City Recorder Rossett Criticized—A Serious Accident. PASADENA, July 7.—The Star in tonight's issue attacks City Recorder Rossett for the manner in which the Martin case was conducted yesterday, alleging that "the whole proceedings seemed to have the appearance of a legal and judicial farce."

These comments would seem unjust to Recorder Rossett, and entirely uncalled for, under the circumstances. The Los Angeles attorney for the defense conducted himself so that no exceptions could be taken to his actions by the court, and as he was the regularly appointed attorney of the defendant, there was nothing to do but accept the change of plea from not guilty to guilty and set the fine, as time for sentence was waived.

RESOLUTIONS OF REGRET. The resolutions of regret have been passed by Pasadena Masonic order: Whereas, The members of Pasadena lodge, No. 272, F. and A. M., have been called upon to bid a last earthly farewell to their friend and brother, Charles E. Lanford, and to perform the final rites of Masonry over his mortal remains; be it by the said lodge:

Resolved, That by Bro. Langford's death we are reminded afresh of the value and helpful lessons that Masonic precepts, principles and traditions inculcate, and that the loss or membership sustains by his transference to the invisible lodge on high is tempered by the reflection that he left the heritage of an honored and respected name, which right of time will not tarnish, but which will forever remain a cherished memory to his family, his Masonic brethren and his many friends.

Resolved, That to the wife and other members of Bro. Langford's family we tender our warmest sympathy and the assurance that within our lodge-room the mourning emblems which beken his demise are not regarded as tokens to the fraternity.

Resolved, That these resolutions be spread upon the records of the lodge and a copy thereof sent to the family of our deceased brother.

A SERIOUS FALL. A serious accident occurred to a young carpenter by the name of John Hall, who was working on Dr. Tallcott's new home on Orange Grove avenue. While walking on the second floor he accidentally slipped and fell, striking astride of the joint below, inflicting serious internal injuries. Dr. Dalrymple is attending the injured man and every thing possible has been done to alleviate his suffering. The injury being of an internal nature it is difficult to tell just how serious it may prove, but his condition is considered serious.

SAN BERNARDINO. An Estrange: Husband Causes a Row. Local Brevities. SAN BERNARDINO, July 7.—An interesting case is being aired in the justice court at present. Peter Heydon, a painter by trade, returned from Los Angeles last night and discovered in a...

that he is sure Heydon discharged the firearm. The husband appeared in Justice Felter's court yesterday and swore out a warrant against Wrinkler charging him with assault with a deadly weapon. Wrinkler in trying to escape the wrath of the husband, ran into a flat car and injured himself so badly that he had to be removed to his home and a physician summoned. The warrant was issued and served, but the offender could not be removed from his bedroom. He gave bonds in the sum of \$500 for his appearance in court Monday.

This morning the affair took another turn. Heydon is rooming at the Eureka house, and last night when he went to his room he was surprised to find the following note:

The yield will be large.

(Tombstone Prospector, July 5.) Should the Santa Fe, Prescott and Phoenix people build a line as now in contemplation, from Poston's Butte to Globe in Arizona, it would open another important market for Galunol coal. This line of road would be about 60 miles long.

The Copper Queen at Bisbee has not closed down on account of the low price of copper; it merely shut down for a cleanup in a few days, and started up again this morning.

Prices of Stock During a Wall Street Panic. Some idea of the character of Friday morning's speculation may be gleaned from this incident. A well known broker had an order to sell 500 shares of General Electric. When the order was sent to him, the price had already fallen from 60 to 70. By the time he reached the trading post the stock had sold at 58, and he offered his stock at that price without eliciting any higher bid than 58. Unwilling to sell at such a sacrifice he determined to wait a little and turned to execute an order in another stock in an adjacent "crowd." Returning almost directly to the General Electric post, he heard somebody bidding "nine for a hundred." He disposed of his 500 shares at "nine" and was astonished to learn that he was selling them at 69 instead, as he supposed, at 59, and the stock kept on jumping until it crossed 80.—New York Herald.

The President's Summer Home. "Belvoir," the house in the suburbs of the national capital which President Cleveland has leased for his summer home, has an interesting history. General Winfield Scott selected the place as the site for the soldiers' home, but it was not secured, as no agreement could be arrived at with the owner. Baron Gerhardt, minister to our city, was born there.

RIVERSIDE.

