## Get the Habit of Drinking Hot Water Before Breakfast

Says we can't look or feel right with the system full of poisons.

Millions of folks bathe internally instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles if you could believe these hot water enthusiasts.

There are vast numbers of men and women who, immediately upon arising in the morning, drink a glass of lime-stone phosphate in hot water. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and the thirty feet of intestines of the previous day's waste, sour bile and indigestible material left over in the body which if not eliminated every day, become food for the millions of bacteria which infest the bowels, the quick result is poisons and toxins which are then absorbed into the blood, causing headache, bilious attacks, foul breath, bitter taste, cold, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can't get feeling right, are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation.

Just as soap and hot water act on the skin, cleansing, sweetening, refreshing, so limestone phosphate and hot water act on the stomach, liver, kidneys and bowels. It is vastly more important to bathe on the inside than on the outside, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

\$75,000 Paid for Mill and Light Plant—Stock Will be Sold to Farmers.

Lidgerwood, N. D., Nov. 24.—After negotiating for some time for the purchase of the Lidgerwood light plant and mill, the Equity put through one of the largest business deals ever consummated here. The consideration was \$75,000.

A committee, consisting of A. M. Baker of Fargo, C. J. Lee of Valley City and A. E. Dewey inspected the property and completed arrangements for the deal.

It is planned to sell stock in the institution to local farmers, as in other Equity enterprises.

The plant will be turned over to the Equity February 1, and at that time W. R. Movius will have completed over 25 years of service in the milling business in the United States. He established the mill and has added to it from time to time until the plant now is capable of producing 250 barrels of flour a day.

No change is expected in the force at the mill, but on February 1, the new management will be in charge.

## TWO PRISONERS ARE CREMATED IN JAIL AT CULBERTSON, MONT.

Culbertson, Mont., Nov. 24.—Two men were cremated here in a fire that destroyed the city jail in an early morning blaze. The identity of the men is not known, both of them having been arrested a few hours before by the city marshal when they attempted a burglary of Tanner and Best's general store here.

The men were placed in separate cells in the jail and were the only occupants. It is supposed that while smoking one of them set fire to the bed clothes. One of them was intoxicated when arrested. The marshal looked up the jail and went to his home. Some one was seen issuing from the jail building and the broker into, was badly burned on the inside and the men were already dead. Only charred trunks remained to be taken from the ruins later in the day.

Papers found on the men when arrested were given back to them at their request, so there are no means of identifying the men. One of them had talked with a blacksmith shop in a small town in North Dakota. Further than that nothing is known of the men.

At the coroner's inquest no blame was placed on anyone. The remains of the men were buried in the local cemetery.

It is stated by the parties who found Maier that he regained consciousness long enough to get on a man on a white horse committed to the deed but could give no other description. No reason for the murder has yet been uncovered.

## Normal School Notes

Mayville, N. D., Nov. 24.—That the state normal school at Mayville is making good as a school for the training of teachers for the elementary schools of North Dakota, is very evident from the positions that graduates have held and are holding in educational lines within.

## GRAIN GROWERS GET TOGETHER

National Council of Farmers' Co-operative Movements in Chicago.

Chicago, Nov. 24.—With seven-cent bread predicted and the world a billion bushels short in its wheat crop, grain farmers of the United States took a big step here to relieve the situation when a call was issued to organize growers to meet in Chicago for a special conference to be held December 8-9. The meeting is called by the National Council of Farmers' Co-operative Associations representing 300,000 organized grain farmers in nine leading grain states whose business this year, according to the National Council of Agriculture estimates, will total one and a half billion dollars. The grain farmers will come together under the auspices of the National conference on Marketing and Farm Credits in the fourth annual session at the Hotel Sherman December 4-9.

The organized grain growers are not in favor of an embargo on grain exports, according to Herman W. Danforth of Washington, Ill., president of the National Council. "They contend that the law of supply and demand should be allowed to work unhampered. They maintain that an embargo on one product would be legislative and farmers prefer to overhaul present marketing methods from country elevator to export markets."

The Equity Co-operative Exchange, representing 70,000 organized farmers of the northwest, will participate in the conference. The Canadian National Council will send a delegation and a speaker. The Farmers' Grain Dealers Association of Illinois, Kansas, Indiana, Minnesota, North Dakota, South Dakota, Nebraska and Iowa are arranging to send delegates.

The call issued by the National Council of Farmers' Co-operative companies states that "conditions among the farmers of America have reached a state of development where all grain growers should be actively interested in marketing their own grain co-operatively. The advantages which have come to the farmers of the middle west through co-operative grain markets should be shared by all grain growers."
