

KERENSKY ENVOY DEFENDS ANTI-RED

Semenoff Not to Blame
for Conditions in
Siberia, He Says

ANOTHER DEFENDS HIM

Lieutenant Tells Senate
Committee He Thinks "Ata-
man" Was "Railroaded"

WASHINGTON, April 17.—Within a few hours after the state department had confirmed his right to the title of "Russian ambassador" today, Boris Hakhmetoff came to the defense of Gen. Gregory Semenov, now in a New York jail on civil charges while efforts are being made to hold him for the murder of American soldiers.

"General Semenov is not responsible for the death of American soldiers," Hakhmetoff told the International News Service. "In the chaotic conditions which prevailed in Siberia he could not prevent it."

"Ataman's" Passport All Right.

Semenoff entered this country on a passport issued by the American vice consul at Tien Tsin, China, acting under cable instructions from the state department. It was testified today before the senate labor committee by W. W. Hubbard, United States commissioner general of immigration.

Semenoff also possessed a passport issued by the British consul at Tien Tsin, when he was held up by the immigration authorities at Vancouver, B. C., prior to his admission to this country.

Semenoff's American passport was issued by H. Gilbert King, American vice consul at Tien Tsin, after the latter had been in direct communication by cable with the state department. Hubbard stated.

Semenoff was denounced as a "sowardly butcher and bandit," whose entry into this country was "harmful to American institutions," by John Thomas Taylor, vice chairman of the American Legion's legislative committee.

He would tell Davis, too.

Taylor demanded Semenov's deportation and asked that Secretary Hughes and Secretary Davis be summoned before the committee, "so that responsibility for Semenov's admission to the United States may be determined."

The first witness to come to Semenov's defense was Lieut. Robert L. Baggis of New York City, who said he came here to testify in behalf of the general when he thought that he was being "railroaded into jail."

"I thought he was getting a raw deal, as I had investigated the alleged confederation of property with which he was charged, and my investigation shows that he was innocent," Baggis said.

"Why was there resentment against the Americans?" Senator Borah asked.

"Morally helped 'Reds'."

"It was the general belief among Russians that the Americans had been sent here to help the 'white army,'" replied Baggis.

"The Russians felt that we were lending moral encouragement to the 'reds' when the Americans failed to take any active steps to help the whites. Some little resentment arose because of this and because I think that no declaration was ever made as to the purpose of our being there."

"Well, we're coming to that later," was the only comment Senator Borah would make today when informed of the state department's action. The Hakhmetoff matter, he indicated, will not be permitted to drop on account of Secretary Hughes' ruling.

Bakhmetoff came to this country in 1917 as the diplomatic envoy of the Kerensky government, which has been nonexistent now for five years.

Not Willing to Appear.

He appealed to the state department soon after Senator William Borah of Idaho, chairman of the senate committee on education and labor, issued a subpoena for his appearance before the committee to testify concerning his relations with General Semenov.

Bakhmetoff, it is understood, is not willing to appear before the committee, and as advised the state department.

today by Commissioner of Immigration Hubbard, stated that admission of the anti-Bolshevik leader to the United States was the only course the immigration authorities could have pursued unless he had been arbitrarily detained.

NEW YORK, April 17.—Police again today had to handle a crowd of more than 500 persons, mostly men, who congregated outside Ludlow street jail following circulation of the rumor that General Semenov would be released. Jail doors were heavily guarded and police were stationed even on the rooftops to prevent possible throwing of bombs and sniping.

From the crowd met Madame Semenov as she entered the jail to talk with her husband.

HAIL STORM RIDDLES TOWN

Rich Hill, Mo., Described as Resembling Village in War Zone.

RICH HILL, Mo., April 17.—This town today looked like a war zone village which had been under barrage fire. Hail stones as large as walnuts and pieces of ice from one to two and a half inches thick, three inches wide and five or six inches long, rained down on the town early today.

