

# Will Capture Villa

**J**UST a matter of time we will capture Villa--and it is just a matter of time until you will discover that you can capture a better deal with us by getting lumber and material dry from our big dry sheds--our prices are no higher--but you get better goods and clean and dry, right from the sheds. Come in

## Piper-Howe Lumber Company

A. E. BLYCKER, Manager  
Glasgow, Montana

Mary Pickford in "The Foundling" at the Orpheum, Sunday, June 11th. Matinee and Night.

### Film Flickers

Sense and Non-Sense About the Plays and Players

"The Birth of a Nation" is to have a worthy successor in the big ten part picture recently produced by Thos. Ince, entitled "Civilization."

In referring to Theda Bara, the Fox Film star soon to be seen here in "Sin", a press agent in one of his articles called her the "Satanic Sorceress of the Silent Stage."

Bobby Connelly, that great child actor, formerly with the Vitagraph company is to be featured in a series of one reel pictures produced by the Tefft Johnson Film Co.

Wm. S. Hart who will be remembered for his excellent work in the Paramount picture "The Bargain" will be seen again soon in a Triangle production entitled "Hell's Hinges."

The World Film Corp. will begin a Scenario Contest in the Saturday Evening Post, of June 3rd, in which \$5,000.00 in prizes will be given away. Wm. Brady of the World Film Corp. will be the sole judge. Some job.

How is this for censorship? The Shaftsbury Avenue Tribunal of London England recently refused to allow the showing of "The Life of Christ" without even viewing the production.

Now we are to have "pictorial grand opera." Victor Herbert, the celebrated composer has been at work for the past eight months on the musical score of "The Fall of a Nation". The Libretto is by Thomas Dixon. It will have its first showing in New York some time next month.

De Wolf Hopper, the celebrated star of the legitimate stage is to be seen here soon in a film version of "Don Quixote." Mr. Hopper has been starring in pictures for the Triangle Co. for some time now.

The Essanay Company have won their fight with Charlie Chaplin. The New York Supreme court holds that their "Burlesque on Carmen" is the sole property of the Essanay Company, and that they can rightfully show this picture.

Helen Gibson in making an installment of "The Hazards of Helen" series recently jumped from an aeroplane traveling at the rate of forty five miles an hour to the top of a moving train. And yet some young ladies we know of would like to break into pictures.

Sidney Drew, the well known comedian, formerly with the Vitagraph company, will be seen again soon on the local screen in a series of one reel comedies produced by the Metro company. Manager Bishell of the Orpheum recently had the opportunity of seeing these comedies and immediately signed them up for his show house. They will appear in the near future.

The film exchanges of Chicago have had to rely on autos to get films from the exchanges to the exhibitors the past couple of weeks caused by a strike of the express drivers. Exhibitors in the country towns around Chicago, who do their own booking have suffered the most. Some of them come into the city every day checking a trunk each way in which they carry their films.

In looking over the advance bookings of Paramount Pictures in Glasgow for the month of June we find one

of the strongest line ups, in point of stars, yet put out by that well known company. Starting off with Pauline Frederick we next have Geraldine Farrar, then Mary Pickford, Constance Collier, Marguerite Clarke, Cleo Ridgley, Hazel Dawn, Blanche Sweet, Dustin Farnum and then Pauline Frederick once more.

The Universal Film Co. have followed the lead of some of the smaller studios and will close Universal City to the public. This has always been considered one of their biggest advertising stunts, the showing of visitors around Universal City, in fact so much so that the railroads running into Los Angeles advertise it, but the vast number of visitors interferes with the studio efficiency to such an extent that they have deemed it wise to close the city.

Those who braved the wind and rain, and there were a great many, to see the first showing of Triangle Plays at the Orpheum last Monday were well repaid for their pains. Many pronounced it the best ever seen at that play house. Dorothy Gish supported by Owen Moore were more than pleasing in the feature production, and "Ambrose" with his many fun makers in the Keystone comedy produced one of the best comedies seen in a long time. Triangle Plays will be shown every Monday night in the future, and bid fair to become one of the strongest of the week.

