In the Heart of the Oil Field

Is the Lucky Dime Oil Co's Land.

8 Chances for a Fortune
To One in Most Other Companies

In the
**Lucky Dime
Oil Co.**

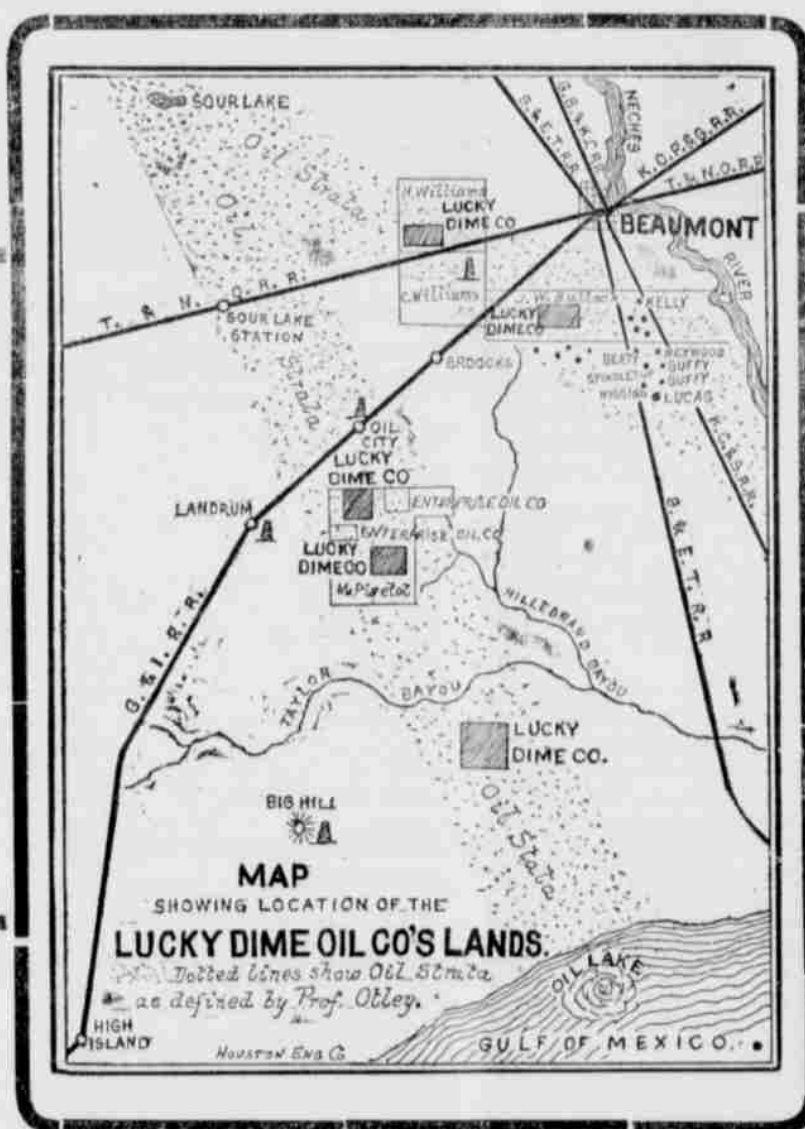

Of Galveston, Tex

— And it is Easily Proven. —

Our map shows first that we have five tracts of land that surround the Gushers, and that no matter which way the Oil Strata runs we are bound to catch it. Then according to Geologist Otley our lands are intersected by lines from the Lucas Gusher to the oil wells at Sour Lake, Sour Lake to the oil pool in the Gulf; Lucas to the mineral and gas wells at High Island and Big Hill.

This Company purposes buying well boring machinery and developing its lands thoroughly. Our agent has been to Aurora, Illinois, to make arrangements for the best well boring outfit made. All parts of the machinery will be in duplicate, and work will be done in a hurry.

**\$5,000 ONLY OF THIS STOCK
IS ALLOTTED TO ARDMORE AT
10 CENTS A SHARE.**

The land of the LUCKY DIME OIL COMPANY is owned in fee simple and it comprises tracts in the Bullock survey, close to the big gushers, and in the Williams survey. Both these tracts are in a direct line between Sour Lake and the big wells. We also own in fee simple tracts in the M. Pivotot survey on Pivotot Hill along side of a natural Sulphur Spring and adjoining the holdings of the Enterprise Oil Company, which Company expects to begin boring on May 15.

The least amount of shares to be sold shall be 50, or \$5.00 worth. If you wish to get in at this price you will have to act quickly. Wells are being bored on all the lands adjoining the Lucky Dime Company's holdings, and if only one of these strike oil your stock will be worth three times the price paid for it.

YOUR LUCKY DIME WILL THEN BE A MIGHTY DOLLAR

CAPITAL STOCK \$250,000; par value of shares, 10 cents; full paid non-assessable.