Practically every window on Ninth street, the main business street, was riddled. A Missouri Pacific railroad train had nearly every window broken. Many roofs were punctured by the force of the hail.

All windows in the residential section of the town facing the west were smashed.

Locomotive Shops Opened.

DENVER, Texas, April 17.—The Missouri, Kansas & Texas railroad locomotive shops here resumed operation today after a month's lay-off, about 200 men returning to work. All locomotive shops on the road did likewise. S. K. Tuff, superintendent of motive power, announced.

Report on Appropriation Bill.

WASHINGTON, April 17.—An appropriation bill carrying \$28,347,739.18 for expenses in the departments of state and justice, was reported favorably to the senate today by the senate appropriations committee. The senate added \$1,571,333 to the total of the bill as it passed the house.

Fifteen Minutes of Radio Each Day

LENORON NO. 25.
THE CONDENSER.

The condenser in its simplest form consists of two conducting surfaces separated by an insulator, known as a dielectric. When connected to a source of electric potential, the condenser possesses the valuable property of storing up energy in the form of an electrostatic field. In the closed circuit of the radio transmitter the condenser is alternately charged and discharged and the sudden release of energy across the spark gap during discharge sets up oscillations of high frequency. High voltage condensers differ essentially from low voltage condensers, in the rupture proof qualities of the dielectric when connected to a source of high potential.

Electrostatic Capacity.

The phenomenon of electrostatic capacity is a very important property of radio circuits and is a measure of the ability of the circuit to store up or hold energy in electrostatic form. The unit capacity is the FARAD, but this unit is so large that the MICROFARAD has been adopted as the practical unit. The microfarad is one-millionth part of a farad. When condensers, each having an equal capacity, are connected in parallel, the total capacity is the sum of the individual capacities. When connected in series, however, the total capacity is equal to the capacity of one condenser divided by the number of condensers in series. This relation applies only when each condenser has an equal value of capacity.

The Spark Gap.

The spark gap maintains the closed circuit of the radio transmitter in a state of rest during the charge of the condenser. On discharge of the condenser the spark gap provides a path for the high frequency oscillations and when the energy of these oscillations has been transferred to the open or radiating circuit, the spark gap brings the closed circuit again to a state of rest. Types of spark gaps in general use are the plain, non-synchronous,

synchronous and quenched gaps. It is very essential for the spark gap to quench the oscillations of the closed circuit with sufficient rapidity to prevent reaction between this circuit and the open radiating circuit.

The Oscillation Transformer.

The fundamental and important principle of the oscillation transformer is its ability, by means of magnetic induction, to transfer the energy of the oscillations in the closed circuit to the open circuit, where the energy is radiated in the form of electromagnetic waves. When the primary and secondary windings of the oscillation transformer are in close proximity, the coupling is said to be "tight." "Loose" coupling is obtained by a separation of the windings.

The Aerial.

The aerial or antenna serves the double purpose of radiating and receiving electromagnetic waves. Of the many types in more or less general use, the inverted "L" and "T" types hold a prominent place. When used for both transmission and the reception of electric waves, the aerial usually consists of two or more horizontal wires carefully insulated. For receiving purposes only, one wire may be used to advantage and the insulating qualities need not be as carefully maintained.

The Electric Wave.

The electromagnetic wave travels with the velocity of light, 186,000 miles or 300,000,000 meters per second. The length of a single wave may be obtained by dividing the velocity per second (300,000,000 meters) by the frequency of the oscillations as determined by dividing the velocity by the length of a single wave. An electromagnetic wave generated by a spark discharge has a decreasing amplitude. The rate of decrease in amplitude is limited by United States government regulations, in order to prevent interference with other radio stations.

