TO MARRY NAVAL OFFICER

Miss Marjorie Murdock, daughter of Victor Murdock of Kansas, leader of the Progressive party in the house, is soon to marry Lieut. Harvey Delano, U. S. N., at present attached to the U. S. S. Vermont. Miss Murdock is a Washington debutante of two winters ago and is noted for her exquisite Titian coloring.

GIRL "BELLHOPS" IN LONDON

Boys Gone to War, Sisters Are Giving Good Service in Their Places.

London.—The girl "bellhop" is the latest innovation in the large West end hotels, and she is carrying on her many and varied duties in a way that pleases everyone.

Smartly dressed, with white gloves, and gold braid on her uniform, page girls are seen at the front entrances of many West end hotels. "Our real bellhop has gone into a war factory," explained the manager of one hotel, recently. "His successor has been here but a few days, and I must say she is proving highly satisfactory. She is intelligent, and she is quick and polite. She is making herself extremely popular with our regular customers, and is doing quite well with 'tips.'"

The same story was told at other hotels where the girl "bellhop" has been introduced. The army of girl ticket collectors, lift girls and girl messengers grows daily. "I should not be surprised if we have to have girl telegraph boys," said a postmaster in the city. "We cannot get boys, and we are short-staffed now, because they are either enlisting or going into munition factories."

BALKS AT PIGEON INVASION

Bird Roosts on Minute Hand of Town Clock and Causes Mayor to Miss Train.

Poughkeepsie, N. Y.—The town clock having been put out of commission by pigeons which have chosen the belfry of the First Reformed church as their home, residents of Poughkeepsie, who for half a century have depended upon the big timepiece in the steeple, will either have to buy watches or guess at the time. The birds have built their nests in the works of the old clock and clogged up the machinery.

The other morning at twenty minutes to nine a big fat pigeon flew upon the "minute" hand and sat there for more than half an hour, causing Mayor Wilbur to miss his train to Rhinebeck. The helpless caretaker appealed to the chief of police and he referred the complaint to the city chamberlain. He in turn passed it on to the board of aldermen and that body has referred it to the public property committee of the board.

POTATOES IN HIS CASH BOX

Commission Man Out \$7,010 as Result of Game Worked by Confidence Men.

Little Rock, Ark.—Louis Repetti, sixty years old, an Italian, who has amassed a fortune in the United States in the commission business, has twelve small potatoes that cost him \$7,010.

According to stories Repetti told the police, he was out that sum as the result of the operations of another Italian named Ricci, for whom a warrant has been issued.

Ricci and Repetti deposited securities in boxes of similar appearance, but when Repetti opened his box he found it had been switched, and instead of his money being intact the box contained twelve potatoes. Ricci has not been apprehended.

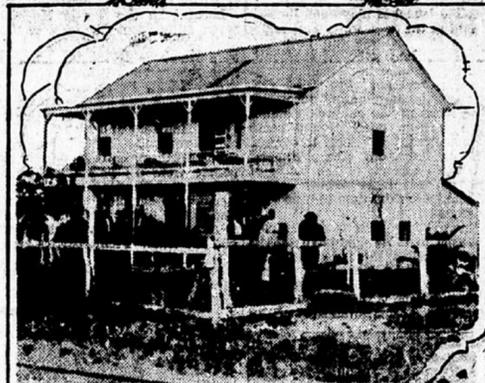

Fortune for Mail Carrier.
Kenosha, Wis.—A. Raymond Morehouse, a mail carrier, has just received word from San Leandro, Cal., that he was one of the two residuary heirs to the estate of the late Louis Morehouse, an old Kenosha man, who died a few weeks ago. It is said that the Kenosha man and his cousin, who resides at 524 1/2 Franklin, will divide \$200,000.

AMERICAN RANCHERS KILL MEXICAN BANDITS IN TEXAS BATTLE

Texas cowboys with dead Mexicans tied to their lassoos; house used as fort by ranchers.

In an encounter at Las Noeias, Texas, between American ranchers and Mexican bandits who outnumbered the former four to one, the Americans took refuge in the ranch house shown in the lower picture and held the Mexicans at bay until help arrived in sufficient numbers to drive the bandits off. After the battle, which lasted two hours, during which there was a steady fire on each side, five of the Mexican bandits were found dead on the battlefield. The upper photo shows the cowboys with some of the dead Mexicans tied to their lassoos, just before they hauled them to their burial place.

CROP REPORTS ARE PROMISING

Harvesting in Full Blast Over Entire State—Some Threshing Done.

Portal, N. D., Aug. 20.—Harvesting operations in this section of the state commenced in earnest today, when numerous farmers moved into their fields with binders this morning. A few fields of barley and oats were cut on Friday and Saturday of last week and the close of this week will see many fields of these grains in the shock, with wheat harvest to begin early next week.

A survey of crops in Burke county shows unparalleled prospects for one of the heaviest harvests ever known in this section and all crops from the Canadian boundary for 100 miles north indicate that southern Saskatchewan will also have a bumper yield. Fields of fine and bluestem wheat are particularly heavy, the majority of heads being filled with five and six rows of full sized kernels in place of short heads of four rows as in former years. Fields of marquis and durum varieties of wheat are rather thin and the straw from these crops will be short.