We note with pleasure the appearance once more of Mary Pickford at the local play house. "Little Mary" will be seen this time in "The Foundling" said to be one of the best things she has appeared in in a long time. As "The Foundling" Miss Pickford is presented as a cast-away child, spurned by her father, an impoverished artist, because its birth had cost the life of its mother. Molly O. the name given it at the Orphanage becomes a drudge and a slave. Through a series of dramatic vicissitudes Molly O's path crosses that of her father, and through the instrumentality of fate and a young reporter, who has fallen in love with Molly O, she is restored to the waiting arms of her father.

#### CROP CONDITIONS GOOD

Farm conditions generally over the state have improved during the past two weeks and prospects for good crops in every section are bright, according to the semi-monthly crop report of the Banking Corporation of Montana. The report follows:

"Agricultural conditions in general have improved materially since the issuance of our last report. The period of cold weather which was accompanied by high winds and a noticeable lack of rainfall has been followed by a spell of rainy and warm weather so that the outlook in practically every section of the state is bright. The period of scant moisture conditions occurring during the first part of May would have resulted in some damage if the frost of the past winter had not extended to a considerable depth, thus giving up a certain amount of moisture to the soil, making it possible to do seeding and plowing in sections of the state where it would otherwise have been impossible. Reports from all over the state indicate that the rainy spell of the last week has been very general and that there has been an acceptable rise in the temperature.

With the exception of flax, seeding is practically finished, garden crops are all in and the winter wheat that has not previously been damaged, is making a very good start. Our estimate of 25 per cent winter wheat loss, mentioned in the last report, has been corroborated by a recent government report, giving the same figure. In this report the possible crop of winter wheat is estimated at 11,155,000 bushels as against a 1915 crop of 18,225,000 bushels. On the other hand, an increase in the production of spring wheat is anticipated so that Montana's wheat crop will probably be about the same same as a year ago.

Another after effect of the severe winter is found in the comparatively small amount of hay left over after the heavy winter feeding. There is now on hand about 140,000 tons, or 100,000 tons less than usual, with the result that in most places hay is now worth about \$2 a ton more than the seasonable figure.

The outlook for a fruit crop has not improved. A large number of the apple and cherry buds that survived the winter were damaged by the severe frosts running from May 10 to 15. Garden truck in many places also suffered to some extent from these frosts. From the present outlook it is not reasonable to expect that Montana's fruit crop will be as much as 50 per cent of last year's crop.

Reports from Billings indicate that sugar beets are all in, and that the acreage in this vicinity will be about the same as last year. It is expected, however, that in other parts of the state there will be an increase in the area of sugar beets.

The condition of Montana stock at the present time is about the same as at this time a year ago. The situation, in view of the severe winter, is agreeable to all stock raisers. The only complaint to be heard this spring is made on account of the fact that range grass, like everything else, is two weeks late. Sheep men have been put to some inconvenience and have had difficulties on account of the condition of the range, but lambing in practically all parts of the state has been very satisfactory. Stock prices are remaining at a high figure. There is an additional rise in the price of hogs, and there are no indications that livestock prices may drop to any extent within the immediate future.

On the whole, agricultural Montana is in a very good condition and there is a general feeling of optimism prevailing among the farmers and country merchants, and the possibilities for a good season lying ahead are indeed encouraging."

An exchange says to dissolve twenty pounds of common salt and ten pounds of nitrate of amonia in seven gallons of water. Pour this into quart bottles of thin glass and you have grenades at hand in case of need. The bottles should be tightly corked to prevent evaporation, and when there is a fire they must be thrown in near the flames so as to break and thus liberate the gas contained, to effect the desired result. At least two dozen of these bottles should be kept on hand.

The largest new disease is called "angina" of effort."