The Prohibition Ordinance Passed—Local Notes. RIVERSIDE, July 7.—The board of supervisors met yesterday. The most important proposition up for a hearing was the prohibition ordinance, which was adopted as on a former occasion by a vote of four for to one against. Supervisor White voting nay. Every session of the body has been well attended until yesterday, when very few uninterested parties being present. Several no-license people were noticed in the room.

The prohibition ordinance, which was presented by the district attorney and a committee of the supervisors who had drawn it up, was read and passed section by section, until the six sections had been disposed of, after which it was taken up as a whole, passed and ordered published in one paper in each supervisory district. The vote on the adoption of the ordinance was as follows: Hayes—Hoover, McVicar, Stewart and Loveland. Nay—Chairman White.

The clause provides that the ordinance shall take effect and be found in force on and after the first day of August, 1893. There are only two saloons open at the present time in Riverside county. Bud Walker at Perris, and Anderson & Bean at Riverside. The latter gentlemen say that they have a contract with the city for one year from January 1, 1893, and that they have paid their tax or license in advance and have complied with all the city ordinances, and question the right of the county to step in and take the law in their hands.

Bills to the amount of \$957.75 in payment of salaries of horticultural commissioners and inspectors were allowed. Money to the amount of \$18,547.90 was found in the county treasury.

SANTA ANA.

The Matter of Electric Lighting—The Santa Ana, July 7.—The action taken by the city trustees at the meeting on Wednesday night was not much of a surprise, although many believe it is yet too soon to put more indebtedness on the city. The water works have proven a success, and are at the present time furnishing 300,000 gallons a day to our people; still it does not follow that the city owning its own electric light plant would prove profitable. This city is badly in need of a sewer system and many other things, and before any more debt is put upon it some urgent needs should be looked after.

A meeting of the library trustees was held last night, all the members being present. The annual report of the library trustees to the city council was prepared, and will show an encouraging state of affairs. More money is needed to properly keep up this institution.

NOTES. Santa Ana is very quiet these days, many of her people being at the seaside resorts.

MEMORIES OF 1871.

On the last week in May each year the French socialists are accustomed to celebrate the "bloody week," which witnessed the downfall of the Paris commune in 1871, the killing of 23,000 of the inhabitants and the exiling of 59,000 others. As early as 1880, under the leadership of Gambetta and the moderate Republicans, a general amnesty was voted, with only five or six exceptions, to the participants of the commune. It is significant also that many of the municipal regulations which the communists demanded were afterward granted by the chamber of deputies.

"Bloody week" began on Sunday, May 21, when the Versailles troops entered Paris by a breach in the fortification wall which the national guards had neglected to defend. They came in by the Bois de Boulogne, and terrible street fights continued daily until on the following Sunday, May 28, Marshal McMahon was in full possession of the city and declared the commune at an end.

On May 28 the Versailles troops captured the Central Market halls and threatened General Bergeret, who was stationed at the Tuileries. He was forced to retire, blowing up and burning the Tuileries as he left, but managed to save the Louvre, which some of his followers wished also to destroy. The fighting was mostly done by national guardsmen against heavy odds and resulted in fearful slaughter; hence the week has obtained its name.—New York Herald.

Where Pianos Are Taxed. Pianos are taxed in Elizabeth and some folk I know are very wrathful thereat. I think that by taxing pianos Elizabeth has placed itself in the very van of enlightenment with the big E, for mark, after all, it is not the instrument but the player thereof that must pay the tax. If the principle that warrants the tax is faulty in any particular, it is in the fact that the tax is not graded according to the skill or want of skill of the player.

Had I my way I would tax certain pianos in this city \$100 a year, and there are others that I would report to the board of health as nuisances that cried to heaven for abatement. If Paderowski would come to town with a piano or to play on an instrument already here, I would exempt it from taxation.

I bless without mental reservation that law giver whose wisdom devised the tax upon pianos. He should have a monument beside which the figure of Liberty in the bay would be but a pygmy. He has perhaps the maledictions of half the piano torturers in town, but "I honor him for the enemies he has made," for the pianists he has suppressed. I contend, however, that the tax should be assessed not according to the value of the instrument, but according to the skill of the player. The method I suggest would be most equitable, it seems to me, and would go far toward meeting all the expenses of the city government.—Elizabeth (N. J.) Herald.

Should the Santa Fe, Prescott and Phoenix people build a line as now in contemplation, from Poston's Butte to Globe in Arizona, it would open another important market for Galunol coal. This line of road would be about 60 miles long.
