

IN THE OIL FIELDS

Office: 6241 W. H. PECK Residence 2442

OIL MARKET QUOTATIONS.

Table with columns for oil types (Crude Oil, Kerosene, Gasoline) and prices per barrel.

To the Young Man

There is an unusually large number of young men just out of school in Tulsa at the present time, and while they find much that is to their liking in the town, and in the association with real oil men, they are puzzled to know how to step up the big things in the oil game as our being spread out for their inspection in the Convention of the National Petroleum Institute in Washington.

OIL AND GAS

Leases - Supplies - Production, Etc.

Owner Will Trade. Ten acres fee undrilled, no oil lease, Bartlesville land district, for light car of good make, no junk considered. See H. Valley, 462 Drexel building.-Advt.

Pumper Wanted. Thoroughly experienced pumper to handle settled production. Want man who has had between 20 and 25 years experience and able to produce. No other need apply. Address P. O. box 88, Tulsa, Okla.-Advt.

Wait drilling contract in proven shallow district; percentage basis; principals only. Means, Hotel Tulsa.-Advt.

One 40-horse power Klawns boiler, new one; 12x12 Ajax engine; one Moen generator; one swivel bit trench; 150 feet new Manila cable; two 10-inch bits dressed once; one tool box and small tools. Call Osage 973.-Advt.

Good string of Standard tools for sale cheap. Osage 5580.-Advt.

FOR SALE-Casing all sizes, new, used line pipe and tubing. We buy used casing, abandoned lines and wells. Goodman & Ringold, 325 Central Bank, Tulsa, Osage 9564, 418.-Advt.

For depletion and tax problems, accounting and systematizing, all Carl L. Rice, C. P. A., 517 Kennedy Bldg. Phone Osage 297.-Advt.

Casing supplies of any size made to order on short notice. We carry all sizes of casing in stock. Special prices furnished to regular customers. Let us figure with you on your next order. Phone Osage 2513 and L.D. 100, Feenberg Eye & Supply Co., 119 East First Street, Tulsa, Okla.-Advt.

I can furnish 5 5/8 inch, 17 lb casing, 8 inch-24 lb, also 10 inch-32 lb, per foot. This casing is sold in 5 ft. cars, McKeesport, Pa., conditions guaranteed good. Address Box 114, The World.-Advt.

Wanted-Drilling proposition on acreage close to production, or NW buy partially drilled acreage in the shallow fields, either in Kansas or Oklahoma. Have drilling machines ready to go to work at once. Accompany your reply with plan and state your proposition. Address Box 114, The World.-Advt.

Have several strings of casing to sell near Duncan, Okla. This casing was used in deep well, and is oil heavy casing. Will sell for 25 per cent below list for quick sale. Address P. O. Box 43.-Advt.

Good oil lease on large structure near Tulsa, Okla. NW quarter of section 23-22-12 east, NW quarter of section 23-24-10 east; and NE quarter of section 21-27-8 east. Fifty-acre basis. Drilling wells close. Osage Arrow Oil Company, Ponca City, Okla.-Advt.

Also the following line PIPE FOR SALE: 45,000 feet new National 6" at St. Louis; 24,000 feet new National 4" at West Tulsa; 13 miles 8", 29-lb. in line.

FOR SALE-Refinery at Devel, Oklahoma, 2,000 barrels daily capacity; 300,000 barrels storage capacity; 2,000 barrels burkurnett crude available.

Who do you think it is that makes the wind blow from the west when it blows from the west, and from the east when it blows from the east?

The young man, not knowing the answer, said "It is the man who controls the wind." "It is the man who controls the wind," said the astronomer. And that was enough and he went home and told his sister what had happened, and they all decided that the great man had.

The Institute is in fact giving me an opportunity to show how each and every one runs true to the fact it was stated in Wednesday's oil column, that the chief geologist could tell just how many barrels of oil were contained in the ground, but instead of giving us the number of barrels, he gave us the exact day in which the oil would be a thing of the past. It was doubtless equally silly when a great man at the head of the greatest oil company in the world told me who should have known better, as he was born and raised in the business, got up and said, "The world was about to monopolize the oil business of the globe."