Deputy Sheriffs Battle
Jap Whisky Smugglers

PORTLAND, Ore., April 17.—In a pitched battle between three members of the Japanese crew of the steamer Kalua Maru and three deputy sheriffs at St. Helena, Ore., today, Shimatani, engineer of the vessel, was shot and perhaps fatally wounded and a second Jap was seriously wounded, according to a report sent authorities here. The three Japanese are alleged to have been attempting to smuggle whisky ashore.

Administration Leaders Seeking to Smooth Over Spit Caused by Tariff

WASHINGTON, April 17.—Administration leaders were today seeking to cement the differences which have split the republican majority on the new tariff bill to be taken up Thursday.

It was their purpose to thresh out these differences at the majority conference called for tomorrow and at least work out a program of speedy action on the bill which will prevent it from being dragged through the summer.

Despite the uncertainty of the situation and a growing feeling on the republican side that the plan of Senator Lodge, of Massachusetts, and other republican "whips" to drive the measure through the senate by July or July, may encounter unforeseen obstacles, administration spokesmen declared that the bill must be passed at this season.

There was a pronounced division of opinion, however, among republican senators as to the wisdom of passing the bill before the November elections.

ARKANSAS FULL OF OPTIMISM

Bankers' Convention Full of Cheer, Say Towns Who Attend.

Optimism over the general business outlook was the thing that characterized the Arkansas state convention of bankers at Hot Springs, from which a group of Tulsa bankers have just returned, according to W. E. Downing, assistant cashier of the First National bank. Downing and J. R. Byrd, Jr., of the First National and Jake Easton and Harry Crooks of the Exchange National attended the Arkansas conference.

If Oklahoma considered itself flourishing about in the depths of depression a year or so ago, Arkansas was just that much deeper and it is for that reason that the general optimistic trend that was evident at every session of the bankers' meet was especially noteworthy. Money is much easier, credit is better and the crop outlook most encouraging throughout Arkansas, the visiting bankers said.

Virtually all large cities of the southwest, middle west and eastern states were represented by bankers at the Hot Springs conference.

Boys' Meeting at Lawton.

LAWTON.—Delegates from every city of southwestern Oklahoma will be in Lawton April 21-23 for the Southeastern Oklahoma Boys conference, to be held under the auspices of the Y. M. C. A. Preparations have been made to entertain over 200 delegates.

Indictment Must Precede.

WASHINGTON, April 17.—The supreme court of the United States today decided that no person could be imprisoned at hard labor without indictment and indictment for grand jury, because the punishment brought the crime under the category of infamous crimes.

Introducing Newly Arrived Lovely Wash Frocks in Charming Modes

- Linen, Swisses
- Cotton Eponges
- Gingham and Linen Combinations
- Ginghams

Here are first arrivals of those practical, good looking dresses that women look forward to at this time of year; wash frocks in new, attractive modes in the above materials, ginghams in smart checks and stripes, the lines being French or fine ramlie in white and colors. Dainty dotted Swisses and cotton sponges show delightful colorings.

Ginghams.....5.00 to 19.95
Swisses.....15.00 to 30.50
Linen.....10.00 to 25.00
Cotton Eponges.....15.00

New Tub Blouses

Pretty French voiles, sheer linen dainties—dainty, serviceable blouses with Peter Pan and roll collars, V-necks and showing laces of fillet. Irish or val; many trimmed with gingham or linen. Sizes 34 to 54.

—2.95 to 15.00

New Sports Coats, Sleeveless

Sports coats for all around sports wear, motoring or whenever you may choose, in sleeveless or sports coat styles in velveteens, flannels and jerseys, showing flat tuxedo collars or one and two-button effects, patch or set-in pockets and broad or button trimmings. A good selection offers satisfactory choice at moderate outlay.

—6.95 to 25.00

Women's Wear—Third Floor

Small Women, Misses' and Juniors' New Skirts

Plain gathered, full pleated and box-pleated models in fancy baronette satins, flannels and fine serges. Shown in tan-and-blue, gray-and-blue, navy-and-tan, and white-and-black combinations and all white.

