A fine musical program will be given and there will be exercises by many classes and individuals in the Sunday school. The Cradle Roll and Home Department will be present and certificates of recognition will be given to those who are entering the Cradle Roll. In all, there will be an hour of great interest to those who can be present. Rev. E. E. Barnhart, state director of Sunday school and young people's work, will be present and speak briefly.
Evening Worship at 8 o'clock. Rev. E. E. Barnhart will be present and deliver the sermon of the evening. The chorus choir will lead in the song service. There will be special music by the children.
We give you a most cordial invitation to join us in these services of Children's Day.

OIL IS THIEF.
Inferior oil steals the excellence of your motor so slowly that you are not aware of it until it is too late—until the costly damage has been done which cannot be repaired. French Auto Oil reduces the wear and tear on your motor to a minimum.—Adv

Ole Rustan, a farmer living eight miles south of New England, N. D., came to Fargo Thursday afternoon with \$55 that he called his own. When he awoke Friday morning the money he had entrusted with the night clerk at a local hotel, was gone. Also the night clerk, Carl Hoffman. Rustan was bound for McIntosh, Minn., to visit his folks who live north of there.

LOCAL PASTOR WAS HONORED

Rev. Bruce E. Jackson Chosen as Moderator of North Dakota Association.

The Captains of the North Dakota association, comprising the churches of the southern tier of counties of the state, held a well attended and enthusiastic, associational gathering with the First Baptist church of Fargo on Tuesday, Wednesday and Thursday of the past week.

Reports from the various churches of the association showed every church to have a pastor and to be in a flourishing condition. Under the very efficient leadership of Rev. C. F. Tingley, state superintendent of missions, the missionary churches

HOW HE QUIT TOBACCO

This veteran, S. B. J., a man who was addicted to the excessive use of tobacco for many years. He wanted to quit but needed something to help him. He learned of a free book that tells about tobacco habit and how to conquer it quickly, easily and safely. In a recent letter he writes: "I have no desire for tobacco any more. I feel like a new man." Any one desiring a copy of this book on tobacco habit, smoking and chewing, can get it free, postpaid, by writing Edward J. Woods, 1463 A. Station E, New York City. You will be surprised and pleased. Look for quieter nerves, stronger heart, better digestion, improved eyesight, increased vigor, longer life and other advantages if you quit poisoning yourself.

showed a marked increase over the conditions of one year ago.
Efficiency Key Word.
The key word of the associational gathering was "Efficiency" and the discussions of the three days proved very helpful. Among the speakers on the program were: Rev. E. A. Gilmore of Jamestown, Rev. J. T. Brubaker of Fargo, Rev. E. A. Kelford of Ellendale, Rev. W. T. McGann of Lidgerwood, Rev. Bruce E. Jackson of Bismarck, Rev. J. A. Ford of Lisbon, Rev. A. E. Peterson of Fargo, Rev. C. E. Tingley, state superintendent of missions, of Grand Forks, and Rev. Frederick A. Agar, Ph. D. of New York.

Election of Officers.
The election of officers for the coming year resulted as follows:
Moderator—Rev. Bruce E. Jackson, Bismarck.
Vice-Moderator—W. H. Aymar, Fargo.
Clerk—Rev. E. A. Kelford, Ellendale.
Treasurer—W. E. Parsons, Bismarck.
The association will meet next year with the Jamestown church, which is constructing at the present time a fine new edifice.

SUNDAY SCHOOL INSTITUTE HERE

A Sunday school institute will be held at the Baptist church tomorrow (Monday) evening at 8 o'clock. The speakers and delegates on the way to the state convention at Minot will attend the institute meeting and Rev. E. W. Thornton of Cincinnati, Ohio will be the speaker of the evening. A good attendance is requested from all Sunday schools of the city. The meeting will be a good one.

A POEM AND A MORAL.
There was a man who had a Ford. That gave him all kinds of trouble. So he bought a can of French Auto oil. And now his mileage is double.—Adv.

Merely "Oil" Won't Do Here

Consider running your motor without any lubricant. That is only a much quicker way to ruin it than to run it with a poor oil. It takes longer, that is all. An oil that does any damage has no place in any car, for the function of a lubricant is to protect friction-surfaces. The ease of running—easy action and full power—simply goes along with this protection. Some oils are better than others, but only the best should be used. Anything less is injurious. The question is—Which are the best oils?

