SCHOOL TRIUMPHS IN PHILIPPINES

Wonderful Work Has Been Accomplished by American Educators.

WIDE FIELD IS OFFERED

Over 9,000 Teachers Now Are Employed in Various Institutions

[Special to The Times-Dispatch.] Washington, September 30.—A noted professor from the University of Chicago, who spent several months in the Philippine Islands, as lecturer at the Teachers' Vacation Assembly conducted by the Bureau of Education every year at Baguio, the summer capital of the Islands, returned recently to the United States and in speaking of the work of the schools there just before he sailed said:

"Other nations one of these days will be coming to the Philippines to see how the educational triumphs have been won."

Without question one of the triumphs of America in the Orient is the wonderful work that has been accomplished there by the public school system during the ten years since its organization.

System Develops Rapidly.

From a mere handful of pupils and an expenditure of a few thousand dollars in 1901 the system has developed until now it reaches into every town and nearly every village of the island, and last year instructed more than half a million boys and girls, and the Philippine government spent over three and a quarter million dollars of local revenue for education.

The services of over 3,000 American and Philippine teachers are employed in the various schools of the Islands as supervisors and class-room teachers of the academic and technical subjects of the courses of study.

The University of Chicago sent Dr. Shephardson and Dr. Goode, two of its ablest and most successful extension lecturers, to Manila during the past vacation to remain in residence at the Vacation Assembly of teachers and conduct educational courses during the session.

In referring to the class of men and women engaged in the educational work there they speak in the highest terms:

"I have seen many gatherings of educators, but none which averages higher than this one. The reason, no doubt, is that nowhere else could such a company be found of men and women who are doing pioneer work, who have the spirit of the pioneer, and whose earnestness in pursuing ideals is revealed in a conversation and conference talk."

"The company in attendance at the assembly has impressed me with a feeling of pride in the quality of manhood and womanhood in the service of the bureau. They are clean-cut, straight-talking, earnest people, the stuff pioneers are made of."

"As I came to know them personally and to hear of their work in all parts of the Islands, the problems they are meeting and solving and the success with which they are carrying the 'message to Garcia' in the service of education, I felt proud that I am an American, and that the generous American aim of helping these people to help themselves is being realized in the splendid service of the director and his co-workers in the Bureau of Education."

A Wide Field Offered.

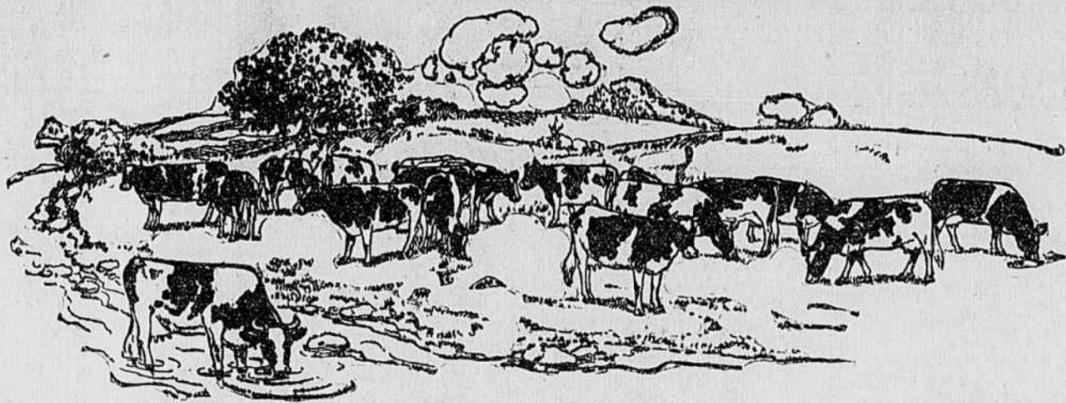

This is a field which requires the service of young men and women of superior qualifications, excellent character and good preparation, who are able to maintain a position of influence among a rapidly developing people.

For the right kind of men there are excellent opportunities to take a large part in the solution of some of the problems now confronting this country and at the same time gain an experience and training which will be of great value.

The government employs men as supervisors, teachers of science, English, mathematics, history, agriculture, manual training, and women for domestic science and home economy.

System Develops Rapidly.

From a mere handful of pupils and an expenditure of a few thousand dollars in 1901 the system has developed until now it reaches into every town and nearly every village of the island, and last year instructed more than half a million boys and girls, and the Philippine government spent over three and a quarter million dollars of local revenue for education.

Milk From These High-Bred Cows

Mrs. Housewife—

Here is the finest milk that ever came from cows. And you can have it every day of the year.

Our dairies are located in seven northern states—in the heart of our best dairying sections. They are stocked with Holstein cows.

The dairies are cleanly; the cows are inspected. The purity of the milk is most carefully guarded. Wherever you go, whatever you pay, you will never taste milk that's better than Van Camp's.

Water Taken Out

To bring this milk to you in an economical way we evaporate most of the water. Not by boiling—not by scalding. We do it in a vacuum, in moderate heat—at 125 degrees.

