Passengers Going North. MOJAVE, July 29.—H B Underhill, J M Shannon, J R Seupham, E Brown, J A Weid.

Full Particulars of Gen. Bouton's Fatal Shooting.

COLTON, Cal., July 29.—By the Justice of the Peace of San Jacinto, who has just arrived, I get full particulars of the fatal shooting which occurred near San Jacinto Monday night. Gen. Bouton arrived at San Jacinto, on the cars, at 9:30 p. m. He was met by his partner, J. C. Collins, when the two started in a light wagon for their ranch in San Jacinto Valley. About three miles from the station they were halted by three masked men and their hands chained behind them. Collins was chained to his wagon wheel with the chain about his neck. With a chain around Bouton's neck, they started to lead him out to the brush, but had gone but a short distance when Bouton got his hands loose, and he turned round, noticing his movements, at once cried "Halt," when Bouton wheeled and shot him. Then turning he shot the one in front. Bouton then ran to the wagon to release Collins when the third man came leisurely walking up the road, thinking, it is supposed, that it was his party doing the shooting, when Bouton fired and felled him. Bouton then ran to the wagon to release Collins when the third man came leisurely walking up the road, thinking, it is supposed, that it was his party doing the shooting, when Bouton fired and felled him. Bouton then ran to the wagon to release Collins when the third man came leisurely walking up the road, thinking, it is supposed, that it was his party doing the shooting, when Bouton fired and felled him.

A Letter from General Bouton.

Messrs. Seymour & Co., of this city, received a letter from Gen. Bouton yesterday morning from which we are permitted to extract the following: I will be in Wednesday or Thursday. I had an exciting event happen to me last night in going from the ranch to the buggy which was highwayman waylaid. Mr. Collins and myself, and got our hands chained together behind us and chains around our necks, and Mr. Collins chained to the buggy wheel. They then were leading me into the brush to kill me, and so we both think, when I slipped a link in the chain and got one hand free. I drew my revolver, which I still had in my hip pocket, and shot the one who was holding a shot-gun and one against me. The third man then running towards me and I gave him a shot which sent him on the ground into the brush. I then ran and released Collins and we got away with the team. We came back this morning and found the body of the leader in the road about half a mile from the place where the shooting occurred. Men are looking for the other bodies. Yours in haste, E. BOUTON.

Burlington Weekly Hawkeye.

This paper, which is universally quoted, may be had at any News Depot at 5 cents per copy. Annual subscription, post-paid, \$2.00. Agents are wanted everywhere to take subscriptions and retain 50 cents in cash on each annual subscriber. General Agents may send \$1.25 per year. LITERARY.

THE SUN FOR 1879.

THE SUN will be printed every day during the year to come. Its purpose and object will be the same as in the past. To present all the news in a readable shape, and to tell the truth though the heavens fall.

THE SUN has been, is, and will continue to be independent of everybody and everything save the truth and the convictions of daily. That is the policy which has won for this newspaper the confidence and friendship of a wide constituency than was ever enjoyed by any other American journal.

THE SUN is the newspaper for the people. It is not for the rich man against the poor man, or for the poor man against the rich man, but it seeks to do equal justice to all classes in the community. It is not the organ of any person, class, sect or party. There need be no mystery about the motives and aims of the honest man against the rogues every time. It is for the honest Democrat as against the dishonest Republican, and for the honest Republican as against the dishonest Democrat. It does not take its cue from the utterance of any politician or political organization. It gives its support unreservedly when men or measures are in agreement with the Constitution and the principles upon which this Republic was founded for the people. Whenever the Constitution and constitutional principles are violated—as in the outrageous conspiracy of 1876, by which a man not elected was placed in the President's office, where he has remained—it speaks out for its right. That is THE SUN'S idea of independence. In this respect there will be no change in its course for 1879.

THE SUN has fairly earned the hearty laud of readers, friends and humbugs of all sorts and sizes. It hopes to deserve that laud not less in the year 1879 than in 1878, 1877, or any year gone by. It is proud to remain to stand on the wicked with unmitigated bitterness.

What the lessons of the past should be constantly kept before the people, THE SUN does not propose to make itself in 1879 a magazine of ancient history. It is printed for the man and woman of to-day, whose concern is chiefly with the affairs of to-day. It has both the disposition and the ability to afford his readers the promptest and most accurate intelligence of whatever in the wide world is worth attention. To this end the resources brought to well-established journals are liberally employed.

The present disjunct condition of parties in this country and the uncertainty of the future lend an extraordinary significance to the events of the coming year. The discussions of the press, the debates and acts of Congress, and the movements of the leaders in every section of the Republic, all have a bearing on the Presidential election of 1880—an event which must be regarded with the most anxious interest by every patriotic American, whatever his political ideas or opinions. To these elements of interest may be added the probability that the Democratic party, both in house of Congress and Administration, and the spread and strengthening of every where of a healthy and honest system of government, and the exposure, according to its well-known methods, the principles that should guide through the labyrinth, will be the important part of THE SUN'S work for 1879.

We have the means of making THE SUN, literary, political and social, a great newspaper, more entertaining and more useful than ever before; and we mean to apply them freely.

Our rates of subscription remain unchanged. For the DAILY SUN, a four-page sheet of twenty-eight columns, the price by mail, postage paid, is 50 cents a month, or \$5.00 a year, or including the Sunday paper, an eight-page sheet of fifty columns, the price is 60 cents a month, or \$7.00 a year, postage paid.

The Sunday edition of THE SUN is also published separately at \$1.20 a year, postage paid.

The price of the WEEKLY SUN, eight pages, fifty-six columns, is \$1 a year in advance. For clubs of ten sending \$10 we will send an extra copy free. Address W. W. ENGLAND, Publisher of THE SUN, New York City.

THE SCIENTIFIC AMERICAN

Thirty-fourth Year. THE MOST POPULAR SCIENTIFIC PAPER in the World. Only \$3.00 a Year. Weekly. 52 Numbers a Year. 4,000 Book Pages.

THE SCIENTIFIC AMERICAN is a large First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, profusely illustrated with splendid engravings, representing the newest inventions and the most recent advances in the arts and sciences, including new and improved facts in Agriculture, Horticulture, and the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers by eminent writers in all departments of science will be found in the Scientific American.

Terms, \$3.20 a year, \$1.00 half year which includes postage. Discount to agents. Single copies ten cents. Sold by all newsdealers. Remit by postal order, MUNN & CO., Publishers, 37 Park Row, New York.

IN CONNECTION with the Scientific American Messrs. Munn & Co. are solicitors of American and Foreign Patents, have had thirty-four years' experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the Scientific American of all inventions patented through this Agency, with the name and residence of the patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introductions often easily effected.

Any person who has made a new discovery or invention can ascertain, free of charge, whether a patent can probably be obtained by writing to the undersigned. We also send free our Hand Book about Patents, Patents, Caveats, Trade-Marks, their cost, and how procured, with hints for procuring advances on inventions. Address for the paper or concerning patents, Munn & Co., 37 Park Row, New York.
