Why Colds Are Dangerous

It is the serious diseases that colds lead to that makes them dangerous. They prepare the system for the reception and development of the germs of influenza, pneumonia, tuberculosis, diphtheria, scarlet fever, whooping cough and measles. You are much more likely to contract these diseases when you have a cold. For that reason you should get rid of every cold as quickly as possible. Chamberlain's Cough Remedy will help you. It is widely known as a cure for bad colds.—89-5w.

She States It Mildly.
While suffering with a severe attack of the grip and threatened with pneumonia, Mrs. Annie H. Cooley of Middlefield, Conn., began using Chamberlain's Cough Remedy and was very much benefited by its use. The pains in the chest soon disappeared, the cough became loose, expectoration easy and in a short time she was as well as ever. Mrs. Cooley says she cannot speak too highly in praise of this remedy.—89-5w.

Talks to Farmers (No. 2)

Lumber Back To Normal

Lumber has reached a price level where its value bears the true and proper proportion to the value of the products you farmers raise and sell. In other words, lumber prices today are consistent with prices on farm products.

There's nothing mysterious about it—just the old law of supply and demand—and a willingness on our part to play fair with our customer friends by reducing our prices to a point where you can afford to buy.

Right now your problem may be a barn, a shed or other building necessary to help you do your work better, more quickly or more economically. Or it may mean a new home, or repairing and remodeling the old one.

Bring your problems to us. Let us show you the facts. We have many plans and suggestions, some of which you can probably use, and our friendly counsel and assistance won't obligate you in any way. Come in the first convenient day and let's talk it over.
