All kinds of Job-Work done to order with neatness and dispatch.

Morning Telegrams.

Passengers Going South.

MOJAVE, Feb. 1.—J. Haas, Mrs. M. S. Parkhurst, Mrs. D. A. Allen, Mrs. C. S. Schmitt, O. H. Haines, C. Wolsman, R. Brewell.

The steaming ship—The Grand and the Mica.

SAN FRANCISCO, Feb. 1.—Commander Glass of the Training ship Lamson has received orders from Washington to turn the ship over to the Navy Yard authorities at Mare Island, in conformity with the request of the Board of Supervisors. The transfer will be made next Thursday.

Referring to the sensational rumors in Virginia City, concerning the war between the Suro Tunnel and the mines, the Stock Report today says that one of the arbiters connected with the Arbitration Committee authorized the Stock Report representative to say that the matter would no doubt be arranged by the time that the Savage and Norcross Companies were ready to be turned, or at least a few days after, and that, although he was not at liberty to say how far matters had gone, he would say that negotiations now only depend upon the approval of a certain proposition in Nevada Block.

The Convention.

SACRAMENTO, Feb. 1.—The Convention met at 9:30 a. m., President Hoge presiding, 110 members present.

Morris and Burt presented petitions requesting the exemption of church and educational property from taxation.

Consideration of Hoge's substitute for section 22 was resumed. After extended discussion Hoge's substitute was rejected; yeas 43, noes 78.

Campbell offered an amendment to strike out the words "proceeds of Courts," in line fifteen, and insert the words "power to issue subpoenas and all other necessary process." Adopted. The section refers to the powers of Commissioners to fix rates and examine books and determine complaints against railroads and other transportation companies. The Campbell amendment is the only change in the section as reported by the Committee of the Whole. The section was adopted; yeas 91; noes 23.

Section 25, on motion, was stricken out. It merely provided that corporations should accept the provisions of the article on good faith. Holmes tendered the previous question. The main question was called and the article ordered engrossed for a second reading.

The article on Chinese was then taken up.

San Bernardino Weather.

SAN BERNARDINO, Feb. 1.—The rain ceased early on the morning of the 30th, since which time the weather has been delightful.

San Bernardino in the Bay with the Crew.

BALTIMORE, Feb. 1.—The oyster steamer "Admiral" has been found sunk in the bay with her captain, Horace Baker, of Philadelphia, lashed to the topmast and the bodies of nine men, comprising the crew, lashed to the deck, which was several feet above the ground. The crew of Smith's Island saw the wreck on the morning of January 24, but, owing to the rough weather, were unable to get out to it, although the Captain was seen signalling from the topmast, where he was lashed.

Atina House Burned—Fatal Results.

LOUISVILLE, Ky., Feb. 1.—The Atina House, a fine building, a mile south of the city, was this morning destroyed by fire, the origin of which is unknown. Three hundred and forty persons were in the place at the time. Jas. Hedley, an imbecile, was burned fatally. Fred Meyer is trying to escape, broke his neck. Henry Kohler perished in the flames. Thos. Dixon was killed by a fall. Nathan Caldwell was seriously hurt, and Mrs. Johnson, who was burned severely, will probably die. The exit scene is described as horrible in the extreme, but the most marvelous feature is the small loss of life attending it. Nearly all the inmates were aged invalids, imbeciles and cripples. Their ages ranged from 108 years to 50.

Changes Against Minister Foster.

NEW YORK, Feb. 1.—Dispatches and recent arrivals from Mexico state that the Government seriously meditates asking the withdrawal of his unpopularity with the Cabinet and his diplomatic course. Correspondence with the Mexican Minister at Washington has begun on the subject. Some of the Cabinet decline to visit Foster. Geo. S. Bowen, of Chicago, says that Foster nurtures a policy for the acquisition, by the United States, of a portion of Mexico, north of the 26th parallel, and is interested in the internal rail way project. Bowen thinks that

the American delegation to Mexico will result in securing a peace policy, making it impossible for any political faction to raise the question of war with Mexico.

Treasury Statement.

WASHINGTON, Feb. 1.—Cash in Treasury, \$28,450,695; gold and silver certificates, \$2,071,000; United States notes held for redemption of certificates of depositors, \$40,940,000.

Stolen Coupons Turned Up.

BOSTON, Feb. 1.—Several coupons from bonds of the Union Pacific Railroad Company, presented for redemption here, have been identified as stolen from the Northampton Bank in 1877. They probably came from some European banking house, and will be turned over to the original owners.

Peter Committee.

WASHINGTON, Feb. 1.—After a short and unimportant session today the Peter Committee adjourned till Tuesday next.

Congressional.

WASHINGTON, Feb. 1.—SENATE, McCree, from the Joint Committee appointed to inquire into the expediency of transferring the Indian Bureau from the Interior to the War Department, submitted a report, signed by four members of the Committee, in favor of the transfer. Ordered printed.

Hoar, from the Committee on Privileges and Elections, presented a minority report in favor of a sixteenth amendment to the Constitution, prohibiting the States from disfranchising persons on account of sex. Ordered printed. The report is signed by Hoar, Cameron, of Wisconsin, and Mitchell.

Edmunds called up the Senate bill to provide for acquiring and settling private land claims in New Mexico, Wyoming, Arizona, Utah, Nevada and Colorado. The objection is to settle titles to lands derived from the Spanish and Mexican Governments. The bill was discussed and finally laid aside.

Consideration was then resumed of the resolutions of Edmunds declaring the validity of the thirteenth, fourteenth and fifteenth amendments to the Constitution, and Morgan continued his argument in favor of the substitute presented by him.

