**21 AUTO RACES ARE ON SCHEDULE
FOR THE BIG MONTANA STATE FAIR**

There will be twenty-one automobile races at the Montana State Fair in Helena, Sept. 20 to 25, in which none but the world's most famous drivers will take part. Already Louis A. Disbrow, the holder of twelve world's records, has entered for the State Fair races, as have also John Raimey, the light car track champion, and George Clark, known as "The Texas Wild Man."

The races will be run under the sanction of the International Motor Contest Association and will be for

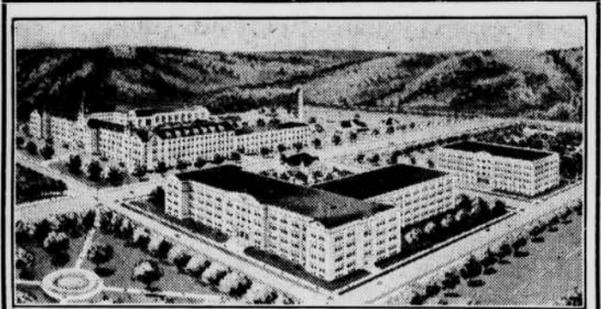

varying distances. It is probable that the final event will be a fifty-mile race. The record for that distance is now held by Disbrow, who holds also the record of one mile in 46 1/2 seconds, and the records for the two, three, four, five, ten and fifty-mile events, all on dirt tracks.

Because of the fact that the Montana State Fair track is noted as one of the fastest in the United States Disbrow and other cracks are anxious to race there, hoping to lower several of the existing world's records.

The Swordfish.
So powerful is the jaw of the swordfish, from which the sword projects, that it has been known, in attacking vessels, to pierce through oak timbers to the depth of ten inches.

The Cossacks.
No matter how old a Cossack he belongs to the reserve forces of the "national defense" in Russia and, if required, accompanies his sons and grandsons to battle.

An Inscrutable Mood.
"I want to ask your consent to my marriage with your daughter," said the formal youth.
"Young man," replied Mr. Cumrox, "don't you bother me with any more such talk. If you and Gwendolin got married it's her and her mother's doings, and I don't want to be brought into it. I'm tired of being held responsible for every kind of trouble that comes up in this family."—Washington Star.

PRIZES FOR HOGS

State Fair Offers \$2,400 in Purses for 1915.

There is a great future in store for Montana through the medium of the great American hog. At different times during the past few years it has been shipments of Montana swine that have sold for record prices in the stockyards of Chicago, Omaha and St. Joe, as well as at the Pacific coast packing centers, to which many are sent. Montana is fast establishing a home market for hogs, and with this encouragement the farmers of the state are each year devoting more and more attention to swine breeding. At the Montana State Fair in Helena last fall there was the greatest display of pure bred swine ever gathered in the Northwest. The Poland China Futurity alone was one of the largest shows of its kind ever held in the United States. The accompanying picture shows two of the 1914 prize winners of the swine pens. There were 422 hogs shown last fall. A total of \$2,400 in cash and special premiums is offered in the swine department of the fair this year. It will be held Sept. 20 to 25.

FIGHTING INSOMNIA.

Some Advice About How to Woo "Nature's Sweet Restorer."

In fighting sleeplessness I have found nothing so helpful as a simple procedure based on the conditions which recent psychological experiment has proved to be fundamental to sleep. These are:

Mental and muscular relaxation, limitation of voluntary movement and monotony of sensation.

To obtain these the next time you find yourself wakeful select on the wall of your room some ornament or spot which, by reason of a ray of light from the moon or street lamp, seems to stand out clearly from its surroundings. Having selected this spot, assume a comfortable position in bed, taking care that you lie in such a way that you can see the spot on the wall without straining any part of your body.

Next, remaining perfectly motionless and thinking of nothing but the spot on the wall, gaze at it through half closed lids in such a way that it seems remote and indistinct.

Be sure not to try to get a full view of it. That would mean tension, not relaxation, and would defeat your purpose. Your gaze at the spot, while steady, must be without any straining of the attention.

Soon, if you have continued to lie perfectly quiet and to think of nothing but the spot on the wall, you will find your eyelids grow heavy and close completely. Open them half way, as before, and resume the process of gazing.