This is done close to each dairy, in a modern plant, under clean and aseptic conditions. Thus two-thirds of the water is taken out from the milk that comes fresh from the cow.

Nothing is added whatever—no sugar, no starch, no preservative. Nothing but water is taken out. Then the milk is put up in sealed cans, and then pasteurized. When you put back the water, you have the natural milk as it came from the cow, save for the sterilization.

Van Camp Packing Co.
Indianapolis, Ind.

8% Butter Fat

The milk as it comes to you is as thick as thick cream. It is 25 per cent solids—8 per cent butter fat. In coffee or on cereals it tastes like the richest cream.

In cooking it gives a rich flavor to milk dishes—the flavor of whole, rich milk. You don't get whole milk from the milk wagon, because the milk separates. There is always a dearth of butter fat or solids. The milk which gets to your cooking is rarely more than a half-milk.

You'll be amazed at the flavor which Van Camp's gives to milk dishes. Yet it's nothing but rich, whole milk.

Utterly Sterile

Van Camp's Milk is free from germs—absolutely free. Where there are millions of germs in each drop of raw milk, there isn't one in a gallon of this.

Think what that means—no chance of infection. All the dangers that lurk in raw milk are avoided. A pasteurized milk—the only sort safe to use.

You can buy, if you wish, a month's supply at a time. It is like having a cow in the pantry.

Van Camp's Milk

Evaporated—Sterilized—Unsweetened

Then you have milk or cream rich and fresh, any time you want it. You have all you want with none left over, for the opened can keeps-till you use it up.

Saves About Half

We save you the cost of the milkman's daily delivery. That costs more than the milk. And we save you all the waste. The use of Van Camp's, in most homes, cuts milk bills right in two.

And you get the finest milk in America—milk from high-bred cows—a milk equal to Swiss. It has been perfected by famous experts, brought from Switzerland and Holland. There is no other evaporated milk in this country nearly so good as Van Camp's.

The 16-oz. can—a full pint of Van Camp's—costs 10 cents. The 6-oz. can costs 5 cents. That's with two-thirds the water evaporated. Your grocer gets it direct from our nearest dairy.

SPEND BIG SUMS FOR EXTENSIONS

Directors Authorize \$1,100,000 Appropriation for Richmond Lines.

Within the next twelve months, the Virginia Railway and Power Company will expend the sum of \$1,100,000 in enlarging and improving its facilities for the service of the people of Richmond. This announcement was made yesterday morning by President William Northrop upon his return from New York, where he attended on Friday the meeting of the board of directors of the company, at which this big appropriation was authorized.

Of the total of \$1,100,000, the sum of \$700,000 will be used in the construction of a new power house and additional power transmission lines. The power house will be located at the foot of Twelfth Street, near the present station.

Big New Unit.

The first installation in the building will be a unit of 12,000-horsepower, which will increase the capacity of the Richmond plant to this extent. However, full provision is to be made in the structure for trebling this installation as rapidly as it may be needed, making the plant in Richmond one of the largest, most modern and most complete in the entire South. It will contain the largest single unit south of Washington, and will eventually reach the capacity of 36,000-horsepower.

By thus adding so tremendously to its power capacity, the Virginia Railway and Power Company aims to reduce the cost of production, on the principle of larger output lowering the cost of the unit. It is, of course, the aim of the company to sell its product to the manufacturers of Richmond, and it is realized that it will be impossible to do this unless the power can be made and sold for less money than the individual can make it for himself. As the demands of the city increase, the capacity will be gradually added. The sum of \$700,000 to be expended within a few months, is only to take care of the immediate future.

Rebuild Tracks.

In addition to this expenditure of \$700,000 for the power station and the extension of power lines, the directors also authorized an appropriation of \$400,000 to be used in replacing tracks on Broad Street, Main Street and other lines and extensions, and in the electrical welding of rails throughout the city. The rebuilding of tracks on Main Street is now under way, and the Broad Street tracks will be rebuilt and welded as soon as the city determines upon the paving of that thoroughfare, so that the Virginia Railway and Power Company's work

may proceed along with the city's work.

When inquiry was made yesterday of Mr. Northrop as to the possible developments in the recently acquired Norfolk properties of the company, he stated that the preparations are being made to rebuild a number of tracks in the Norfolk system, and to expend considerable sums in permanent improvements in that section. Details of this will be made public later. The power plant in Norfolk is regarded as one of the model plants of the South.

Million in Two Years.

The Virginia Railway and Power Company has evinced its faith in Richmond by the large sums of money it has expended in extending its scope and in improving its service to the public.

Considerably more than \$1,000,000 has been spent since the reorganization on July 1, 1909, in improving the properties. Among the purposes thus achieved were the building of the fireproof terminal building and car house at Seventh and Perry streets, South Richmond, a terminal building in Petersburg, and two large fireproof car houses, shops and office building at the reservoir. Besides, there has been added to the Richmond power plant a unit of 12,000-horsepower, including boilers and piping, and three fireproof substations with machinery and apparatus.

