

COUTLER'S COLUMN.

FRESH ARRIVAL FROM NEW YORK TO-DAY.

Jersey Waists, Colored and Black Velvets, Brocaded Turcoman Velvets in Blacks and Colors.

Beautiful Silk Handkerchiefs, Fancy and Shepherd Dress Plaids.

Another line of those handsome Black and Colored Cashmères.

New Black Ottoman Silks.

Inspection invited.

NEW TO-DAY.

Just received from New York some handsome Dress Silks in the leading colors.

Pretty New Laces, the latest styles, such as Escorial, Pompadour, Malines and Oriental.

Nobby Linen Collars in Miles Standish, Princess Louisa, Jersey and other novelties.

THE ELITE NECKWEAR, in Escorial, Malines and Pompadour, Lace Fichus, Irish Crochet Collars, &c. Stylish Handkerchiefs, and also a pretty line of solid and colored Border Linen Handkerchiefs. Call and see them. Fresh Goods every day. B. F. COULTER.

COLDS! COLDS! COLDS!! Why suffer from them? You are afflicted with Rheumatism? You can stop them in a greater extent than you may think by wearing the LOS ANGELES WOOLEN MILLS PLANNERS.

OUR UNDERWEAR AND NAVY BLUE OVERSHIRTS are manufactured by the best workmen in the world. They are made of PURE WOOL AND DYED. They NEVER INJURE THE SKIN and are very durable. They can be found ONLY at the Store of B. F. COULTER, 236 & 238 North Main St., Baker Block.

BUTTONS! BUTTONS!! BUTTONS!!! Why do you burst your buttons off? Because you haven't tried COULTER'S SUSPENDERS ON WHEELS. B. F. COULTER.

STOP AND THINK. Did it ever occur to you that B. F. COULTER, Proprietor of the Los Angeles Woolen Mills, sells a Pure Wool Blanket, either in White or Colored, in many instances, cheaper than those that are made with Cotton or Shoddy? IT IS A FACT. Why? Because he manufactures these goods.

No Shoddy, no Cotton are used in these goods. Call and save Money. B. F. COULTER.

THE COULTER SHIRTS. Well made, of good materials, PERFECT IN FIT. Prices as low as the lowest. Call and see them and you will not want any other.

New styles Collar and Collars, Neck Collars and Cuffs, Celluloid Collar Cuffs, Collar and Cuff Buttons, Handkerchiefs, Ties, Scarfs, Hat Bands, all reasonable prices at B. F. Coulters' Store.

GENTLEMEN—Do not fail to go to Coulters', 236 and 238 Main street, Baker Block, for your Underwear. His All Wool Underwear is double breasted, made of pure wool and non-suds and cheap.

TO THE LADIES. We keep the most beautiful Blue, Black and Jet Black Cashmères that we have ever seen. They are choice and you should examine them.

OUR BLACK SILKS. Are so very superior to all others that you only have to look at them to be convinced. Don't buy if you see them. B. F. COULTER.

We have a Resident Buyer in New York City. He is constantly sending the choicest goods, bought at the lowest prices. If you want any article in the Dry Goods Line we can furnish you on as good terms as any House in San Francisco.

B. F. COULTER, BAKER BLOCK, Los Angeles, CALIF. 17

WAR DEPARTMENT, SIGNAL SERVICE, U. S. ARMY.

Division of Telegraphs and Reports for the War Department and Agriculture. Report of the Signal Officer at Los Angeles, Cal., Sept. 19, 1883.

Table with columns: Name, Rank, Position, Date of Appointment, and other details of Signal Service personnel.

LOCAL BRIEFS.

See advertisement of Los. For real fun go to the rink. See advertisement of board wanted. A situation as child's nurse is advertised for in New York.

In our New To-Day a good retail business is advertised for sale. Captain M. Sherman, of San Diego, is registered at the St. Charles Hotel.

