INSURE -PERFECT **PRESERVES**

an there be anything more disappoint ag to a housekeeper than to find half or perhaps all of the preserves she labored so hard over spoiled? It is not uncommon for such a thing to happen, but it would be impossible if some harmless preserves were used and jar rubbers were perfect. As an extra precaution tops of jars should be dip-ped in melted paratine, too. Make sure of your preserves this year. We can supply you with

Salicylic Acid, Benzoate of Soda, Fruit Jar Rubber- Parafine, etc.,

the use of which will insure the preservation of all your fruits. The extra cost is so slight that you cannot afford to take chances.

We have just received a new lot of Jar Rubbers—fresh, elastic ones—that are sure to make jars tight—per dozen.
