RIVERSIDE.

Proceedings of the High School Board. Notes. RIVERSIDE, July 11.—The Riverside high school board, whose members also compose the board of trustees of Riverside school district, met yesterday afternoon upon the call of Superintendent Gregory, and organized by choosing Rev. Dr. Deere chairman and M. W. Holmes clerk. The name Riverside High School was selected as the title for the new school to be carried on in pursuance to the election held last Saturday. The board decided to lease the upper story of the high school building for its present use. They also voted that \$7000, the same sum as was formerly being voted as a special levy and does not involve any increase in taxation over former years. The faculty as selected is as follows: Eugene Fuller, principal and teacher of mathematics; Margaret Lampe, Latin and German; F. G. Van Blyck, English; Harriet A. Luddington, Immense.

THAT'S WHAT THEY ALL SAY.—It is customary in these latter days to express our satisfaction with a thing by saying "It's immense." It's so expressive that nothing can be added. Geo. L. Fink, Philadelphia, Pa., says: "My wife has been taking your New Cure for the heart, and says it's immense. She has not been troubled with pain or mothering spells since using it." Jno. L. Roberts, Washington, Pa., says he is 75 years old and has suffered from heart disease for over 40 years. He was treated without avail by prominent New York physicians, but was completely cured by Dr. Miles' New Heart Cure and was completely cured. Sold by C. E. Hanson, 177 N. Spring st., St. Louis, Mo.

No Electric Light Plant—The Supervisors. SANTA ANA, July 11.—The Blade this evening published interviews with a large number of the representative citizens of Santa Ana relative to voting in favor of bonding the city for the purpose of putting in an electric light plant and building a city hall, and the larger number of heavy tax-payers are against the city assuming any more debt.

The idea is an impracticable one, under the present condition of affairs, and there are many things more badly needed by Santa Ana than an electric light plant with which we are already supplied. Until Santa Ana's finances become in a better condition public improvements, requiring the city's assuming an indebtedness of \$20,000 or \$30,000, had better be dispensed with.

A PRETTY WEDDING. The little altar of the Catholic church of this city was a bower of flowers this morning when Frank M. The marriage ceremony was performed by the pastor, in the presence of a large number of relatives and friends of the high contracting parties, after which all repaired to the elegant home of the bride's parents where a wedding dinner was served. Many handsome presents were received. At 12 o'clock the young couple left for Moreno, San Bernardino county, where they will reside.

THE WORLD'S FAIR EXHIBIT. The board of supervisors' action in refusing to give further aid to Orange county's world's fair exhibit will not meet with the approval of the taxpayers of Orange county. A letter received from Manager Joplin, who is in charge, brings the tidings that the good thing being said of our display are really encouraging, and that gentleman predicts many good results from the display. It must be maintained, and our board of supervisors should use the county money in doing this. One and all are alike benefited in the prosperity of Orange county, and hence all should contribute by way of taxation to keep the exhibit at Chicago as long as the fair lasts, and in a creditable way, too.

SAN BERNARDINO.

The Killing of Pat O'Mera in Holcomb Valley—Breivites. SAN BERNARDINO, July 11.—Last night Deputy Sheriff J. B. Cook arrived in the city with W. B. McSweeney, who killed Pat O'Mera yesterday morning about 6 o'clock in the lower Holcomb valley. The trouble, it seems, originated over a mining claim. O'Mera had been working a claim owned by McSweeney on the above. The proprietor accused his partner of mismanaging the claim and not making proper accounting for the same. Sunday afternoon the two had some words over the affair, but the other miners in the neighborhood thought the trouble was settled. Next morning O'Mera walked down to a spring from which all were in the habit of procuring water. He had a pail in each hand, and had almost reached the spring when he saw McSweeney coming out of his tent. O'Mera at once commenced to abuse his former partner by cursing him. When McSweeney replied he dropped the buckets and attempted to draw a revolver, but was too slow. McSweeney fired a shot with a double-barreled shot gun, the charge of No. 4 shot entering the left temple, resulting in instantaneous death. Deputy Sheriff J. B. Cook, who appeared upon the scene placed McSweeney under arrest and hurried him to Victor where they boarded the train and came to this city, as O'Mera's friends were talking of lynching the prisoner. Two men named Bennett and Newman who witnessed the shooting informed the deputy sheriff that it was a case of justifiable homicide.

McSweeney is about 55 years of age and came to this section of the country in the sixties. He has the reputation of being a peaceful and law-abiding citizen and has never been known to harm anyone, and those who knew him say that he doubtless had cause to commit the deed. He was taken before Justice Knox this afternoon and his preliminary hearing set for Friday.

CATALINA.