Two newly furnished rooms are advertised for rent under New To-Day. Thirty-seven passengers left for northern coast ports per steamer Ancon yesterday.

The new building on Spring street, near Temple, will be occupied by a cigar store and insurance office. Thermometer for the 24 hours ending at 8:15 last evening, maximum, 80.5 degrees; minimum, 59 degrees.

Miss Clara Willower and Miss L. J. Hammond returned from San Francisco this morning's overland train. Mrs. C. N. Felton, of San Francisco, arrived in the city yesterday, and is stopping at the Commodore.

Five fresh salmon and shrimps to be had at the Fulton Market to-day, 18 N. Main street, opposite Grand street. The marriage license of A. G. Norris and Cora E. Platt was filed for record in the County Recorder's office yesterday.

Col. Geo. Butler Griffin has gone to Santa Barbara to take a quiet rest, while he is recuperating from a trouble with a fever. Rev. W. A. Knight and family, and Rev. I. Reinschell, were passengers to Santa Barbara per steamer Ancon yesterday.

There are messages at the telegraph office for Jose Arana, Emma Bowell, Jesus Daniel, Mr. Williams and W. H. Stomba. Mr. H. G. Newhall, of Newhall, left for San Francisco by steamer yesterday, after a visit to his immense grain ranch near Newhall.

The police last night arrested eleven young fellows sleeping in cars on Chavez street. In the whole crowd four boot-blacks had ten cents each.

A horse without saddle, bridle or harness, ran at a rapid rate down Main street yesterday afternoon. Luckily no damage was done. Transfers of real estate amounting to \$14,102.38, against \$220,000 mortgages, were filed for record in the County Recorder's office yesterday.

Decrees in divorce between Vincenta Dubourville and E. M. Dubourville and Rosmo Salcedo and Adelaide Salcedo were filed for record in the County Recorder's office yesterday.

Mr. Cyrus Willard, and his partner, Mr. Phillips, left for a paseo to San Francisco last evening. They will return in about ten days, when they will return and undertake new and extensive contracts.

A copious thunder shower was raging yesterday along the Sierra Madre mountains for a distance of about fifty miles in length. It is probable that the water on the desert was simultaneous with this storm.

The well-known ringer, Mr. Meyer, ran a mile at the Skating Rink on Spring street last evening in forty minutes and thirty-six seconds, which, considering the shortness of the circuit, is excellent time.

The many friends of Mr. Sid Lacey were glad to see his genial face on the streets again yesterday. He has just got home from a six weeks' visit to the northern part of the State, and looks much improved by his sojourn.

Persons who contemplate a visit to the East are referred to the advertisement of W. E. Willmore, who will leave this city October 30 with an excursion party. He will be provided with the best of accommodations.

In U. S. Commissioner Loe's Court yesterday an Indian named Jose Dolores Chia was arraigned for selling fire water to his countrymen. The case of the crooked tickle business was postponed on account of the sickness of a witness.

A telephone message from Camp yesterday states that Mr. Cullen, of Los Angeles, is here buying cattle for the Los Angeles market. The place, on the same place, will be there on the 25th of the same purpose.—San Diego Union.

A meeting will be held by the members of the Board of Trade within a few days to consider the matter of the improvement of Wilmington harbor and the establishment of a United States Custom House at Los Angeles, and the erection of U. S. Government buildings in this city.

The car leaving for the southern part of the city at each of our street car lines at 6:20 o'clock A. M., has always been crowded with mechanics and other workmen, so that it was no novelty to see them riding on the top of the cars. Those arriving at 6:20 o'clock in the evening are similarly filled.

Mr. R. E. Locks has gone overland to the East to take a position as agent for the Theodore Thomas Orchestra for two weeks. He is a young man of long curly hair, and is being escorted by a party. He was looked up for examination.

business thoroughly. He will fire a paper through a third-story window, and smash the door and ceiling. Luckily, so far as human beings has yet come within range of his throws, although there have been some close calls.