Polarine

is made in the largest plant of its kind in the world. Here is every known facility, collected after years of experience, for the production of the perfect oil. Here is a great laboratory. Here are chemical specialists—experts who have spent years working out lubricating problems of all kinds. Their prestige is at stake on every one of their recommendations. Polarine is their recommendation for all standard makes and types of motor cars, motor trucks and motor boats in use today. No better oil can be made, yet Polarine costs no more than poorer oils. Our profits come from volume, for we are selling Polarine at the rate of 7,000,000 gallons yearly. Use an oil about which you know all the facts. All first class dealers, garages and filling stations can supply you with Polarine. Insist on getting it.

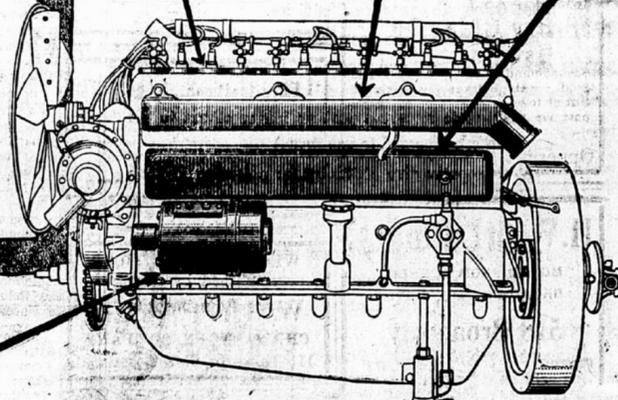

STANDARD OIL COMPANY

Chicago, U. S. A.

RED CROWN GASOLINE, made in the same plant, drives your car farthest at least expense

How Studebaker cars are built—motor

Valves are extremely easy to get at. Spark plugs and valve-cams are reached merely by raising the hood.
Note STRAIGHT-line exhaust manifold—wide and tapering—no sudden angles. Increases power.
By removing two thumb-screws the valve mechanism is immediately exposed for inspection or adjustment.

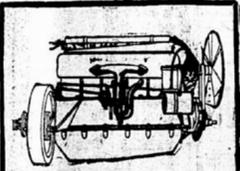

ECONOMICAL Power—and all that you need

This matter of POWER is a thing that we'd like to talk over with you before you buy a car—and talk over it, too, with the hood of a Studebaker open before us. For power is perhaps the most important thing in your car. And this Studebaker Motor is one of the engineering triumphs of Studebaker.

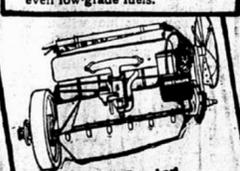

Simple—you'll see that at a glance. But the BIG thing is the POWER that it's designed to deliver. Long-stroke design—for the longer the stroke, the more leverage on the crankshaft. Has the reliable Studebaker oiling and cooling systems that insure conservation of POWER.

But study the little refinements of design and see how this motor has been made to give MORE power without using more gasoline. You'll find, for one thing, that the crankshaft, the connecting rods and all the moving parts are lighter and better balanced than you find in the average motor. The valve passages are much larger and better planned.

The intake is hot-jacketed to insure better vaporization of the fuel and NO waste of gas. The exhaust manifold, wide and tapering, runs back in a STRAIGHT line, with no sudden angles to set up back-pressure. And so you'll find a score of improvements over the average motor, too.

The Carburetor
is placed high on the motor, thus shortening the distance the gas travels to the cylinders. Increases power and gives QUICKER response to throttle. Is hot-jacketed and supplied with WARM air, insuring COMPLETE vaporization of even low-grade fuels.

The Starter
is simple in design, easily accessible and starts motor through silent chain. No gears in mesh with fly-wheel. Noiseless and with fewest exceptions when cranking the motor.

Studebaker Features
Electric Lighting and Starting—Full Protection—Axle-Tintack Bearings—Safety Tread Rear Tires—One-man Type Top.
Studebaker ROADSTER. . . \$ 825
Studebaker TOURER. . . 1025
Studebaker LIGHT SIX. . . 1225
Studebaker SIX 7-passenger. 1425
F. O. B. Detroit

Because it's a **Studebaker**

But won't you come in and study this motor. See how ACCESSIBLE every little detail is. And then, we'd like to have you ride in the car and drive it yourself and KNOW from personal observation on the road the flexible, free-flowing, ECONOMICAL power this Studebaker motor delivers. Write, too, for the Studebaker Motor Book.
