INDIAN BATTLE TODAY

CELEBRATION IN HONOR OF DANIEL BOONE AT JAMESTOWN EXPOSITION.

Ardmoreite Special.

Norfolk, Va., Aug. 23.—Indian war-whoops, the gleam of tomahawks and the rattle and crack of musketry gave an air of realism to the battle with redskins fought today in the pine forests along the shore of Hampton Roads.

Hundreds of Kentuckians were here to take part in the celebration at Boone's fort, an almost duplicate of the pioneer post erected by the great frontiersman, Daniel Boone.

The historical event which was repeated in realistic form today occurred in 1775, when Elizabeth and Francis, daughters of Colonel Richard Callaway, and Jimima, daughter of Daniel Boone, were captured by Indians while riding in a canoe on the river.

Today's mock contest, the attacking party was composed of real Indians from the 101 Ranch show, while the fort's defenders, the captured young women and the rescuers were represented by leading people of Winchester, Ky.

INSANE TELEGRAPHER

CRAZED AS RESULT OF OPERATORS STRIKE—ONE VIOLENTLY INSANE.

New York, Aug. 22.—There was excitement in the main operating room of the Western Union Telegraph Company's building, 195 Broadway, when Harry Behnecken, an operator who refused to join the strikers, became violently insane and dashed through the busy room shrieking like a Comanche Indian.

Behnecken, who is 25 years old and lives in Brooklyn, shouted that the company had won the strike, and his remarks were all relevant to the present troubles. The wild-eyed man was caught, but it took four men and policeman William Roberts to hold him. It was forty-five minutes before business was restored to its normal condition.

Fort Dodge, Iowa, Aug. 22.—Crazed by reason of the telegraphers' strike, James Werbka, 24 years old, who had been three years in the employ of the Western Union, was taken in charge by the police today. He was unable to tell where his home is. It was told by the officers that he kept hitting off dots and dashes and an operator from the local offices was taken to his cell in the jail. This was the message that he kept sending into the air: "Thousands out of work, thousands out of work; they are paying the price."

It is believed he is from Omaha. Lots of men will never know what it is to experience brain fog.

Something About Comets.

The tail of the Daniel's comet is growing a little bit longer each night and by the middle of September should stretch at least twelve degrees from its head.

This comet is the first that many millions of people have seen. The year 1881 was the last year in which a comet that amounted to anything has appeared. During August and September of that year there were three beautiful comets, one in the north which struck the orbit of the earth head-on and appeared for two weeks as a vast globe of diaphanous mist, another in the south, and still a larger one in the western sky early in the morning. The tails of these comets were between twenty-eight and forty-two degrees long.

In the summer of 1911 those of us who are on earth will be pleased with the sight of one of the most immense comets which ever visited the solar system, Haley's comet. This celestial wanderer has re-appeared every seventy-five years since the dawn of time. At its last appearance in 1832 it was so bright as to be seen at 4 o'clock in the afternoon at its perihelion. This comet should be visible in August 1911, and it should approach the earth's orbit from a point near Regulus.

ELECTION DAY DRAWS NEAR

BOTH POLITICAL PARTIES STRAINING EVER NERVE TO WIN.

THE NEGRO PROBLEM

Is Giving the Republican Party Much Vexation—Negro Knows He Has Been Discriminated Against and a Bolt is Fegged.

Ardmoreite Special.

Guthrie, Ok., Aug. 23.—With the election less than a month off the two great parties are straining every tense muscle in the fight to control the untried machinery of the proposed state of Oklahoma.

The republicans are struggling with the negro problem. It is no longer denied the black cloud is gathering with rapidly increasing proportions. The negroes believe they have been double-crossed and refuse to be pacified. Republican leaders are wary, and conciliatory. They see in the declaration of two of the most prominent negro party workers—that the race feels it has been discriminated against since the Tulsa convention—a danger that may result in a bolt.

There has been no cessation in the activity of the democrats since their primaries. They are making every day count. So bitter has the gubernatorial fight with the Muskogean man, Haskell, opposing Frantz, the present territorial executive, grown that scarcely any mention is made of other candidates.

It is difficult for an outsider to appreciate the conditions of the initial contest for plums. The campaign has been acrimonious, unprecedentedly vindictive. The whirlwind centers around the gubernatorial duellists. Even the possibilities in the United States senate race has sunk into listlessness.

The final session of the Sunday School Convention was held yesterday and the association work was begun. The following officers were elected for the S. S. convention: Pres., G. W. Hall; Vice Pres., J. W. Perkins; Sec., Miss Daisy Burton; Cor. Sec., Miss Blanche Thompson; Treas., Mrs. Whitlow; Missionary, M. C. Lewis.

The morning's devotional exercises were led by Rev. M. T. Jackson, vice moderator. After a good service Rev. J. F. Kersh of Chickasha was introduced to preach the introductory sermon. He chose for his general theme "Instruct the people."

His sermon was one of instruction along the lines of encouraging race enterprises, as well as race integrity. Such sermons as was his are the kind that race needs to hear and having heard to follow. Altogether by his efforts he sustained the reputation he had made as one of the strongest Baptist ministers in the new state.

The afternoon session was given over to the discussion of our reaction to Dawes Academy. The discussion was engaged in by Revs. Herry Norwood, Kersh, Ransom, Prof. Senger, Proit and others.

The night's session was presided over by vice moderator Jackson. The welcome addresses were delivered by Messrs. Hawkins, Young, Dewitt, Dillard and Mrs. H. B. Matthews.

Rev. Westbrooks of Oklahoma City was introduced to preach the Doctrinal sermon which he did in capable and satisfactory manner. Much enthusiasm was manifested in the meeting, as was demonstrated by there being many more people than could be given seats.

labor and capital are mutual and our welfare depends on hearty co-operation.

"Now, therefore, I, Frank Frantz, governor of the territory of Oklahoma, by virtue of authority of law in me vested, do hereby appoint Monday, the second day of September, in the year of our Lord one thousand nine hundred and seven, as a public holiday to be known as Labor day.

"In witness whereof I have hereunto set my hand and caused the great seal of said territory to be affixed this 14th day of August, 1907. (Seal) "FRANK FRANTZ, Governor.

BOLL WORM AT WORK

R. L. TAYLOR'S CROP VIRTUALLY RUINED BY THE RAVAGES OF THE PEST.

The boll worm is beginning to get in its work in certain sections of the country and especially in the section of the country north of here. It is reported that that pest has almost completely destroyed several cotton crops already, and is playing havoc with the others. R. L. Taylor, a farmer who lives a few miles north of the city came into the Ardmore office with several samples of cotton that has been subject to the devastation of the boll worm, and which shows that unless some action is taken, or some remedy found the people in that section will be minus a cotton crop this year.

Mr. Taylor has 75 acres in cotton, and stated that all of his crop was affected the same as the sample that was brought to the office, if such is the case then the farmers in the same section that Mr. Taylor resides in are in bad shape so far as making a good cotton crop.

From what can be learned it seems as if the worm has been getting in its damage since the cool nights have begun and in those sections where the weed is protected by trees. In other sections where there is no forestry and where the entire field has been the object of the sun's rays, the crop is unaffected.