House.—The debate threatened for the past few days has begun. Chairman, in his opening speech, suggested that a tendency to suspect others, as exhibited in the speech of Bragg, indicated a general tendency to corruption in one sense or the other.

Chalmers, in his opening speech, suggested that a tendency to suspect others, as exhibited in the speech of Bragg, indicated a general tendency to corruption in one sense or the other.

After several speeches, for the most part by Mississippians, the debate terminated with the morning hour. The House then resumed, 77 to 112, to consider the Army Reorganization bill and went into committee on the Army Appropriation bill.

Seventeen of converted Glasgow Bank Directors.

EDINBURGH, Feb. 1.—The directors of the City of Glasgow Bank, Summer Stronach and Lewis Potter, convicted of fraud, theft and embezzlement, were sentenced to eighteen months imprisonment. Five other directors, convicted of assisting in the abstract of balance sheets, were sentenced to eight months imprisonment. The light sentences caused some surprise. Justice Moncrieff, in passing sentence, said that the prisoners had not falsified accounts for their own personal benefit, but with a mistaken idea that it was for the public good.

President Grevy.

PARIS, Feb. 1.—In Thursday's ballot for President Gambetta received five votes, and Ladmirault, Daumal and Gallifet one each. Citron, Humant, Sironch and Lewis Potter, convicted of fraud, theft and embezzlement, were sentenced to eighteen months imprisonment. Five other directors, convicted of assisting in the abstract of balance sheets, were sentenced to eight months imprisonment. The light sentences caused some surprise. Justice Moncrieff, in passing sentence, said that the prisoners had not falsified accounts for their own personal benefit, but with a mistaken idea that it was for the public good.

London, Feb. 1.—The Admiralty has directed the dock yard authorities to charge the United States only the bare cost of labor and materials employed in the repairs of the Constitution. The Captain of the Constitution has written a letter warmly thanking the Admiralty and the Superintendent at Portsmouth for the courtesy and kindness of all the officers.

Strike Among Iron and Brass Workers.

LONDON, Feb. 1.—A general strike of iron workers, numbering 8,500, and brass founders will commence to-day at Liverpool.

Precautions Unleaved.

BERLIN, Feb. 1.—It is considered in the best informed quarters that the present decrease of the plague is merely due to the extreme cold, consequently precautions against its spread are unrelaxed.

Grant and Party Sailed for Bombay.

ST. PAUL, Feb. 1.—Ex-President Grant and party sailed to-day for Bombay.

The Boston Whittling School.

Formerly all American schools were whittling schools; but the art was practised surreptitiously, the soft pine benches furnishing the only whittle material. With the advent of highly finished, hard-wood school furniture, all jack-knife practice in school was rigorously suppressed, and for a generation the art has fallen into disrepute. It has revived, however, under improved conditions, the natural spirit of constructive-ness—usually called destructive-ness—incident to boyhood being made the basis of systematic training of the enjoyable and useful sort.

The Pioneer Institution is the Boston Whittling School, a private enterprise, housed by the city. The school has been fitted up with work-benches, divided into four-

foot sections, and each boy is furnished with such tools as he may need. Thirty-two were admitted the first year, their ages ranging from twelve to sixteen. The school report says that perhaps twelve of them had received some instruction in the jig-saw and knife, but none had had any previous training in wood-carving or the use of the chisel. There were more applicants for admission to the school than could be received. If any boy was absent two successive evenings, his place was taken by another. A rank-list was kept and posted on the wall, and each boy knew how his work was estimated by consulting the list. A course of twenty-four lessons in wood-carving was prepared with special reference to instruction with the least expenditure for tools and material. It was not designed to make finished workmen in wood-carving, but to take advantage of the natural inclination toward handicraft, the Yankee taste for whittling, which belongs to most boys, and to develop it and guide it to useful application.

The experience of the founders leads them to the belief that it would be easy to establish, in connection with all our grammar schools for boys, an annex for elementary instruction in the use of the half-dozen universal tools, i. e., the hammer, plane, saw, chisel, and square. Three or four hours a week for one year or two, that intimacy with tools, and that encouragement to the inborn inclination to handicraft, and that guidance in its use, for want of which so many young men now drift into over-crowded and uncleanly occupations, lapse into idleness and vice."

Northern and Central Europe have been doing this or similar work for years; and such teaching has done very much to hasten the industrial development of the countries that have tried it.—Scientific American.

NEW ADVERTISEMENTS.

St. Vincent's Hospital,

CONDUCTED BY

THE SISTERS OF CHARITY.

R. G. HASKELL & CO., MANUFACTURERS OF

Boots & Shoes,

121 Sanson St., San Francisco, Cal.

We sell ONLY goods of our own manufacture.

Buy only R. G. HASKELL & CO.'S CALF BOOTS AND SHOES. They are the best on the Pacific Coast.

Marstor's Self-Regulating FEEDER

FOR THRESHING MACHINES.

Is the only Feeder manufactured that feeds without moving the straw in a body, consequently giving a more regular feed than is possible to obtain with a draper feeder; it feeds the whole length of the cylinder; it is easily changed to feed fast or slow as desired; saves the labor of two men and does not require an experienced teamman to feed it. The separator needs no alteration with the exception of the removal of feed board to secure it in position, and does not have to be taken off when moving. It requires but little power to run it, and has no complicated parts liable to get out of order. Its success having been fully demonstrated, I cordially invite all parties interested to call and judge of its merits. For full particulars address

E. J. MARSTOR, Stockton, Cal.