Mr. John J. Valentin, Superintendent of Wells, Fargo & Co.'s Express, has issued a circular informing the public that from and after October 1st, proximo, the date at which the new postage law goes into effect, the company will frank envelopes at the following rates: Single franks, 5 cents; for 25 cents, 12 for 50 cents, 25 for \$1, which is virtually at the rate of 4 cents each.

Messrs. Lewis Bros., the enterprising shoe dealers in a double-column advertisement elsewhere in this morning's HERALD, announces further reduction in special lines of shoes. This house is always equal to the task, and is now enabled to dispose of goods of the best quality at a small margin of profit. Give them a call.

It is now claimed that castor oil plants will drive away flies, mosquitoes and other undesirable insects. Will some of our readers try the remedy by placing castor oil plants at doors and windows, where these insects most do congregate? The electric light shades are killing off the moth and other millers in a wholesale way, and the castor oil plant is killing the grasshoppers. Now let the mosquitoes be laborer with next.

The infernal machine in the shape of a bicycle, made with the small steel front and the large one behind, is a curiosity, and is being made in this city. Its mechanism is such that when the small wheel in front encounters any hole or other obstruction, the rider falls back over the six-foot wheel, and the little wheel falls on top of him and kills him. It is worse than dynamite.

The steamer Arable on Saturday carried away to China \$222,110 in silver and \$19,572 in gold. These figures show that the demand for our precious metals abroad is at least 12 to 1 for silver against gold. The silver yield has now assumed a permanent form, and the value of silver bullion should be protected from all adverse legislation. This yield will soon amount to \$100,000,000 and is increasing and is desiring of our consideration.

The Grand Central mine at Tombs, since it commenced milling ore in March 1881, twenty-nine months ago, has turned out \$2,893,742. That is, very comfortable sum for that little mine, but from the way in which the mine is doing relatively much better than the Grand Central, which yields less than \$40 per ton of silver, while our week's mine yield more than double that amount.

Some weeks ago a couple of horses were stolen in Ventura county. Sheriff Snodgrass, of that county, traced the animals to this city, and with the aid of Deputy Sheriff Gard, recovered the horses. Since that time, the vigilance of the Major Gard has been on the lookout for any such animals, and yesterday his vigilance was rewarded by the capture of a man, a Mexican, who is known under the name of "Batuso." The Sheriff of Ventura was apprised of the arrest, and will come down for the man to-day.

The Santa Barbara Independent orchard of Russell Heath in Carpinteria, showing a crop of \$60,000 from 100 acres, or \$60 per acre, with not all the trees full bearing size. The orchard may all very fine but it does not approach the walnut trees of Downey City in production, where we double the yield of the Heath orchard. We do the same in Los Angeles. Our neighbor will have to look out now before bragging will be allowable.

By notice under the proper head it will be seen that Mr. W. L. Gerrig, of Pomona, and Miss S. M. Crofford, of this city, were yesterday made man and wife. Rev. W. E. Hill officiated. The happy event took place at the residence of Mr. Thomas Stout in the presence of a large assemblage of friends and well-wishers. After the ceremony a sumptuous lunch was served, at which the newly-wedded couple were toasted in glowing language. They may live long and prosper is the wish of all who knew them.

The barn and contents belonging to Mrs. Della Hoop, near Santa Barbara, were totally destroyed by fire last Saturday evening. The fire is supposed to have been started by a cigar or cigarette thrown into a pile of dry manure that was foolishly placed against the side of the barn. Or it may have resulted from spontaneous combustion in the manure pile. Two safe conclusions can be drawn from this severe calamity, and they are these: Never permit lighted cigars, pipes or cigarettes near barns, and never allow a pile of manure to be heaped up against any building. The many friends of Mrs. Hoop were glad to see her genial face on the streets again yesterday. He has just got home from a six weeks' visit to the northern part of the State, and looks much improved by his sojourn.