Many Arrivals for the Summer—Yacht-Club Matters. ATALON, July 11.—People from all countries and climes have just begun to arrive at this unequalled resort. The chief engineer of the weather regulator appears to understand this, and opens his throttle valve and puts on his blower accordingly. Climate is therefore made to order, and when one desires to bask in Italian sunshine he may be accommodated on short notice.

Arrivals in ideal places. The arrivals at Avalon number about 25 each day. The big rush, however, will not commence before the 1st of August.

The last new yacht Jessie of San Francisco is here. Her owner, Captain McDonald, is on a pleasure trip, and selected Avalon as one of his stopping places. He was formerly owner of the famous yacht Aggie, the well known racing yacht seen so often on the San Francisco bay.

The boys' brigade will break camp with his parents, Rev. and Mrs. C. F. Loop, on Carey avenue.

Thursday. There are about 12 companies camped here, most of them coming from Los Angeles, Santa Barbara, Ventura and Alhambra.

Fishing is excellent. Yellowtail and rock bass form the major part of the big catches.

Excursion parties are numerous. The yacht San Diego carried a party of 16 around the island yesterday, while she took the Boys' Brigade band over the same route today. The sail occupies about 10 hours.

Judge Richardson, a prominent man of Sedalia, Mo., registered at the Metro-pole yesterday.

Yesterday forenoon, at about 10 o'clock, Mr. V. Miasich of Redlands was attempting to climb Sugar Loaf rock and got up some 15 feet, when a rock gave way and fell into the water. His ankle was badly sprained, one of his hands smashed and his side bruised. The water happened to be shallow where he fell, but he was unable to move from the spot. However, help soon arrived and he was taken to McDonald's drug store. After his wounds had been bandaged he was carried to the Avalon home and this morning is feeling quite comfortable.

The San Diego made a trip around the island yesterday, leaving at 8 o'clock in the morning and returning at 2 o'clock.

Among the prominent passengers who arrived last evening were Mr. F. Spencer and daughter of San Jose.

At 11 o'clock last Sunday services were held in the pavilion, with a large audience present, a good part of which was composed of the cadets. The services were conducted by Rev. H. A. Brown, who delivered an eloquent sermon on a subject aptly chosen for the occasion. His text was The Christian Warfare. He told how in the physical world as well as in the spiritual there is a warfare. Each one of us has a fight with some appetite or passion which must be conquered or we fall. He told the boys if they were to be prepared for the positions waiting them they must have the courage to say no; they must learn to obey their God and the right if they would conquer.

The San Diego left this morning for the isthmus with the Cadet band and several passengers on board.

Among the yachts that are now in the harbor is the Jessie from San Francisco. The boat is well equipped and is receiving a good deal of attention. It is considered one of the finest yachts afloat and is the property of Commodore McDonough.

The town as yet has not been carried away by the Sunday-school cadet boys, and in the relief of the town there is no danger, as the youngsters are under good discipline and are very well behaved.

A tramp party is being organized this morning with the intention of going to Black Jack mountain, some six miles distant.

An interesting episode for the little folks occurred at about the time of their arrival at the beach, being the appearance of a large sea lion, which came into port about the same time as the Santa Rosa, and having reconnoitered the situation finally perished himself on the big float directly opposite the bath house. Photographer H. J. H. was the first to see the animal, immediately seized the opportunity and took a shot at the animated scene of the steamship Santa Rosa, the big five masted Governor Ames, the sea lion and the multitude of bathers, all formed a panorama not to be overlooked, and he will soon produce a view worth viewing.

Both parties had strong backing, and both sides were confident their party would win. Cox succeeded in throwing Kinley three times, but did not get both shoulders on the ground, which were the conditions of the match. Both parties tried hard, and while it lasted was very exciting. Intellectual Progress in Boston.

It is not unaffectionately pleasant to the average Bostonian of mature years to sit and listen to Professor Drummond's talk about evolution. Those of scientific and highly differentiated intellects don't mind, neither do the young who have been brought up in the nurture and admonition of modern thought. But unscientific men and women, whose hair is lightly streaked with more or less silver, are a little nervous while awaiting the evenings yet to come when Professor Drummond will undoubtedly make the final logical dash from the ape that yearningly and with irresistible instinct apes mankind to man, who still occasionally apes the ape.

It will be easy for members of a community nurtured on Browning to follow the lecturer then, and people who have feasted more on the delicate fruits than the hardy roots of life in their intellectual and spiritual growth will take very kindly to the later lectures. The material is always a vexation to those determined to dissociate the natural and the spiritual, and for those it is not agreeable to be taken back into the physical memories of the faroff beginnings of the race, or to make those agile mental jumps which fling a man forward in the upward scale of existence. —Boston Transcript.

Imprisoned Miners Swam Out.

Fifty-eight miners dripping wet and much the worse for a very singular and remarkable experience underground, crawled from the mouth of the old slope