They will again grow heavy and close, when you must, if you can, open them once more. Before long you will find it impossible to open them, for you will be sound asleep.

Even if your room be in total darkness you can still make use of this sleep bringing method by calling up before your mind's eye some imaginary object and gazing at it between half closed lids exactly as though it were really before you. Remember, however, that you must lie perfectly still, moving neither your hands nor your legs.

Try this device the next time you are troubled by wakefulness. From personal experience I am satisfied that, if you follow it faithfully in its details, you will find that it works like a charm.—H. Addington Bruce in Kansas City Times.

The Fighting Parson.

When the great-grandfather of the Duke of Norfolk was engaged in any of his electioneering contests he was always attended by his chaplain, an athletic man, one who had made such good use of his hands on several occasions that he acquired the name of "the fighting parson." Mr. Dauncey, an eminent counsel, having once to examine him as a witness during a trial, asked whether he was not the gentleman called "the fighting parson." "I believe I am, sir," the divine replied, "but if you require any more positive proof and will do me the favor to step out of court I will give it to you under my own hand." No further evidence was taken.

A GENIAL SMILE.

Who can tell the value of a genial smile? It costs the giver nothing, but is beyond price to the cringing and relenting, the sad and cheerless, the lost and forsaken. It disarms malice, subdues temper, turns hatred into love and paves the darkest paths with sunlight.

PANAMA CANAL OUTDOG.

Miners of West Virginia Do Bigger Job of Excavating.

Do you know that the coal miners of West Virginia have actually outdug the excavators of the Panama canal? The big canal has been advertised in a hundred ways, says the Coal Age. Not a word has been said about the even more wonderful feat of the miners. That's why you don't know that in the eleven years while the much heralded work at the Panama canal was producing 295,323,000 cubic yards of earth—and all of the excavating was being done on the surface—the coal miners of West Virginia were getting out of the bowels of the earth 542,940,446 cubic yards. Think of it!

When the engineers of the Panama canal in 1903 began their work they made a careful survey and found that approximately 195,323,000 cubic yards of excavation were necessary. This was regarded as a stupendous undertaking and was commonly spoken of as the largest excavation job the world has ever seen. Laborers were imported to the canal zone and column after column was written showing how marvelously these laborers were "making the dirt fly" under the direction of the most expert engineers the world has ever seen.

But the 195,323,000 cubic yards, the original estimate, were not all that the Panama canal laborers were to dig after they had started. On account of the slides in Culebra cut another 100,000,000 cubic yards were to be added to their work. This made 295,323,000 cubic yards, which were dug in eleven years.

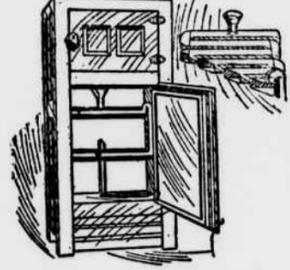

Under conditions far more difficult the coal miners of West Virginia did an amount of excavating in the same eleven years that made the digging incident at the Panama canal look like child's play. The work of these West Virginia miners has never been heralded to the world. The general public has paid little attention.

But the fact remains that the men who work underground in the mines of West Virginia have done a vastly bigger job in the digging line than the men who work in the open on the Panama canal.

AUTOMATIC ICE SAVER.

Cold Radiator System Adds to Efficiency of Refrigerators.

A device made of rectangular tubes in the form of shelves adapted to the interior of a refrigerator has been invented. These tube shelves catch and circulate the water dropping from the melting ice, always remaining full of water, and by gravity circulating the

ATTACHMENT FOR REFRIGERATORS.

water to the overflow. The increased cold surface and heat absorption afforded by two gallons or more of ice cold water is stated to add materially to the value of the refrigerator, cooling the food much more quickly and maintaining a reduced temperature in the food compartment. The device may be installed in any refrigerator, old or new.

Use of Varnish Pure.

Every can of varnish should stand upon the reputation which its maker has established for it. In many cases this varnish represents the lifework of one man or a group of men. You cannot afford to attempt to improve upon this concentrated essence of thought and skill and mechanical attainment. In other words, do not doctor the varnish. Rather by the most skillful methods in preparing for and applying it seek to develop and maintain the best possible results. This is the day of fine varnishes. In the development of which the varnish maker has done his part. Do your part equally well by using it as it comes from the factory.—Blacksmith and Wheelwright.

