

TORPEDO BOAT FLOTILLA DID DANGEROUS WORK

Detailed Story of Naval Battle Sent to Mikado by Admiral Togo Is Interesting.

Tokio, June 28, 6 p. m.—(Delayed in transmission.)—Admiral Togo's detailed report of his effective attack on Port Arthur last Thursday night reached Tokio today. The report confirms the reported destruction of a Russian battleship of the Peresviet type, the disabling of a battleship of the Sevastopol class and a protected cruiser resembling the Diana and the injuring of a torpedo destroyer but throws no light on the Russian plan. The entire Russian fleet steamed out to sea in line of battle. Suddenly when within 14,000 meters from the Japanese fleet the Russian fleet refused battle and steamed back to an anchorage outside the harbor where during the night the Japanese destroyers and torpedo boats made eight desperate attacks upon it. The Russian vessels re-entered the harbor on Friday, since which time it has failed to reappear.

In his report Admiral Togo says: The exit of the Russian fleet from Port Arthur harbor began early Thursday. The battleships Peresviet, Poltava, Sevastopol, the armored cruiser Bayan, the protected cruisers Palada, Diana, Askold and Novik came first, a steamer leading them clearing mines.

A warning flashed by wireless telegraphy by the Japanese patrol, brought up Admiral Togo's fleet at full speed to a series of prearranged stations.

Three flotillas of Japanese destroyers and torpedo boats steamed close to the harbor entrance and watched the Russian vessels. At 11 o'clock the Russian battleships Czarvitch, Retvitsian and Pobieda joined the other Russian ships outside the harbor. Several steamers and boats were engaged in clearing and exploding mines in order to make a passage seaward.

Captain Asia, commanding the Japanese torpedo flotilla, attacked the vessels engaged in clearing out the mines and hampered the work.

At 5 o'clock seven Russian destroyers appeared and the Japanese vigorously attacked them. One of the Russian destroyers which was hit and set on fire retreated to the harbor burning. The Novik attacked the Japanese who scurried away.

The vessels engaged in clearing the harbor finally made a passage and the Novik led the Russian fleet seaward. In the meantime, Admiral Togo concealed the position of his ships and at 4 o'clock sent the third squadron out into the vision of the Russians with the object of drawing them seaward. The Russian fleet stood south-eastward and then southward. During this time Admiral Togo concealed his squadron south of Gregan rock. As the Russians approached Admiral Togo assembled his fleet and prepared to attack. At 6:15 p. m., the Russians were in plain sight eight miles of Gungan rock. The Czarvitch led and nine others followed in a single line. The Novik and seven destroyers were placed at the right of the line. Admiral Togo waited, with battle flags flying from all the tops. The Japanese fleet formation represented the first letter of the Japanese alphabet inverted.

At 7:30 p. m. the Russians headed for the Japanese and Admiral Togo veered slightly to the right in order to bring pressure against the head of the Russian formation. At 8 p. m. the Russians changed their course and headed northward. Admiral Togo followed in a long single line ordering the destroyers and torpedo boats to prepare for an attack after sundown.

At 8:22 p. m. the small flotilla, swung around the rear of the Japanese fleet and headed toward the Russians at full speed. At 9:30 the fourteenth flotilla delivered the first attack on the Russian fleet now in the rear of a point five miles outside the entrance to Port Arthur. Immediately afterwards the fifth flotilla delivered a second attack. The Russian fleet was confused and it was impossible for it to retreat quickly into the harbor on account of the narrowness of the channel and possibly the low tide.

At 10:30 p. m. the Russian fleet anchored in a single line extending from the foot of Wantsueing Fort to the base of Chentaorhan. During the night the torpedo flotillas kept up constant attacks on the Russian fleet going in eight times.

The most effective attack was that of the sixteenth flotilla which at 11:30

p. m. caught the Russians rounding Cheshen. The first class torpedo boat Shirataka, Commander Wakabayashi, sent two torpedoes into a battleship of the Peresviet class. She was seen to sink in a volume of smoke and fire. Other effects of the attack were not observed on account of the heavy firing which cast volumes of water over the flotilla and the heavy cannonading which rent the air. The searchlights from the ships and forts also blinded the Japanese.

At dawn Friday a reconnaissance of the entrance was made by the fourth and fifth flotillas whose reports confirmed that of the patrol ships as to the Russian's losses.

Admiral Togo says the moonlight and the narrow line of the enemy prevented his fleet from inflicting greater damage. The Japanese loss was unexpectedly small. The destroyer Shirakump was struck in the cabin and three of her crew were killed and three wounded.

The first class torpedo boat Chidori was struck in the engine room. Torpedo boats 64, 66, and 53 were damaged. The others engaged were uninjured. Concluding his report Admiral Togo says:

"The effect of the attack and the small loss must be attributed to the illustrious virtues of his majesty."

A PERFECT CUSTARD.

Easily Prepared and Always Sure to Please.

(By Alice Cary Waterman.)

What could be more dainty, delicious, palatable and nourishing than a perfect custard? Only milk, eggs, sugar, salt, flavor—and Dunham's Coconut! Looks like an easy proposition to put these simple materials together to make a custard, yet there is nothing "hit-or-

miss" about the "blessed assurance" of the custard that never fails to come out of an oven in perfect condition. Underlying the success of a custard are scientific laws, and there are certain proportions to be allowed, too, that guarantee perfection as the result.

