## Homes of Individuality

Selected by Walter J. Keith, Architect

SUBURBAN HOME DESIGN NO. D-1346  
A combination of stone, stucco on hollow tile, and shingle has been employed with good effect in the exterior design of this cottage home.  
Below is suggested a floor plan for this charming exterior including all those requirements the homeseeker deems necessary to make a complete home. The living room is of large proportions and is made particularly attractive by the open fireplace with its side seats, and the stairway leading from the far corner. The dining room adjoins at the rear and has service way through the commodious pantry from the kitchen. A rear entry gives space for the refrigerator, and there is a large closet in the kitchen for pots and pans. For easy access to the second floor, four steps lead to the main stair under which is a passage to the living room, and from which descends the cellar flight.  
The second floor provides for four bedrooms and bath. Generous closets are arranged for, and a scullery in the hall ceiling gives access to the attic for storage.