Types of Feet.

Among the various races of men, three types of feet occur. Certain pure races have one type of toe which is characteristic of each race. Thus, the Zulus, the Basques and probably most pure Celts have the even toed foot, while the Papuans, the Boschnen and a number of African tribes, as well as both ancient and modern Egyptians, have the arch toed foot. Many European nations, however, have a mixture of the three types. But it is certain that among the English, and probably among the Germans, French and Greeks, the even toed foot is the commonest.—Strand Magazine.

THE GOOD JUDGE'S CLIENT IS VERY MUCH ALIVE

WHAT'S THE MATTER WHO'S DEAD

NOBODY'S DEAD, BUT I WANT ANOTHER CHEW OF THAT REAL TOBACCO

GET the taste of the richest tobacco grown—the Real Tobacco Chew. It is the chew that you hear men boosting to their friends.

You'll be glad, too, that you've found it—and to pass the word along to men that you know.

A little chew of pure, rich, mellow tobacco—seasoned and sweetened just enough—cuts out so much of the grinding and spitting.

THE REAL TOBACCO CHEW IS NOW CUT TWO WAYS!! W-B CUT IS LONG SHRED. RIGHT-CUT IS SHORT SHRED.

Take less than one-quarter the old size chew. It will be more satisfying than a mouthful of ordinary tobacco. Just take a nibble of it until you find the strength chew that suits you, then see how easily and evenly the real tobacco taste comes, how it satisfies, how much less you have to spit, how few chews you take to be tobacco satisfied. That's why it is *The Real Tobacco Chew*. That's why it costs less in the end. The taste of pure, rich tobacco does not need to be covered up. An excess of licorice and sweetening makes you spit too much.

One small chew takes the place of two big chews of the old kind.

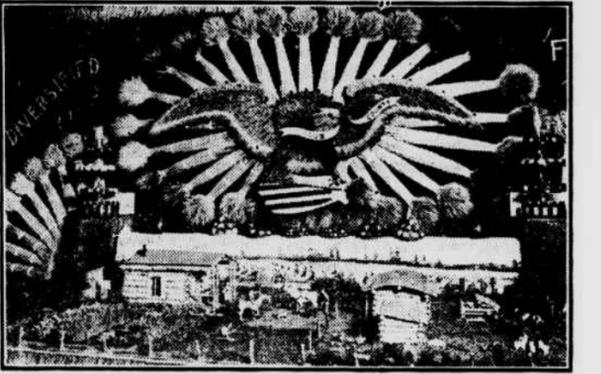

Notice how the salt brings out the rich tobacco taste.

RIVALRY BETWEEN COUNTIES OF STATE

The competition between county collective exhibits at the Montana State Fair at Helena has come to be one of the big features of the exposition. This year the management offers in that department cash prizes which amount to \$2,275, more than is hung up for a similar purpose by any other fair or exposition in the United States. The management has found that the money thus offered is well invested, for it brings out the greatest line of agricultural exhibits that are to be found anywhere in the country.

The superintendent of the county collective department of the Fair this year is Pat Carney of Waterloo, one of the directors of the Fair. He succeeds Frank A. Hazelbaker, who is absent from the state in charge of Montana's prize winning exhibit at the San Francisco exposition.

The county collective competition has developed specialists in almost every county in the state in the matter of collecting and arranging winning exhibits.

Fergus county won first prize among the county collective exhibits in 1914, but there are forty other counties in the state which assert that Fergus will have to go some to get it again this year. The State Fair will be from Sept. 20 to 25.

Man and Horse. The working power of an able-bodied man is just about one-tenth that of a horse.

Her Luck. "She's very homely, but doesn't seem to realize it." "Hasn't she any women friends?"

Get the principle right; the rest is a mere matter of detail. —NAPOLEON.

UNLESS there is a definite system—a set purpose in what you do, you're getting nowhere.

THE PRINCIPLE BEHIND AFFLUENCE

is just a matter of stability and purpose. Few of all our millions of citizens have it—yet when it is present, you'll find men and women who are making something of their lives.

STABILITY in your money affairs conserves your income. It builds strong character, and paves the way to economy. Economy is saving.