They are all of good quality in the newest styles for spring and summer and shown in sizes 12 to 18 for small women, misses and juniors.

—Priced 6.95 to 15.50

Misses' Shop—Fourth Floor

Here Are Widely Favored Silks and Wash Fabrics

Migel Crepes, Special

A wonderful line of Migel Crepes, Golf Crepe and Mountain Crepe Satin, in fine, heavy weight quality for new spring cape suits, capes and wraps, with rough, rugged surface that insures good wear and satisfaction to the last detail; 40 inches wide; 40-inch. Yard, very special 3.95

Choice Canton Crepe

Good, heavy weight Canton Crepe, away above the usual quality and perfectly finished; in navy, brown, black and most of the season's latest colorings; 40-inch. Fine value at the yard 4.50

Fine Fancy Skirtings, Special

Choice fancy skirtings of exceptional beauty for sports wear, with plain colors to match for making unusually effective capes and suits; among the most desirable and flatter to the last detail; 40 inches wide. Very special, 5.50 and 4.95

Super Canton Crepe

Superior, extra fine quality Super Canton Crepe, practical for fine costumes, capes and blouses; in black, navy, brown and all the latest colorings; 40-inch. Fine value at the yard 4.50

Attractive Colored Wash Materials

Non-Crush Linen

Splendid, practical, durable, imported colored linen of fine thread and closely woven; for dresses and neckwear; fast, washable colors; 36-inch; wide variety. The yard 1.00

Colored Beach Cloth

A very good grade of this meterized fabric, finely, closely woven and in general use for dresses and children's wear; 36-inch; all the new colorings. Yard 50c

Silk-Striped Tissues

An extensive showing of these dainty washable tissues for skirts; plaid color combinations with silk stripes; 36-inch; excellent quality. The yard 75c

Special Sale Today Only April 18th On Meats

We desire that every man, woman and child in Tulsa see our wonderful store and be convinced of the quality of our goods and the low prices we are making, when quality is considered. Therefore, we are making the following special inducements on meat today:

Butter—"Good Goods" quality:

Regular price 30c—Sale price today.....36c

Fancy Sliced Bacon in 1-lb. cartons:

Regular price 30c—Sale price today.....37c

Large Regular Ham:

Regular price 30c—Sale price today.....33c

Fancy Ham—Sliced Center Cuts:

Regular price 58c—Sale price today.....56c

Wiener:

Regular price 20c—Sale price today.....14c

Bologna:

Regular price 25c—Sale price today.....16c

Puritan Sausage:

Regular price, per box, 30c—Sale price today.....23c

Good Boiling Beef:

Regular price 12½c—Sale price today.....9c

Chuck Steak:

Regular price 18c—Sale price today.....14c

Beef Roast, plain:

Regular price 18c—Sale price today.....16c

Round Steak:

Regular price 30c—Sale price today.....26c

Compound:

Regular price 15c—Sale price today.....12c

Pure Lard:

Regular price 16c—Sale price today.....13c

Ham Ends, for seasoning:

Regular price 15c—Sale price today.....12c

Soup Bones:

Regular price 8c—Sale price today.....4c

Increases the action of the intestines

Hundreds of men and women have already found freedom from laxatives by eating Fleischmann's fresh yeast.

Doctors are now agreed that proper elimination of waste matter should be brought about by food. One doctor comes right out and states plainly that the indigestible waste of cathartics is one of the causes of constipation.

Physicians all over the country are recommending Fleischmann's fresh yeast because it is a fresh food, rich in those elements which keep the intestines healthy. In one series of tests cases, normal functions were restored in from 3 days to 3 weeks.

Try it out for yourself. Begin today by adding 3 or 4 cakes of Fleischmann's Yeast to your everyday diet. Keep it up and see how normally and regularly your intestines act. Be sure it's Fleischmann's Yeast—the familiar tin-foil package with the yellow label. Place a standing order with your grocer.