Another grain elevator is being placed in commission at this place and a large number of farmers have equipped themselves with loaders and will ship their own grain direct. No shortage of help has been experienced so far and laborers are arriving daily to be on hand when the big rush begins.

Threshers Steamed Up.
Devils Lake, N. D., Aug. 20.—The lake region is on the last lap of the harvest. Threshing rigs have been steamed up in many sections and early grain pounded out. Most of this was barley for feed. Harvesting will be practically completed by the end of the week unless present indications fail. The weather has been the best ever experienced. Just a half day's time has been lost on account of rain.

Ward Wheat Good.
Minot, N. D., Aug. 20.—Wheat harvest was practically inaugurated in this section of the state Monday. While there were a number of fields merely the patches on high land which ripened early. This morning the harvesters began sifting on practically every farm in Ward county and throughout the adjacent counties.

While the grain is ripening somewhat uneven, according to the character of the land, none of it is in such condition that it cannot be handled with ease.

There seems to be plenty of help for the present but when the crowding rush comes a few days later it is possible that more men will be needed to care for the grain. Wages are good and the class of men who are going out to the farms is considerably above the average of harvest help.

Estimates vary as to the probable yield of wheat in this part of the state, but 20 bushels is a conservative estimate for an average. Some competent judges have placed it as high as 25 bushels, while others more conservative are as low as 18. But striking an average of the number of estimates received a general average is 23 bushels, which is probably about correct. There are scores of fields in this section that will yield 35 bushels and all observers agree that the number of low producing fields is extremely small.

Most of the wheat will grade high. The berries are large, plump, and bright in color. The greater portion will grade No. 1 Northern.

The earlier crops, such as barley and oats, as well as rye, are being threshed and the yields are far above the average.

No rust has developed throughout the northwestern part of the state and the only danger that can befall the crop now is that of hail before the grain is in shock.

Forty Bushels Barley.
Sheldon, N. D., Aug. 20.—The first threshing of the 1915 crop was started when William Strick, living north of Sheldon, threshed out a piece of barley. The yield was not learned. James Sorenson threshed a field of oats on his farm near Lisbon, which yielded a little better than 40 bushels to the acre.

Will Pass Expectations.
Souris, N. D., Aug. 20.—Harvest is on in full blast and promises to be a good crop. There are spots that are very short, but the ears are exceptionally good. The general opinion seems to be that even the light spots will give a yield beyond expectation. In localities where the stand is good the yield will be very good, indeed.

Jud Reports some Rust.
Jud, N. D., Aug. 20.—Considerable oats and barley has been cut during the past week and some wheat. The warm weather during the past few days is ripening wheat very fast. Reports of damage by rust are again coming in and it appears that late grain may suffer some. There is also some damage reported due to a blight of some kind. It is reported from the experiment farm at Edgeley that their crops have suffered from this, but they have not yet worked it out to ascertain the nature or cause of it. Let us hope the damage from this source may be less than is anticipated.

Upper Mouse Prosperous.
Sherwood, N. D., Aug. 20.—All small grains in the upper Mouse river loop are in excellent condition, and barring unprecedented rain or hail storms, the yield at Sherwood will be one of the best in the history of the country.

Wheat, oats, barley, rye and flax promise big yields, and many fields of rye and barley are already in shock. Wheat is turning fast and harvest will be general by the last of next week.

STOCK POOLS OF OTHER DAYS

Financial Giants Involved in Questionable Transactions in 1922 Gave Entertaining Testimony.

Stock pools of the present day have nothing on the pools and corners of a generation ago in either magnitude or picturesqueness. Certainly there has been in recent years no such naive and entertaining testimony regarding such operations as that brought out by a state senate investigating committee in 1922, with Jay Gould, Rufus Hatch, a big speculator, and Henry Ward Beecher as the star attractions. They asked Jay Gould if he was familiar with corners and he told how his brokers started buying Chicago & Northwestern at about \$0 and bought more than there was. "I paid what I thought it was worth," he said. "It resulted in carrying the price up very high. I did not pay over \$0. The stock fell back after the corner to about \$0. I think it was due to part with some at about that price." Mr. Gould's matchless generosity, however, was not shared by Rufus Hatch, according to his testimony when asked if he was opposed to stock watering. "I am," he replied promptly, "unless I am in it." Henry Ward Beecher added to the entertainment of the investigation—he did not know why he had been called—by supposing that in a general way he understood the system of dealing in futures. "It is a part of my profession," he said, "to deal in futures." His dealings in stocks, however, were limited to two occasions. On the first occasion he bought at 400 and sold at 100. "I thought it a good stock to lay up," he observed, "but found it good to lay down."

Every body is looking for something and some one has it. Tribune want ads will find the one who owns it and you can do the rest.

TREASURER'S REPORT

For Glenview School District No. 16, County of Burleigh, State of North Dakota, for the year 1914-1915.

Receipts.
Cash on hand at beginning of school year, July 1, 1914, \$1864.78
