THE STORY OF PENDREGRAST.

Lawyer Who Presented Him Gives Interesting Narrative of Convict's Life—Dr. Southall Returns from Norfolk—Personal.

A letter was received at the Department of Agriculture yesterday from Commissioner of Agriculture Koiner, who is in the Southwest conducting the Farmers' Institute lectures.

The Commissioner writes that the "institute" held at Pulaski was one of the very best of the entire course. It was well attended, and much interest manifested.

The personnel of the club, as it will be called, will be as follows: Catchers, Manners and Gans; pitchers, Bishop, Hooker, Whitsett, and Bass; first base, Thomas; second base, Left; third base, Brown; short, Dickey; left field, Trager; center, Bigbie, and right, Kain.

The Governor will shortly take up the request of Rev. J. B. Sweeney, of Galveston, Tex., for the pardon of P. W. Pendregrast, now serving out a term of ten years in the State Penitentiary.

Mr. W. S. Cox, of Gate City, Scott county, Commonwealth's Attorney of that county, who prosecuted Pendregrast, is in the city, stopping at New Ford.

Mr. Cox is inclined to think that the story of the poverty and helplessness of Pendregrast's mother is somewhat overdrawn.

TRIGG YARD NOTES.

THE THORNTON TO HAVE ITS TRIAL TRIP TO-DAY.

BOATS FOR THE OLD DOMINION CO

Richmond Concern Very Hopeful of Securing One of the Contracts—Interest in the Forthcoming Meeting of the Stockholders.

The torpedo-boat Thornton is to have its trial to-day. Mr. W. R. Trigg received a telegram last night, making the announcement, and a number of the officials of the yard will probably go down to witness the result of the experiment.

There is a good deal of interest in certain circles as to the result of the forthcoming meeting of the stockholders of the Old Dominion Steamship Company. Officials of the yard are very reticent, but they are expected to be presented at that time, but the fact that some very important move is contemplated is generally believed.

The most interesting of all the recent developments, however, is the fact that the Old Dominion Steamship Company's bids for two new boats for the James river service are to be opened to-day or to-morrow.

The ceremonies on at the opening of the court, at 10 o'clock.

IS A FRESHMAN AT 73.

Ex-Chief Justice of Georgia Enters the University (Chicago Tribune).

Logan E. Bleckley, ex-Chief Justice of the Supreme Court of Georgia, one of the ablest judges in the entire South, has created a sensation by entering as a freshman in the University of Georgia, at the age of 73, for a special study of mathematics and political economy.

The venerable jurist, who might well take the position of chancellor or occupy a professor's chair, simply announced to the faculty that he was entering as a freshman in the University of Georgia.

He will hardly consent to this, however, as he has much to do at his command for study as the rest of his classmates.

The presence of Judge Bleckley in the classroom and on the campus should give an inspiration to his associates and convince them it is never too late to learn.

At an age when most men are anxious to rest from labor, Judge Bleckley, though full of honors and distinctions, and already accounted among the scholars of the day, finds time to go to school to learn.

He goes to school to learn to play with you, and to be in every sense a student. Rest with him means work.

Called Upon to Do Queer Things by the People Who Patronize Them. (Chicago Tribune).

Medical men are not the only professional persons to learn curious secrets regarding those who patronize them.

A dentist with a large down-town practice was in a talkative mood at luncheon the other day to a writer in the Chicago Tribune.

"People in my line of life," said the dentist, "are very peculiar. For instance, about a year ago a good-looking young man came into our office one day and asked that we make an artificial set of teeth to increase the splendor of his appearance."

"You are aware that many are very particular concerning the plate in which artificial teeth are set. Some want gold, others silver, vulcanite, and what not. But did you ever hear of patients wearing their own initials inside the mouth?"

"I recently prepared an upper set for a gentleman who knew the dental circles, and in the platinum roof was set in wires of gold the wearer's initials. Another roof plate, which we were privileged to see, was a perfect masterpiece of art."

"I have a horseman depicted in gold wire, three hair, a foreground of caststone, and a crescent moon of gleaming silver—all set in the composition of the roof. The work was done in a very artistic and remarkable, and the price was exactly \$500."

"A person unconscious of the value of the inner roof would have set the price at \$25."

"I have a richly enamelled was the dancing girl which decorated the false roof of a one-time millionaire. The pictured lady wore slippers set with tiny diamonds, and the crown of her hair was a masterpiece of an ordinary set when it was decorated with a fragrant whiff, there never discoloring the dainty enamel of the choice article. We were once asked to make a plate from the tusk of an elephant, but as this would have proved difficult and unsatisfactory proceeding we were obliged to reject the offer."

"The most amusing thing we were ever requested to insert in a false roof was a tiger's claw—a trophy of an Indian jungle hunt. We managed it, and to prevent the claw from wounding the tongue of our patron we tipped it bluntly with gold. After a while the tip of the claw and the wearer's tongue was torn. To us he came in a rage, and finally decided to wear the claw as a chain pendant."