Whenever milk and eggs are combined the greatest care should be exercised in the management and control of the heat, so that the custard may be cooked at a temperature that will coagulate the eggs and not curdle the milk. The custard should be jellylike in consistency, firm yet delicately tender. In this condition it will possess greater nutritive value, because it can be more easily digested, and may be as safely rehashed by the invalid as heartily enjoyed by the robust in health.

Pointed Paragraphs.

Some men court, then marry, then go to court again.

No young man can write a sensible letter to the girl he loves.

Women know as much about politics as men know about war maps.

Some men are eagerly sought after because they don't pay their debts.

Laugh and the world laughs with you—unless you laugh at your own jokes.

Lots of men make money without advertising. They are employed in the mint.

A man who expects nothing but advice from his relatives is seldom disappointed.

You can't afford to believe that the office seeks the man if you don't want the office.

When a girl begins to criticize a young man's neckties he should prepare for the leap.

Many a man who inquires after your health doesn't care a rap whether it is good, bad or indifferent.

A woman's idea of enforced idleness is to have so much money that it would keep her busy trying to spend it.

A two-year-old Kansas boy smokes cigarettes, but as he doesn't part his hair in the middle or write poetry his parents are still hopeful.

Coconut Baked Custard.

Soak one cup of Dunham's shred coconut in one cup of milk. Scald three cups of milk. Beat six eggs slightly, until well mixed, with one-third cup sugar and one-fourth teaspoon salt. Pour milk slowly over

Out the Can and compare the quality of Economy Brand Evaporated Cream

with any of its imitations. Note the difference. See how smooth and appetizing our product is, owing to its heavy consistence, which keeps the butter fat equally distributed, in contrast with the cheap and thin imitations which allow the butter fat to rise and form unsightly clods.

beaten eggs, strain and add the coconut with grating of nutmeg. Mix well and pour into a mold or cups that have been buttered. Put into a pan of hot water and bake in slow oven until firm. At no time allow water in pan to boil or custard will whey.

The custard in cups makes one of the delights for the school luncheon basket. A pleasing variation in flavor is Caramel custard. Make a caramel from one-third cup of sugar and add to milk, then add one-half teaspoon of vanilla in place of the nutmeg.

A 10-cent package of Dunham's coconut and a little experimenting will reveal many dainties now unknown.

Review Abandoned.

Kiel, June 27.—It is announced that the elaborate naval review which it was planned to hold here today and tomorrow has been abandoned at the request of King Edward.

If your chest measure is 42, a 34 coat would be a little uncomfortable—and would cause some comment among your friends. Is your advertising expenditure cut too small for your business chest measurement?

Newbro's Herpicide

VACATION TIME. Vacation time should bring rest, recreation and comfort; and comfort of the solid and pleasing variety means no high collar, no stiff hat and no itching scalp. It is for this last discomfort that Newbro's Herpicide becomes a summer necessity, as it stops itching of the scalp and Prickly Heat almost instantly. Take Herpicide with you on your vacation.

SCALP WARNING. Itching of the scalp is not so much a punishment for past neglect as it is a warning for the future. It shows, almost conclusively, that the vine-like, microbic growth that causes dandruff, itching scalp and falling hair has entered the Sebaceous glands and unless this growth is stopped and kept out of the scalp, baldness will follow.

IT IS CONTAGIOUS. It was Prof. Unna (ask your doctor about him), who first pointed out that the true cause of hair loss is a germ or microbe that lodges in the scalp where it causes dandruff. Being of microbic origin the disease is necessarily contagious but Dr. Sabouraud has recently called attention to the highly contagious nature of dandruff, and the necessity of constant watchfulness to avoid it. Kill the dandruff germ with Herpicide.

UNSTERILIZED PUBLIC HAIR-BRUSHES, says

Dr. A. Cartaz, are to blame for most of the baldness that is prevalent today. He further states that, "baldness begins in the young." By this he means that the germ that causes the disease is planted in the scalp of young men and that sometimes years elapse before the destruction is complete.

WILL NOT GROW HAIR. Newbro's Herpicide is a "Hair-Saver;" it will not grow hair—nature does this—but by destroying the enemies of hair health, it enables the hair to grow as nature intended—except in chronic baldness. Save your hair with Herpicide. Wonderful results follow its use.

HOT WEATHER TROUBLES. During hot weather the minute sudatory glands of the scalp are called upon to perform an extra amount of labor. The perspiration that exudes in increased quantities must be handled promptly as it carries out poisonous and refuse matter that would otherwise clog up the pores of the scalp. Incomplete elimination of refuse matter produces a hot and feverish condition of the scalp, familiarly known as Prickly Heat, for which Herpicide gives immediate relief. Ladies will find Herpicide indispensable. It contains no grease, will not stain or dye. It is an exquisite hair dressing that COOLS, COMFORTS AND DELIGHTS. NO COMPLAINT FROM OUR CUSTOMERS.

"Herpicide is giving entire satisfaction to our trade. We have never had a single complaint that it would not cure dandruff and falling hair." (Signed) WOODWARD, CLARK & CO. Portland, Ore.

A HERPICIDE FOLLOWER. "I have tried five or six bottles of your Herpicide and can say that it is very good, and so I address my neighbors the same." (Signed) MRS. NELLIE HUGHES. An Unhealthy Hair.

MRS. NELLIE HUGHES. An Unhealthy Hair.

T. F. LAURIN, Special Agent. At Drug Stores \$1.00. Send 10c in Stamps to THE HERPICIDE Co., Detroit, Michigan, for sample. "Destroy the Cause--You Remove the Effect"
