Constable Truman, of Wilmington, arrived in the city yesterday in charge of an insane man named Ralph Floyd, who was lodged in the County Jail to await examination before the Lunacy Commissioners.

A Chinaman named Bow Sing was brought to the County Jail yesterday by Constable Slanker, from Pomona, to serve a sentence of ninety days for keeping an opium "joint" at that place. The defendant was sentenced by Justice R. A. Hall on May 24th, but the case was appealed and argued before Judge Cheney on the 17th instant. Ah Sing, an opium "head," was also incarcerated for a like term for visiting Sing's place.

N. Kipp, the driver of an omnibus, was arrested yesterday afternoon for disturbing the peace at the Commercial street depot, and was taken to the station, where, on depositing \$20 for his appearance in court this afternoon, he was released. On the arrival of a train at the depot, a keen competition was raised among the hack-drivers for a "fare" in the shape of an invalid arrival, and Kipp abused the driver who secured the new comer's patronage in such language as to lead to his being arrested.

**Campbell's Close Call.**  
 The Campbell jury, which was out all night, came in yesterday at 10 o'clock and told the Court it was impossible to agree. The Judge thereupon discharged them. It is stated that they stood ten for murder in the second degree, one for manslaughter, and one for acquittal. The case will be tried again at an early day, and then there may not be a man on the jury who will vote all one way and refuse to tell why.

 Throat Diseases, Bronchitis, Asthma,  
**CONSUMPTION,**  
 Together with Diseases of the Eye, Ear and Heart, successfully treated by

**M. HILTON WILLIAMS,**  
 M. D., M. C. P. S. O.

With his new system of medicated inhalations combined with proper constitutional remedies for the liver, stomach, blood, etc. Probably no system of practice ever adopted has been so universally successful as that introduced by Dr. Williams for the cure of catarrh, throat disease, bronchitis, asthma and consumption.

**OFFICE:**  
 Hollenbeck Hotel, cor. Spring and Second Sts., Los Angeles, Cal.

**OZCENA.**  
 Ozcena is the professional or technical name given to an advanced form of catarrh, in which inflammation has extended through the membrane lining of the nose to the cartilage of the bone. Any case of catarrh may end in ozcena, but it most frequently occurs in those who are naturally scrofulous. The discharge takes place through the nostrils or through the throat, and is generally a yellowish or greenish-yellow color, frequently tinged with blood, and almost always attended with an offensive smell. In most cases the physician of Philadelphia, the disease is the most obdurate and disagreeable which the physician has to encounter. In bad cases the breath of the patient becomes so revolting as to isolate him from society, and render him an object of disgust even to himself.

In some cases pieces of bone become separated and slough off, leaving deep, unhealthy ulcers, which secrete a bloody matter, and are extremely difficult to heal. After ozcena has continued for some time the sense of smell becomes impaired and often lost. Deafness is one of the most common consequences, and results from its extension through the eustachian tube to the internal ear. Pains in the head and over the frontal sinuses, impairing memory, and even insanity frequently spring from its extension to the brain. The greatest danger, however, because the most common, is that it will extend downward and affect the lungs. In most cases of this kind disease catarrh is present to some degree, and in many cases it causes a large share of the patient's discomfort.

Besides these grave consequences, all of which are liable to spring from scrofulous catarrh or ozcena, there are others which, if less dangerous, are sufficiently unpleasant. It occasions great unhappiness to thousands of both sexes by isolating them and preventing their settlement in life. An offensive running at the nose, with foul breath, is about as great a calamity as can befall young people. Every disease of this kind can be cured by our new system of practice.

The following are the distinguishing features of our mode of treatment:  
 1. A single application gives immediate comfort and relief at once, and causes no distressing and painful symptoms.  
 2. The hardened secretions are softened and removed causing the greatest amount of relief to the sufferer.  
 3. The ulcerated surface is dried, every unpleasant smell is removed and the breath is restored to its natural purity and sweetness.  
 4. The poisonous action of the disease upon the throat is neutralized and arrested and threatened consumption averted and lost of all a complete and radical cure fully established.  
 5. The applications employed can be made at home with perfect success and without interference with diet or business.

In all cases of catarrh, where the system suffers from its extension to the lungs, or other vitiated condition of the blood, local treatment is invariably conjoined with constitutional remedies. Persons desiring treatment by this system of practice can use the remedies at home as well as at our office, and which will cause no inconvenience or hindrance to business whatever. I have seen so many of these cases cured that I do not consider any case hopeless, unless the disease has advanced to the chest and both lungs are seriously involved. The inhalations aid us in clearing the sinuses and in contracting and healing the cavities, which nothing else can do with the same success. The very best of references from those already cured.
