

The Bismarck Tribune. BISMARCK TRIBUNE COMPANY. Publication Office: 404 FOURTH ST., COR. BROADWAY. ESTABLISHED 1871. Weekly \$1.00. By mail \$4.00 per year. Single copies 10 cents.

WEDNESDAY, OCT. 20, 1915

WHERE THE TRIBUNE CAN BE BOUGHT. Fargo, N. D. Gartner Hotel. Grand Forks, N. D. Hotel Frederick.

LOCAL WEATHER BULLETIN. For the 24 hours ending at 7 p. m., October 19, 1915. Temperature at 7 a. m. 48. Temperature at 7 p. m. 48. Highest temperature 64. Lowest temperature 45. Precipitation None. Highest wind velocity 40-NW.

ORRIS W. ROBERTS, Section Director. EDISON DAY.

While a nation celebrates Edison Day, tomorrow, when Thomas A. Edison gave to the world the electric lamp, thirty-six years ago, it must not be forgotten that Edison is one of the greatest inventors the world ever knew.

ESCAPE OF INTERNED GERMANS. There is rather more of humor than of seriousness in the escape of six German officers from the interned Kronprinz Wilhelm, at Norfolk.

NEWS MOVIES WILL NOW BE POPULAR. Northwest Weekly in Connection With Tribune Will Be Innovation.

LEGAL ATTACK ON INCOME TAX. The United States income tax law is being attacked very seriously in the argument before the supreme court.

THE WEATHER. For North Dakota—General. 1st fair Wednesday and probably Thursday; no decided change in temperature.

Chronological History of World's Greatest Inventor

Tomorrow is the anniversary of the day on which Thomas A. Edison, the world's greatest inventor, gave to the world the first incandescent electric lamp.

Following is a brief chronological history of Thomas Edison: 1847—Born February 11, at Milan, O. 1854—Moved to Port Huron, Mich. 1857—Started chemical laboratory in cellar of his home.

1860—Became newsboy and "candy butcher" on trains of Grand Trunk railway, running between Port Huron and Detroit. 1862—Printed and published a newspaper, The Weekly Herald, on the train.

1863—First position as regular telegraph operator on Grand Trunk railway, at Stratford Junction, Canada. 1869—Went into partnership with Franklin L. Pope as electrical engineers.

1870—Received his first money for inventions, \$40,000. Opened manufacturing shop in Newark, where he made tickers, etc. 1871—Assisted Edison, the inventor of the typewriter, to make a successful working model.

1872—Moved on and completed many inventions, including the phonograph, automatic telegraph systems, duplex, quadruplex and multiplex telegraph systems; also paraffin paper, carbon rheostat, microtaster, etc.

1873—First half of year improving the phonograph. In summer went with astronomical party to Rawlins, Wyo., to test his microtaster during a total eclipse of the sun.

1874—Invented incandescent electric lamp. The invention was perfected October 21, 1879. "Edison Day," on which day the first lamp embodying the principles of the modern incandescent electric lamp was put in circuit and maintained its incandescence for over 40 hours.

HEAVY MEAT EATERS HAVE SLOW KIDNEYS

Eat less meat if you feel Backache or have bladder trouble—Take glass of Salts.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which excites the kidneys, they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick.

1900—Worked on improvements in the Edison primary battery. 1903—Made important inventions relating to phonograph cylinders. 1905—Introduced new model of dictating machine, which enabled the dictator to hear repetitions and make corrections.

1907—Introduced for first time the universal electric motor for operating dictating machines on all commercial lighting circuits, extending voice-writing in fully 95 per cent of territory in the world in which available current only was alternating.

1910—Worked on improved disc phonograph. This work resulted in the production of an instrument and records which produce vocal and instrumental music with absolute fidelity and sweetness.

1912—Introduced formally to the public the Kinetophone or talking motion picture, after spending much time in developing same during a number of years past. He foreshadowed the production of the combined device in 1887.

1914—Edison, being the largest individual citizen in the United States, was elected to the United States senate. He declined the honor, saying that he was too busy to accept it.

1914—On the night of December 8, Edison's great plant at West Orange, N. J., was the scene of a great conflagration. Early next morning gangs of men were at work clearing up the wreck.

1914—Edison, being the largest individual citizen in the United States, was elected to the United States senate. He declined the honor, saying that he was too busy to accept it.

Trace Spread of Disease To Impure Milk Supply

Few people realize the importance of pure milk to a community, and fewer still the amount of disease spread by impure milk.

Because of the length of time between infection and recognition of the disease, tuberculosis can never be traced directly to milk as an infecting agent. However, it has been shown conclusively that cows with tuberculosis do infect their milk with germs.

In summing up the work done in four American cities on the examination of milk for the tubercle bacilli we find that 551 samples of milk were tested and 46, or 8.3 per cent, were found to contain the organisms. The rate of positive findings in England is considerably higher, according to some authorities as high as 15 per cent.