How do they get that way? The fact is, it is all propaganda, pure and simple, as the following appeared to the World from Detroit, received yesterday seems indicative of the attitude of the oil industry manufacturers' judgment because of propaganda at Washington meeting of Petroleum Institute.

It doubtless has hurt the business of the past, that the Standard of New Jersey has been in filling stations in its territory, saying: "Use our cars and save gasoline." It has also hurt the manufacturer of gasoline in Oklahoma, who is looking for an outlet and who, mostly at the mercy of an exporting concern which by the way, is not only taking a large share of the output here but is taking it at what it actually is worth, not what it could be bought for on the market today.

To the young man looking around the example of the Export Oil Corporation in Tulsa, Oklahoma, for his earnest consideration.

Pot Quick Action

Secretary of the Interior, John Barton Payne, assisted by the Honorable Cato Sells, made short work of the different oil wells in filling whether or not the Osage restriction as to the amount of acreage, held by any one individual or corporation, has the chance as he will be looking for an outlet and who, mostly at the mercy of an exporting concern which by the way, is not only taking a large share of the output here but is taking it at what it actually is worth, not what it could be bought for on the market today.

From other sources it is learned, and it is not surprising as to be unbelievable, the honorable secretary declared that "a man's holdings just average three barrels or less per acre, to secure an increase in his holdings."

Geologists Form Active Association. Tulsa geologists held a very interesting session Wednesday night at the auditorium in city hall, and after an election of officers, some interesting papers were read.

Luther White, who is with the Oklahoma Central Oil company, had one upon "Sub-surface Sand Relations, in Southeastern Creek, Western Tulsa, and Southeastern Osage Counties." This subject is of such interest, that it should have wide publicity.

The question is being raised repeatedly as to whether the deeper sands found in the line can be produced by surface indications, and whether Mr. White held that it was necessary to have sub-surface data, before making a proper estimate as to the value of acreage in that vicinity.

Ed. Woodruff was elected president, James H. Gardner, vice-president, Richard Hughes, secretary and F. C. Greene, treasurer.

CASING FOR SALE. Have 12 1/2-inch, 10-inch, 8 1/2-inch, 6 1/2-inch, and 4 1/2-inch heavy casing near Marlow, Oklahoma. Will sell at 25 per cent under National list price, f. o. b. present location, for quick sale. Address: B. G. GOBLE, Box 58, Tulsa, Okla.

FOR SALE. Refinery at Devel, Oklahoma, 2,000 barrels daily capacity; 300,000 barrels storage capacity; 2,000 barrels burkurnett crude available.

Made Good Purchase

The Pennsylvania Oil & Gas Large Co. of Waco, Pa., who has been represented here by J. Roy Thompson, vice-president of the company, has purchased the James D. Ward holding, east of Collinsville and east of Osage with 21 wells, and 40 barrels per day production. There are 1,400 acres in the tract, and there is no doubt but that production of these wells will be increased by careful handling.

The new owners have started a test in the southeast corner of the northeast of 14-22-14, a machine being moved into the well, and it is estimated that a large tract of timber land near Rapidan, Va., has recently been acquired, and the new owners will be a strong addition to the business interest of Tulsa. They will be very welcome here.

Best Location Yet

PERCY, Okla., Nov. 18.—The Tulsa State oil company will begin drilling immediately in the Perry farm, two miles southwest of Perry on a location selected by their consulting geologist, M. J. Mann, together with Dr. J. B. Murphy of the University of Oklahoma. The exact location is northwest of north-west of northeast on 28-21-18.

The Carter well in the Polo field, located northwest of southwest of 22-22-20, has reached a depth of 2,539 feet, and the driller took a good showing of being a producer. The Brock well, east of southeast on 22-22-20, is down to 1,500 feet.