Reception to a Pastor. A pleasant reception was tendered last evening to the new pastor of the Fort street M. E. Church, Rev. B. F. Braese, late of Council Bluffs, Iowa, whom it was our pleasure to meet. This gentleman is a person of fine physique, and scholarly attainments of a high character. The reception was well attended, not only by the members of the church society, but by friends of the church and the new pastor. We noticed the following gentlemen present: Rev. B. F. Braese, Rev. T. W. E. Hill, Mr. J. P. Widney, Judge J. A. Fisher and Messrs. N. S. Averill, J. F. Early, C. H. Bradley, M. Dodsworth, George Baker and J. W. H. Seymour, besides many lady friends, whose presence added much to the attraction of the reception. The reception committee was constituted as follows: Rev. E. S. Chase, Hon. G. Wiley Wells and Messrs. C. H. Bradley and N. S. Averill; also Messdames J. H. Book, N. S. Averill and J. H. Seymour and Miss Emma Bradley. Hardly has a social entertainment at any church in this city been more enjoyable than that of last evening. A reception will also be given by Rev. E. S. Chase, of Asbury M. E. Church, on Friday evening at his new parsonage, so generously donated to the church by Mr. and Mrs. Beach, as heretofore mentioned in the HERALD. It will be an enjoyable social hour.

Passengers Due This Evening. The following is the list of passengers by the Southern route, to arrive in Los Angeles at 4:45 o'clock: The HERALD from Casa Grande, Arizona, at 10 o'clock last night: C. L. Pierce, El Paso; Mrs. H. Glass; New Mexico; W. P. Cropp, Fort Worth; Tex.; G. E. Truanel, New Orleans; T. C. Gallagher, New York; J. S. Miller, El Paso; M. Greenleaf and family, Guyanum; F. B. Moore, Spokane Falls, W. T.; H. P. Ladd, Tucson; J. G. Griffin, Mexico; F. E. Elkan, New York; Mrs. S. M. Smoot, New York; J. McQuire, Boston; F. M. Welch, Yonkers.

AN APPEAL.

To Agriculturists, Horticulturists, Viticulturists, Manufacturers and to all Representing Other and the various Industrial Interests in Southern California.

The Board of Directors of the Sixth District Agricultural Association most respectfully invite your attention to the necessity of a general and complete display of your products at the coming fair. The new building, corner First and Los Angeles streets, in Los Angeles, commencing October 8th, and ending October 13th, proximo.

The stranger, the new-comer, is here in force. Let us make a united effort to exhibit our products and let us convince him of the superiority and excellence of our products; and the wonderful fertility of our soil; the capacity of our country, and at the same time reflect credit upon all our citizens.

Each and every locality in our rich District should vie with each other in providing space for their exhibits at the approaching Annual Fair. Give us your cooperation, and receive our united thanks; without your aid we are helpless, and if this Fair is not a success, you are the losers.

Make your applications for space to Thos. A. Garvey, Superintendent of the Horticultural, Agricultural, and other industrial interests, to be made in the Pavilion, without delay.

We desire to give agriculture, horticulture, viticulture and local manufacturing industries the preference in the allotment of space, and in order to have the positions should be filled immediately. Address Thos. A. Garvey, Superintendent of the Pavilion, P. O. Box 42, Los Angeles, Cal., or call at his office, No. 28 West First street, where a diagram of the Pavilion can be seen.

The Directors are very anxious to make a grand success of this fair, and cannot do so without your earnest cooperation. The credit of the District is at stake. Let us make a strong, earnest, united and determined effort, and let us exhibit our resources that will be a lasting credit to our whole people, and to the Directors of the Sixth District Agricultural Association. Awaiting your cooperation we are Yours truly, F. J. BARRETT, President.

THE GOOD WORK BEGUN.

The Plans of the Herald Being Carried Out. The Herald is now in the hands of the Waters and Come Forth.