The tubercle bacilli of bovine origin differ in certain respects from those of human origin. Investigators have been able to differentiate the types of the disease. Out of 426 cases studied by the New York board of health, 32 were of the bovine type.

Of all the milk-borne diseases typhoid fever is the most common. This is due to the fact that the bacilli may swarm in milk without altering its taste, odor or appearance. Since 1908, 317 epidemics of typhoid fever have been traced to infected milk supplies.

The milk generally becomes infected either from a person suffering from the disease or from a carrier person that carries the germs of the disease without succumbing to it himself. It also may become infected by the handling during transportation or by putting fresh milk into non-sterilized containers.

Let and a threshing machine flywheel literally pull his right arm off at the elbow. The boy was tightening a nut on the engine when the wrench slipped. Instead of losing consciousness the boy directed farm hands how to apply a tourniquet and then prepare a wagon to take him to the doctors.

You—Or No One Else cares to be bald. Yet that is what will happen if your hair does not stop falling out. Rexall Hair Tonic. In our opinion is the best hair tonic on the market. Sold only by us—50 cents. Lenhart Drug Co.

Transfer & storage. We have unequalled facilities for moving, storing and shipping household goods. Careful, experienced men; also retail ice and wood. Wachtel Transfer Comp. Phone 62 No. 202 Fifth St.

Capitol Notes

The new residence of F. O. Brewster, of the board of control, has been completed, his household goods have arrived and are being moved in.

The banking board held a session yesterday, at which time they recommended that a charter be issued to the Farmers' State Bank of Washburn, which is in Washburn county.

Attorney General Linde and Dr. Crewe, state veterinarian, are in McKenzie county this week, where they are connected with a lawsuit wherein the state is being sued for the killing of diseased cattle.

Quite a number of state officials are arranging their affairs in order to leave for Grand Forks, November 3, and during which time the State Education association will be in session in that city.

The October meeting of the State Board of Regents was the most important, perhaps, that has been held by the members, as the men who are to make the survey of the state educational institutions were selected.

Should convince the Greatest Skeptic in Bismarck. Because it's the evidence of a Bismarck citizen. Testimony easily investigated. The strongest endorsement of merit. The best proof. Read it: N. M. Danrot, carpenter, 511 Seventh St., Bismarck, says: "I confirm my former endorsement of Doan's Kidney Pills given some years ago. At that time, I told how Doan's Kidney Pills had cured me of pain in my back and other symptoms of kidney complaint. I can now add that I have been all right since using this remedy."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Danrot had. Foster-Milburn Co., Props., Buffalo, N. Y.—Adv.

APPRECIATION WEEK AND THE SCHOOLS

Schools Throughout the State to Help in Big Scheme.

"Appreciation Week" is to be recognized widely by the schools of the state. During the week from November 14th to 20th, special programs will be given in practically all the high schools, grade and country schools, as well as in the university and the colleges of the state.

The details of management for the educational feature of "Appreciation Week" are in the hands of the United States Bureau of Public Information, acting in co-operation with Supt. E. J. Taylor of Bismarck. An explanation of the purposes of "Booster Week" and the opportunities of the schools to serve North Dakota will be sent out from the Bureau of Public Information at the university.

The new residence of F. O. Brewster, of the board of control, has been completed, his household goods have arrived and are being moved in. Mr. Brewster's health is improving, after a long siege, and his friends hope he will improve when he gets located in his new home.

The banking board held a session yesterday, at which time they recommended that a charter be issued to the Farmers' State Bank of Washburn, which is in Washburn county. Governor Hanna left last evening for Miles City, Mont., where he has been invited by the Commercial club to deliver an address today to the business men and citizens of that city on "Community Building." The governor expects to return Thursday morning.

Quite a number of state officials are arranging their affairs in order to leave for Grand Forks, November 3, and during which time the State Education association will be in session in that city. Attorney General Linde and Dr. Crewe, state veterinarian, are in McKenzie county this week, where they are connected with a lawsuit wherein the state is being sued for the killing of diseased cattle.

The October meeting of the State Board of Regents was the most important, perhaps, that has been held by the members, as the men who are to make the survey of the state educational institutions were selected. These are Dr. Edwin B. Craighead of Missoula, Mont., Dr. Capen and Dr. Bowden of Washington, D. C. The two latter are loaned to the State Board of Regents for this purpose by U. S. Commissioner of Education Claxton. They are trained experts who have for years devoted their entire time to this technical work.

RUB RHEUMATISM FROM STIFF, ACHING JOINTS

Rub Sores on joints and muscles with a small trial bottle of old St. Jacobs Oil.

Get a small package of Hamburg Breast Tea, or as the German folks call it, "Hamburger Brust Tee," at any pharmacy. Take a tablespoonful of the tea, put a cup of boiling water upon it, pour through a sieve and drink a teaspoon full at any time during the day or before retiring.

Try it the next time you suffer from a cold or the grip. It is inexpensive and entirely vegetable, therefore safe and harmless.
