorkers and Silver. The Syracuse convention did not go so far as Tuesday's telegrams stated it would in its treatment of the silver question. Our report went on to us by telegraph, and we commented on it just as it came to us, jubilantly crediting the convention with a purpose to "demand an agreement with foreign Powers for the use of both gold and silver, and to declare against the unlimited coinage of silver until such an agreement can be brought."

It turns out, however, that the currency plank of the convention is quite different from this, and it, therefore, disappoints us and all others who had thought it settled that the convention would "demand an agreement with foreign Powers for the use of both gold and silver."

The government should go out of the banking business, and should limit itself to safe-guarding banking methods, which will extend throughout the country the money advantages of the cities. The legal-tender notes, born of the necessities of a struggle for national existence, should be withdrawn as they are. The presence in the country is a menace to the stability of business, and prevents the due use of the silver dollars already coined.

We recognize that many Democrats, with many Republicans, honestly believe in a dollar of legalized value, giving into a dollar of legalized value, giving into a dollar of nothing to the silver owner, and reducing in the same ratio the earnings of the industrial man, the savings of the prudent man, and the returns of the man who borrows.

"Fire and Water" Mixed Up. The conservative voters of this city are becoming more and more aroused as to the proposed charter amendments which are to be voted upon at the Democratic primary election. They are beginning to inquire and consider what good will be accomplished by this change; what by that? These are questions that are to be answered by the votes of Democrats. These are inquiries to which we should give the most earnest consideration.

In a recent article from Fire and Water (a paper devoted to these two branches of municipal government), reproduced in the Dispatch, the statement was made that this effort to reorganize (or disorganize) the Richmond Fire Department was the outgrowth of "a demand for reform." Not so. There is no complaint made as to the management of the Fire Department.

It is agreed on all hands that it has been admirably managed. Never was it better managed than it is now. And yet it is proposed to elect the commissioners hereafter by popular vote, instead of by the vote of the City Council. We will the editor of Fire and Water be pardoned for misunderstanding the situation here. Of course, it is incomprehensible to him, as it is to us, why any considerable number of people should wish to revolutionize a fire department against which no complaint of inefficiency or wrongdoing can be made.

Our voters ought to "put their feet down" very squarely and firmly against changing the charter as to the Fire Department. Absolutely no reason for the Police Department has been given by the advocates of these measures. Still we are threatened with such a change as may mean a complete reorganization of both of these departments.

So far as we have seen, the advocates of these charter changes have not stated whether they propose to change the term membership of these two boards next year or mean only to elect members to fill vacancies that will then occur. We predict that should these amendments be carried many who voted for them will come out with a demand for the complete reorganization of both boards next year. And should the boards be reorganized, what then? Why, quite naturally, the new boards will want to have a "shake up" of the men who are under them.

We warn every Democrat who loves this city, and who wishes to see it prosper, that he will fail in the performance of a great and urgent public duty if he neglects to go to the primary polls and record his emphatic protest against this mischievous scheme.

The proceedings and result of the "non-partisan" silver convention held at Raleigh yesterday should be a warning to Virginia Democrats not to combine with "non-partisans." Marion Butler bossed the affair, the Populists had everything their own way, and the Democrats who participated are asking themselves the question, "Where are we at?" The safest plan for the Democrats is to flock by themselves on all issues.

The article which appeared in the Dispatch yesterday, headed "Why We All Sweltered," contains matter which will lead all of us to study the new conditions which obtain in this and other countries, we might say all countries, as a result of electrical disturbances of one kind and another.

The Raleigh News and Observer is to adopt typesetting machines, and we note with pleasure such evidence of progress in North Carolina journalism.

Bar-iron, it is said, is likely soon again to overcome gravitation and soar, the phenomenon to result from a recent conference in Chicago.

The woman who entered the San Francisco church with Durrant is said to be alive, and ready to testify in his behalf.

The children will be found still small enough to require the immediate personal care of their parents at the circus.

If there is any sort of record that has not been broken this year, it will please stand up to be counted.

Senator Hill is certainly a lucky man, when he is benefited by his defeats as well as his successes.

The evils of deforestation are said to be strikingly portrayed in the forestry exhibit at Atlanta.

The silver convention at Raleigh seems to have been captured in toto by the Pops.

PAINE'S CELERY COMPOUND. AN ABSOLUTE CURE FOR THE WORST CASES OF RHEUMATISM. The Plain Language of Mr. Oscar Pike—The Greatest of All Remedies Accomplished His Cure After Many Months of Weakness and Suffering—No Tedious Waiting for Improvement.

Paine's celery compound is the one known specific for the cure of rheumatism. It does not need a tedious trial to prove it. The effect of this best of medicines is strikingly felt. Not a week goes by before the pains of rheumatism diminish. Thousands of men and women have told of the days and nights of pain and feebleness exchanged in a few weeks for activity and strength.

Paine's celery compound has won the reputation of being the remedy "that makes people well." Its good works extend from Oregon to Maine. In every State in this country there has been piled up in the newspapers and medical journals a tremendous amount of indisputable evidence of the curative power of Paine's celery compound over all forms of nervous debility and diseases of the blood. It cures after nature's plan, by affording nutrition for every part of the body, overhauling the worn-out tissues, and supplying new brain and nerve material, sending pure blood through the veins, invigorating the whole system, and removing the cause of disease.

Mr. Oscar Pike, a well-known resident of Princeton, N. J., recently sent the following unsolicited letter to the proprietors of this wonderful remedy: "Two years ago I was taken sick with what the doctor called 'grip.' I was improving, when I took on a violent cold and chill. Then rheumatism set in, first in the joints of my shoulders, then down my hands and arms; then all over my feet, hands, and legs swelled. I could not put my hand to my head; I could not dress or undress myself, nor get out of bed. I tried all kinds of medicines and sarsaparilla, with little or no relief. I was 73 years old. Some one told me to try Paine's celery compound. After I had taken three bottles I found a marked improvement. I have now taken twelve bottles, and the result is I eat and sleep as well as my own work, and go about usual, getting in and out of my carriage without help. I have been tempted to put an article in the paper for some time, but have not done so. Those that are afflicted as I have been, let them try Paine's celery compound."

Mr. Pike is well known in his locality. He is the president of the Society of Washington Agricultural Society and Trotting Association. When he goes for his mail, he says, people ask him what he has been doing. He says, "I have been late, and he answers, as do thousands of others throughout the country: "Paine's celery compound has made me well."

THE FOURCREAN-PRICE COMPANY. Sheets and Pillow-Cases. This season we are making a specialty of Ready-Made Sheets and Pillow-Cases. We have gone to the fountain-head—the maker—and had them made to our special order from the best materials, and instead of being cut, as they are usually made, we have had them torn by a thread and laundered, to insure proper shape after shrinking.