Only a few months ago the HERALD contained an argument in favor of the removal of the Herald from the Rock and Waters, and repeated the necessity of the project in several issues, with suggestions of a location where such a tunnel could be made with success.

To-day we have the pleasure to announce that the good work has been begun in several places. Mr. James N. W. Allen has a fine body of land between Cucamonga and Etiwanda, and has begun a tunnel six and a half feet high and five feet wide, in the mountains at the upper side of his land. Mr. Clark, who is making the same, was in town yesterday for giant powder, tools and other articles. He is doing very well, and is about fifty feet. About ten miles to the west of this tunnel the Chaffey Brothers are preparing to make another tunnel to water a part of the Ontario Colony. The work of the Sunny Slope Mr. C. C. Hastings has begun a tunnel on the upper side of his tract. Mr. Albert Kinney has made a short tunnel that is yielding a fine stream of water for his ranch.

Next week the Allen and Mr. A. Beigel have commenced a tunnel on the lower side of the mountains. They have completed about forty feet of the same. It is yielding water quite freely already. About three miles west of this tunnel Messrs. Graham, Lowell, Gano and Jewett have run a tunnel into the mountains about fifty feet, and secured a beautiful stream ten inches wide and six feet deep. The water is very pure and is carried into a reservoir near the mouth of the tunnel. The water in this tunnel comes up and out of the bottom of the tunnel and in from the sides. The present supply is ample for all their needs, and that work for the present has been suspended. It was found that the water increased in quantity as the tunnel was lengthened. If more water should be needed they will extend their work further into the mountain. This last mentioned work is near the spot that was indicated in the HERALD last spring, and shows the uttering theory of the argument then advanced.

Another spot equally as favorable, may be found midway between the Graham and the Crank tunnel where water can be found in going but a short distance. These enterprises are the more gratifying to the writer because he made a careful examination of these mountains, and decided in favor of this water supply ten years ago. The result will be that the choicest lands in the country, most noted for health and fertility, will now be brought under cultivation and made the most delightful places of residence on the continent. Messrs. Mackay and Galt, of San Fernando, also have a good location for a tunnel on their high mesa land. Another recommendation in favor of this water supply is the clear and pure condition of the water as it emerges from the tunnel, and the further fact that the riparian rights, as enumerated by the Supreme Court of California, cannot apply to these precious waters. All these are good beginnings, but there should be one large, long tunnel, a thousand feet at least, and two thousand would be better yet. Who will make it?

Excursionists. The latest Phillips excursion from Iowa and other points in the East, arrived in the city by "No. 22" at 4:10 o'clock yesterday morning. The excursion was for the terminus. One hundred and eleven passengers were the sum total of the excursionists, twenty of whom disembarked at Colton for a trip through San Bernardino county, but will arrive here next day. Some of them got here last night, and others will arrive to-day. Mr. C. H. McCall and family, among the excursionists, returning after a five week's trip to the East. Postmaster C. E. French, of Santa Ana, accompanied by his family, was also among the passengers. Everyone who has been our fortune to meet, expresses his regret at being so long separated with the trip, and the management. One and all are delighted with the country, and about nine-tenths of them will settle here. The time made from Buffalo to Los Angeles was only seven and a half days.

The New Iron Mines.

The leading papers of the State make copious extracts from the HERALD on mining matters in this part of the country. This is a sign of recognition, at least, of the vast mining interests that are being developed in the Southern counties. The notice of the discovery of a large iron mine by a citizen of Los Angeles, first published in the DAILY HERALD, has been copied far and wide, and has attracted great attention from iron and steel manufacturers. And well it may, for it is a vast addition to the property of our local manufacturers, as it will give them cheap iron and steel in abundance.

