CARRANZA MORE AMEABLE.

It appears that for one reason or another, Carranza has become more reasonable. It is said that his response to the latest American note is much more moderate in tone than the earlier communication in which he insisted on the immediate withdrawal of American troops from Mexico.

But it should be clearly understood by Carranza and all other persons who have been misled by the withdrawal of American troops from Mexico until there is a removal of the conditions which made their entrance necessary.

doing justice either to the United States or to Mexico.

About the worst thing that can happen in our Mexican relations just now is the creation or confirmation of the impression that we will temporize as we have done in the past, and that there is any probability of our withdrawing our troops and leaving Mexico in the anarchistic condition in which we found it.

EMPLOYMENT OF THE ALCOHOLIC.

New York Times.—In the report of the committee on industrial sanitation to the American Medical Association at Detroit, it was declared that the absolute solution of the problem of drunkenness was "in the hands of the intelligent employer who refuses to employ the alcoholic."

This is really the most powerful force in the cure of drunkenness—this and the more general realization on the part of the individual himself that he is destroying his productive power and reducing the saleability of his services by persisting in the use of alcohol.

MARKET NEWS

The government report will be issued tomorrow at 2:15 p. m., New York time.

Wheat cables little easier. May clear, new wheat moving southwest, sentiment bearish. We favor buying side wheat on break.

Corn—Map favorable, old corn is in demand and local stocks held by strong interests.

Provisions—Would use caution buying on this bulge and not overlook profits—R. P. & Co.

Liverpool—Spot wheat unchanged to 1/16 lower. Corn unchanged to 1/16 higher.

Highest prices were made for wheat at the rush by a local buyer and at the close was nearly at the low point.

Strength abroad was attributed to the sharp advance in ocean freights, to lighter world shipments to the United Kingdom and unfavorable crop reports from France and England.

Corn—Prices averaged higher despite the favorable weather, forcing rapid growth and the bearish construction put on snow crop report.

Export sales wheat 600,000, wheat including 200,000 bushels new winter. Corn sales were 300,000 bushels and oats 400,000 bushels.

Liverpool—Market dull but firm with strength in Winnipeg and better spot demand.

Spot market quiet, unimportant. Bullish enthusiasm among wheat traders lost its influence before midday.

The bulge was due to a jump of 4 to seven pence at Liverpool as compared with Saturday's prices.

SPRING Duluth, July 6.—The surprising strength of spot wheat at Liverpool, which was due to higher freights abroad and an inadequate supply on hand there caused prices to bulge early yesterday about 6-8c.

On the advance more favorable weather throughout the grain belt, liberal receipts, light export demand and a smaller decrease in the visible supply than expected all made for lower values to the end.

Very sluggish trading conditions prevailed and market closing about 1-2c below Saturday's final levels.

DURUM Duluth, July 6.—Strength of spring wheat in the face of large movement over the holidays reflected in this grain caused a strong undertone to rule the greater part of yesterday morning.

FLAX Duluth, July 6.—This market was without feature yesterday, nothing new having developed over the past few days that would be likely to influence it in any way.

The hesitation which traders showed in the session caused very dull conditions to prevail and trading outside of the little done in September and November could not be expected to be a factor.

A steady opening was followed by a dip in the more distant issues and later on announcement of sharply higher cables the whole list advanced in slow fashion until noon when the market was reached. The upturn ran 2 to 2 1/2c from low proving too rapid and partial, loss was scored around closing time on all leaders excepting July, the current delivery maintaining its full strength.

Net gains compared with Saturday close ranged 1-4c in November; 3-4c in October; September 1-2 to 2c for July.
