

LINES IN THE FACE Make Women Look Old

and they show the effect of unnatural sufferings—of headaches, back-aches, dizziness, hot flashes, pains in lower limbs, pains in groins, bearing-down sensations.

These symptoms indicate that Nature needs help. Overwork, wrong dressing, lack of exercise, and other causes have been too much for nature—and outside aid must be called upon to restore health and strength.

Dr. Pierce's Favorite Prescription

The Vegetable Remedy for Woman's Ills that relieves nervous exhaustion and irritability and removes other distressing symptoms due to disturbed conditions of the delicate feminine organism.

For over forty years it has been used with more than satisfaction by the young, middle-aged and the elderly—by wives, mothers and daughters. You will find it of great benefit. Sold by Medicine Dealers in liquid or tablet form, or send Dr. V. K. Pierce, Buffalo, N. Y., 50 one-cent stamps for trial box by mail.

DR. PIERCE'S PLEASANT PELLETS Relieve constipation, regulate the liver, and bowels. Easy to take as candy.

ODD WAYS OF KEEPING TIME

Lonely Australians Have Many Methods by Which They Compute the Passing of the Hours.

On the immense sheep ranches in Australia each of the boundary riders has a district to look after, in which he has to keep the wire fences in repair and see that the sheep come to no harm. It is a hard, lonely life, in which the rider rarely sees another human being. Many of the men have strange ways of keeping count of the days.

One rider, who had lived for thirty years in the back country, used two jam tins and seven pebbles. One tin was marked "This Week" and the other, "Last Week." On Sunday morning he was accustomed to take a pebble out of "Last Week" and drop it into "This Week." This operation he repeated every morning until "This Week" had used up the seven. They were then returned to "Last Week" one each day; and the old fellow knew when another week had passed.

Another rider, named Eagan, tried several plans to keep count of the days, but always failed. At last he hit on a novel and attractive method. He made a big damper—the name the Australians give to a cake of flour and water with a seasoning of salt—on Sunday and marked it into seven parts. Each section was a day's allowance, and the slices that remained told him the number of days that must pass before Sunday came again.

For several weeks this method never failed. Unfortunately, one Tuesday he fell in with a fellow rider who was very hungry. Eagan stinted himself, in order that the ravenous one might be satisfied with that day's section of the damper. But it was no use. The host saw the knife cut the boundary line and the hungry rider carve into the almanac. He could stand it no longer.

"Stop, now, stop!" he yelled, as he clutched the remains of the damper and glared at his visitor. "There," he continued, "you've eaten Tuesday and you've eaten Wednesday, and now you want to slice the best of the mornin' off Thursday! Not if I can stop it, sonny! I won't be knowing the day of the week!"—Youth's Companion.

Said the Critic,—"Give us TRACTION, without FRICTION!"

MAKING the "Silvertown" Cord Tire, taught us a few lessons in the manufacture of lighter, cooler, more flexible and enduring FABRIC Tires.

The "Silvertown" Tire, you know, gains its marvelous Speed (and the Coasting qualities that demonstrate its Speed) primarily through having only TWO layers of Cords, laid transversely.

Of course, these TWO layers bend more readily than Five, Six, or Seven Layers of Fabric do (or of Cord would). But, we found it necessary, in order to conserve that flexibility (in the Two-cord construction), to put a Rubber Tread over it which was equally flexible,—equally strong,—and elastic enough to act as a sort of spring between the Earth and the Tire-casing, when Brakes were thrown on at stopping, or clutch thrown in at starting.

So, we had to devise practically a new kind of Rubber, for this purpose, TWO YEARS AGO.

And this new kind of Rubber Compound now does for GOODRICH Tires a work paralleling that done by the wonderful Alloys of Steel and Bronze in modern Motor Car construction.

It multiplies Rubber Efficiency, for Tire purposes, while decreasing its Weight, and without increasing its Bulk, or its Cost to you.

AS we cannot yet supply half the demand for "Silvertown Cord Tires" (until enough manufacturing equipment can be constructed) we compromise with the Public by giving them, without additional charge, the highly efficient black Silvertown Rubber in all Goodrich FABRIC Tires for 1916.

This makes GOODRICH Fabric Tires the most Resilient and Responsive-to-Power,—the most Long-Lived and Lively, of all FABRIC Tires, at ANY price,—without increasing their relative price to you.

We call this new Silvertown Tread Compound by the name and brand of "Barefoot Rubber."

Because, it CLINGS to the pavement for the same sort of reason that your bare foot clings to a slippery floor, while being flexible, stretchy, springy, and tight.

TENACIOUS, resilient, enduring, this "Barefoot Rubber" you today get in all black-tread Goodrich Fabric Tires,—Goodrich Motor-Cycle Tires,—Goodrich Truck Tires,—Goodrich Bicycle Tires,—Goodrich Rubber Boots, Overshoes, Soles and Heels, and in none but GOODRICH products.

Test out a pair of these moderately priced black-tread FABRIC Tires and see what results from the miting of BRAINS with Rubber.

HOLDS STRENGTH IN RESERVE

Century Plant Conserves Energy to the Time When It Shall Bloom in Full Splendor.

For a mere plant, the century plant exhibits an unusual amount of good sense. Nature decreed that its blossoming process be fast and furious so the plant spends a lifetime storing up reserve strength for the day when it puts forth its flowers. Sometimes it spends fifteen years getting ready for its flower season, sometimes longer. That's why we've named it the century plant.

Before it is ready to blossom, the century plant is a dense cluster of rigid, thick leaves with a thorn on the tip of each leaf. It grows in Mexico and on the western desert. In Mexico it is extensively cultivated and is put to several uses.

An extract is made from the leaves and used for soap. When the plant is ready to blossom, the sap is taken from the stem and made into a drink, which the Mexicans call pulque. After the flower withers, the stem is cut into slices to form razor strops. Finally, the leaves produce fiber, which is made into thread and ropes.

Tricky.
A senator was talking about national preparedness.

"The man who would make political capital out of such an important question as preparedness," he said, "is as selfish and tricky as the chap in the station bar."

"A chap hustled into a station bar. He had only a minute or so to catch his train. But the bartender was busy, and the chap saw that he stood to lose out on being served.

"Two gentlemen, each with whisky and soda before him, were conversing pleasantly before the bar. Well, what does this chap do but reach over, grab one of the whiskies and toss it off.

"The owner started back.

"How dare you!" he spluttered. "The idea! Why, that wasn't your whisky!"

"Wasn't it?" said the chap. "Then I guess this one must be mine, eh?"

"And he tossed off the other gentleman's drink and dashed out and caught his train just as it was moving off."

T. Allen Fulford of Sioux City will play a prelude at the Mother's Day service in the Presbyterian church this morning.

HERE FROM HEBRON
Miss Bertha Varney who is employed in Hebron, has returned to the home of her parents, Mr. and Mrs. J. O. Varney in Second street, on account of illness. She was accompanied here by her sister, Miss Bessie, who went to Hebron for her.

VISITS CAPITAL CITY
J. S. Schlegel, Editor of the Mercer County Star, was a business visitor in the Capital City Friday and Saturday.