An assay of the ore from this mine, made at the State University, showed 80 per cent of iron, and 64.83 per cent of what is termed "metal iron." Another assay, which was made in San Francisco, showed 68 per cent of "metal iron." This remarkable deposit is only about twenty miles from the Southern Pacific Railroad at Colton, and is situated on the same railroad, thirty-five miles from the same railroad at Alpine Station, on the north, from which place it is an easy grade to this mountain of iron. By the eastern route the mine is about eighty miles from Los Angeles, and by the northern route about 117 miles. This discovery, with that of our heavy petroleum oil to be used in smelting the ore, ought to make of this city a great iron and steel manufacturing center, and we trust it will. Mr. P. F. Brown, the discoverer and proprietor of the mine, is determined to have it opened up in five years, and add to the wealth of this country. It is a vast power. Our contemporaries can always look in the HERALD for the latest mining intelligence of all kinds.

How Sewers are Made. An examination of the water that bubbles up in the cellar of the Larronde building, on the corner of Spring and First streets, reveals the fact that instead of being spring water, as was at first supposed, it is pestiferous sewer water of the vilest kind.

Now where does it come from? What sewer has leaked into it? Is it the Spring street sewer, or some other, from which it comes? The basement of this building has been abandoned because the water is now six inches deep in that place, and full of rotteness. Somebody is responsible for this irruption of vile water. Other parties who do not catch the thief, and who have cellars, are likely to be flooded in the same way. These leaks must be discovered and stopped. The loss of basement rent is a heavy item to the owner of the building; and in addition to that, one of the tenants in the upper story informed a reporter of the HERALD that he was made sick by the deadly vapor from this water, and had removed from the neighborhood.

With these facts before the people, it seems the proper thing for the Board of Health to look into the matter and abate the nuisance at once. There is no way in the matter. Every day a number of people are suffering with this dreadful pool of filth. Will the Board of Health visit the place and see that the nuisance is abated, by finding the leak and stopping it, or will they plunge the city into a lawsuit with damages for innocent taxpayers to pay? It seems a serious one, and must be met in a prompt, just and intelligent manner.

Fabulous Wealth.

A few months ago there was a wild statement of fabulous wealth to be found in gold nuggets and coarse gold on the shore of the Gulf of California. The expectations of the Argonauts who went from Southern California to that gold field have not been fulfilled. Now, coming on the top of this gorgeous gold field, a postman has engaged a discovery of pearls that has been made in the Gulf of California. One has been found that weighed seventy-five carats and has been sold for \$14,000. Another weighing forty-seven carats is held at \$5,000, and a third has been found weighing forty carats, for which \$3000 was offered. The discovery of pearls in the Gulf, and all prudent persons will remain at home instead of going off in a wild race to the Gulf at Guaymas, to connect with the Southern Pacific. It seems a good time to stay at home.

Car of the Eysanish.

Out of fifty thousand school children examined in Germany lately by an official commission, thirty thousand were found to be suffering from the eye disease, the proportion in some Universities being as high as eighty per cent. In the gymnasia at Heidelberg every pupil was more or less affected. The cause is said to be badly lighted rooms and the German system of penmanship. Although Germany is in the lead in educational facilities, the statistics for the United States show less than fifteen per cent. of the disease mentioned. California, and especially the southern part, is free from trouble with defective vision among scholars, the percentage being scarcely more than five per cent. The reason is probably the fact that our buildings, being to education are not ancient, but are built upon the most improved style, and with excellent optical properties. In this we excel.

Whale Fishing.

Mr. Peter Warner of this city had a lively experience at Willmore City last week, shooting whales at the mouth of the Slough. Mr. Warner saw three young whales a little distance out at sea, shot with a post and then went out to battle. At the first fire one of the whales was wounded, and dashed towards the boat, coming to the surface alongside the little craft, when Mr. W. shot the monster in the neck and killed him. The other two whales came to see their companion, and then moved on in apparent wonder, till Mr. Warner shot and killed the second one, when the third whale made a bee line for the open sea and disappeared in the distance. When the Wilmington fishermen charge of them and made several barrels of excellent oil from their blubber. These whales were of the bottle-head species, and about twelve feet in length.

COURT REPORTS.
