

The facilities of the Herald Steam Printing House for doing job work are not surpassed in California outside of San Francisco and Sacramento.

SPECIAL NOTICE.

Hereafter notices of companies, societies, churches, etc., will only be inserted in the Herald as paid advertisements.

The Crop Sheet.

The rain on Sunday and yesterday placed beyond peradventure the outcome as respects the season this year in Los Angeles county.

The fact is that we are to have a golden season, no matter how the rainfall may figure in the official account.

So auspicious were the crop prospects in Los Angeles county up to date that it required but one good rainfall to make the prospect certain.

Taking into the account the variations which are recorded all over the country, we are inclined to think that there is not a single barley or wheat field which will fail to make a splendid record.

The Herald, some time ago, expressed the opinion that we should have copious Spring showers.

In a leading article, some days ago, headed "The Outlook," we gave it as our opinion that a rain was immediate.

Since that editorial outgiving we have had a rain which removes all doubts about the cereal crops.

The fact is that, as the case stands to-day, the only possible drawback as respects Los Angeles county is that there may be so much rain that the earlier sown crops may be "lodged."

It is a matter that does not admit of controversy that we can almost always stand any drawbacks which are referable to a copious rainfall.

Though it is quite true that grain may be "lodged," there is nevertheless so large a proportion of the cereal crops that need a great deal of moisture that, in the balancing of the outcome of the season, plenty of rain will always be accepted as a good thing.

Some time in the near future early plowing and summer fallowing will be regarded as a pre-requisite to crops.

Possessed of their immemorial lazy habits, the average Los Angeles farmer declines to recognize this fact.

But there will, in the coming years, be no such slovenly farming in this county. Our people will soon recognize the fact that, through a union of manly industry, exerted early in the season, with the marvelous productive capabilities of our soil, great and remunerative results are inevitable.

Very shortly even the feeblest intellect will become alive to the truth that twenty acres of productive land in Los Angeles county will yield more money than a farm of one hundred and sixty acres in the Mississippi valley.

Not only that, but, as respects irrigated lands, it will shortly be found that the figures conceded in Spain will be realized in Southern California, and far more.

When a Commission of Engineers of the United States Army was sent, by the United States government, to examine the irrigating systems of Spain and the South of France, it was found, by the official report of these gentlemen, that, even in Spain, which was supposed to be an antiquated country, irrigated lands ranged from \$900 to \$1000 an acre in value.

These lands, which were mostly devoted to vineyard, would not yield one half the amount of grapes to the acre which are reported from the deep, rich soils of Los Angeles county.

As the people of the United States are an eminently go-ahead race, and as capital is being multiplied in this country at a rate never heretofore recorded in any land, it is not straining the matter to say that, when the situation is properly understood hereabouts, the figures usual in Spain will be approached, if not much exceeded.

While there was some question as to whether the present would be what is known as a good year, that doubt is now entirely dispelled.

LAST NIGHT'S NEWS.