The company is also increasing the development of its water power plant in Petersburg, and has well under way the construction of a transmission line between the two cities, at a cost of more than \$150,000, so as to provide for the mutual interchange of power in the event of emergencies either in Richmond or in Petersburg. Each city will thus have the use of the water power and steam power plants of the other as occasion may demand. Although, except in cases of unusual demand, the plants in each city will provide for local needs only.

NEGRO IS HELD ON CHARGE OF LICENSING AN AUTO

[Special to The Times-Dispatch.] Lynchburg, Va., September 30.—Paul Black, colored, who was arrested in Roanoke several days ago, was today held for the action of the grand jury after a preliminary hearing in the Police Court on the charge of the licensing of a \$4,500 automobile from C. A. H. Lays. The negro was employed by Mr. Lays, and six weeks ago he stole the machine from the garage of the joy-ride. On the ride he ran into a telephone pole in Amherst county, and the machine was practically ruined. He escaped, and was not heard of until he was found in Roanoke.

YOUNG ASQUITH WILL HAVE BUSINESS CAREER

[Special Cable to The Times-Dispatch.] Buenos Ayres, September 30.—An interesting passenger in the person of Arthur M. Asquith arrived recently on board the mail steamer Annan. Following the example of a son of ex-President Roosevelt, the young man has decided to enter the business world, relying on his own resources and pluck to make good.

In order to study the Argentine people, the country itself and its commercial possibilities, Mr. Asquith has accepted a position in the firm of Franklin & Herrera, Ltd., Bartolome Mitre, Buenos Ayres, and will remain in the capital of the republic for six or nine months, or possibly longer.

A Wide Field Offered.

This is a field which requires the service of young men and women of superior qualifications, excellent character and good preparation, who are able to maintain a position of influence among a rapidly developing people.

Summary of Operations of the Building Inspector's Office

FROM JANUARY 1 TO SEPTEMBER 30, 1911.

Total amount of work authorized to September 30, 1911, \$5,006,366 00
Total number of examinations and reports, 90

Increase in new work in September, 1911, as compared with September, 1910, amounts to \$103,002; increase in alteration and repair work in September, 1911, as compared with September, 1910, amounts to \$5,280, making a total increase of all work authorized in September, 1911, as compared with September, 1910, of \$108,282.

CLARKE RELEASED ON \$5,000 BAIL

[Special to The Times-Dispatch.] Amelia, Va., September 30.—Judge Walter A. Watson granted bail to Lee B. Clarke, in the Circuit Court here today, in the sum of \$5,000 for his appearance at the December term of the court to hear a motion for a new trial in his case on the ground of newly discovered evidence and technical objections to counsel.

Mr. Clarke had been found guilty at this term of the court of murder in the second degree, with confinement at ten years in the penitentiary, for

shooting E. Lee Cousins in the public road near Nazoing Church on February 13, from which wounds Mr. Cousins died on February 18.

The citizens have been greatly concerned over this case, which has caused a larger attendance at court than any other for some time.

Mr. Clarke's bondsmen are T. W. Winn, C. C. Clarke, D. S. Clarke, J. L. Clarke, T. E. Clarke and F. L. Clarke.

Callahan—Hurt.

[Special to The Times-Dispatch.] Lynchburg, Va., September 30.—A pretty marriage was solemnized Wednesday at the home of Rev. C. A. Woodson in Rustburg, when Miss Minnie Hurt, daughter of William Hurt of Huron's Creek, was married to B. G. Callahan. After a supper at the Hotel Fountain, at Rustburg, at which the guests were entertained, Mr. and Mrs. Callahan left for Washington, from where they go to Forest Depot to reside.

LIGHTS THE WAY TO GOOD HEALTH

Conquerine

Conquerine is a Life-Saver When You Are Suffering From Constipation, Indigestion, or Dyspepsia

Use CONQUERINE. It's nature's own remedy. CONQUERINE is guaranteed to cure CONSTIPATION, INDIGESTION and DYSPEPSIA or your money will be refunded. Recommended and prescribed by physicians everywhere.

"Bedford City, Va., R. F. D., No. 1.
Leftwich Chemical Co.,
Lynchburg, Va.—

"Dear Sirs—I have been a sufferer for many years with indigestion and other stomach troubles. I could not eat scarcely anything that did not make me sick. I was nervous at night and bothered constantly with a hacking cough. I have spent about \$100 with doctors besides trying many medicines, but could not get any relief.

"I bought a bottle of CONQUERINE and have gained nine pounds while taking it. I can now eat anything I want and enjoy it. My cough is lots better, and I sleep fine.

"I think it the finest medicine in the world.

"I wish I could tell everybody about CONQUERINE.

Yours respectfully,
"MRS. M. C. GILLS."

A 25c BOTTLE WILL GIVE YOU INSTANT RELIEF.

Ask your druggist for CONQUERINE, and be sure you get the genuine. There is nothing better or just as good.

CONQUERINE is warranted to cure INDIGESTION, DYSPEPSIA and CONSTIPATION. 25c, 50c and \$1.00 bottles, at all druggists.
