

GLAD TO PAY

Children's Colds—

To make your distressed baby easy and comfortable, give *Foley's Honey and Tar*.

It is just what children ought to have for feverish colds, coughs, "snuffles" and tight wheezy breathing. It stops croup, too.

Foley's Honey and Tar tastes good and the little ones like it. It contains no morphine, chloroform or other drugs that you would not like to give the young children. *Do not accept a substitute.*

"My baby was stricken with a severe cough and cold at one month old. I gave him ten to fifteen drops of *Foley's Honey and Tar* every three hours and it surely did help him. He hasn't been sick a day since." Mrs. B. H. Garrett, Schoolfield, Va.

The People Who Work With Swift & Company

Big Business is usually pictured in the public mind as a huge, soulless machine. As a matter of fact, it is just a collection of human beings like you.

Without boasting and simply to give to the public an idea of the human side of Swift & Company, we publish the following facts:

The lowest rate of wages paid to men has been increased voluntarily and by arbitration 167 per cent in the past three years; the wages of all packing-house labor have been increased an average of 125 per cent.

There is an Employees' Benefit Association (voluntary) providing disability and death benefits for a small weekly payment. Sick allowances are granted in times of illness, and pensions for disability and old age are provided without expense to the employees.

Under a two year time payment plan 4,000 employees have become shareholders in Swift & Company.

Company physicians attend employees needing their help at the plant and at home, without charge.

More than 1,500 of the 7,500 men who left to join the army and navy have returned to their jobs, and jobs are waiting for the others as soon as they return.

At the general office in Chicago, every boy is given an hour's schooling daily on company time, such work being accredited by the high school authorities in securing a two year commercial course diploma.

A summer home is maintained at Fish Lake, Indiana, near Chicago, where women plant employees may spend their vacations, without cost.

Swift & Company is co-operating with other employers to improve living conditions around the stock yards.

More and more thought and attention are being given to the opportunity and responsibilities presented in a big industry to improve working conditions and to raise living standards.

These are beginnings of a broad, constructive program, details of which are now being worked out by the Employees' Relations Committee of Swift & Company.

RUN THE HOUSEHOLD ON BUDGET SYSTEM

Keep Careful Accounts and Divide Family Income Wisely— Suggestions for Various Salaries.

A budget is absolutely necessary to the wise and well-proportioned running of a household. No budget can be made to fit all families, even families of similar size, locality, etc., but the well-proportioned budget provides a fair financial basis, a starting point from which to begin the work of wisely dividing the family income.

The main thing is to get the budget started, to keep careful accounts—in a way that will permit analysis of expenditures—for at least several months; a year, if possible. Many people keep accounts, personal and household, only in a way that balances cash and shows how it has been generally expended. A budget should do better than that.

An exact budget is difficult to provide at present, with all living prices in a state of flux but with a prevailing upward tendency. Figures differ greatly in various sections of the country, frequently in various sections of the same state. But in strictly industrial centers, it has been authoritatively computed, food usually consumes about 45 per cent of the ordinary income, shelter 18 per cent, fuel and light 6 per cent, and the various "sundries" so grouped because so difficult of more exact classification, 20 per cent. In the following suggestive budgets for varying incomes the "savings" item has been placed first as most necessary where the family income is not too large and is practically inelastic. This item may include life insurance, savings bank accounts and such investible income-bearing governmental securities absolutely necessary with the kind of incomes noted as Liberty Bonds and War Savings Stamps.

For the initial preparation of a budget household co-operation must be obtained. The exact disposal of certain larger items, such as rent, fuel, food, must be decided, plans only changed thereafter when proven impracticable as at first arranged. A full account of personal and household expenditures should be kept for future reference and possible budget readjustments. Fairly, justly tried, the budget system will lift many a family from a financial Slough of Despond to sustaining financial heights.

Lots of Money in America.
There is more money in America than ever before in its history. War Savings Stamps are being offered. By putting our money into these government securities the nation will be helped, the funds will be safely and profitably invested and the thrift habit will be given a further impetus.

Greatness and Strength.
Greatness lies not in being strong, but in the right using of strength, and strength is not rightly used when it only serves to carry a man above his fellows for his own solitary glory.

Fuller's Earth in Big Demand.
Fuller's earth is worth more per ton in the United States than the ore from many large gold mines now paying handsome dividends. Florida is the leading producer.
