

NATURE MAINTAINS NO HOSPITALS

Nature never deviates from her strict and unvarying rules. She knows what she is about. And having this in mind, did you ever hear of Nature creating a hospital for the wild animals? Of course not! Perhaps because in the matter of right living and in the case of convalescence from an injury, wild animals are far superior to the Man whose ideas have become warped through too much civilization. Does Nature advise her creatures to "change climate" when they are ill? No! And yet, the animal sleeps in storm and blizzard and intense heat without contracting colds or getting the "fever and ague." The animal's cut or bruise will heal up in a fraction of the time the same sort of an injury will heal on a Man. Why? No doubt because the animal is directed solely by Nature. And that is the aim of the Osteopathic Physician—to point out the way to let Nature help YOU—to direct aright her healing forces already contained WITHIN YOU—to relieve by manipulation and adjustments any congestion of blood or muscles that are interfering with the proper course of your digestion, or nerve energy.

WORRY OF SENTENCE FORCES CHICAGO JUDGE TO LEAVE BENCH.

Chicago, Aug. 7.—Friends of Judge H. B. Freeman, who today sent his resignation from the superior bench of Cook county to Governor Dunne, said that ill health was the immediate reason for the resignation, which resulted from worry over a sentence imposed on two men 20 years ago.

Two years after Judge Freeman was elected to the superior court, two men of the name Kurth and McNally, were tried and convicted before him by a jury for murder. The judge, under the law sentenced them to life imprisonment. Since then, he has made fruitless attempts to get the release of the men, whom he had decided were innocent. The strain is said to have undermined his health and so weighed upon him that he decided to quit the bench.
