

THOSE AUSTRALIAN INSECTS.

The Citrus Belt Row They Have Stirred Up.

Riley and His Ready Letter-Writer Get in Their Work.

Elong Antagonizes Riley—State Horticulturists Arrayed Against Federal Entomologist—Hot Blood Displayed.

The following article appears in the San Francisco Examiner of Tuesday. It must be taken cum grano, as the statements made in the petitions purporting to come "from Southern California fruit growers," and Mr. John Scott's statement that "the people" have lost faith in the state board of health, remind one forcibly of the three tailors of Tooley street and their manifesto beginning "we, the people."

As far as the evidence given to the public goes, Mr. Scott, Professor Riley, Mr. Coquillett and Mr. Heintz appear to have bitten off more than their leucocyanous mouths can chew. Mr. Heintz to a HERALD reporter recently stated that he was not in the fight, and it is to be hoped that the others will follow his example.

SACRAMENTO, Nov. 20.—The state board of horticulture and the fruit growers of Southern California are at war. The trouble, which has grown to be a serious matter to the interests of all about a lot of bugs. Governor Markham has been endeavoring to pour oil on the troubled waters, and with what success will develop at the meeting of the fruit growers' state convention, which will convene at Los Angeles tomorrow, the 21st inst., continuing for a very hot time, between the two factions is promised, and if there is not a row it will be surprising. The United States department of agriculture has been dragged into the trouble to the injury of the state, since Secretary of Agriculture Morton has withdrawn the two entomologists who have been stationed in California, Prof. D. W. Coquillett at Los Angeles and Prof. Koebel at Alameda.

WAR ON THE SCALE.

In some of the orange-producing sections in the southern part of the state a great many of the trees are afflicted with the black and red scales, which pests, in time, injure the orange orchards, entailing great loss. When the white scale had hold of the orange orchards a few years ago the legislature appropriated \$10,000 to meet the expenses of an expert to go to Australia to find a parasite which would reduce the pest. The department of agriculture in Washington was applied to for an expert, and the services of Albert Koebel were secured. He was successful in his mission to Australia. The parasites he sent to California soon rid the trees of the white scale. The red and black scales, as injurious as the white scale, were still to be dealt with, and the subsequent legislature appropriated \$5000 for parasites fit the pests. Mr. Koebel went to Australia again with the consent of the department of agriculture. The parasites obtained by him have caused all the trouble.

SPRAYING SUSPENDED.

On the receipt of the Australian importations it is said that Edward Cooper, president of the state board of horticulture, and Mr. Koebel urged the abandonment of all spraying and fumigating for the protection of trees, so that the imported ladybirds might multiply. The fruit growers, it appears, were opposed to this advice, and the suggestions of the state board were not respected. In September of last year, John Scott, horticultural commissioner, residing in Los Angeles, wired Entomologist Riley as follows:

Consignments of parasites from Australia sent by Mr. Koebel not satisfactory in breeding or feeding on red and black scales. Many growers, also horticultural commissioners of six southern states, have doubts of their efficacy. State board say they will breed in sufficient numbers in four or five years. In the mean time you advise suspension of spraying and fumigating? Have you information of reliable character other than Koebel's that new ladybirds will prove as effective on red and black scale as vedalia on white?

To this Prof. Riley sent the subjoined reply:

By no means suspend spraying and fumigating. Kelong's views and utterances are unscientific and sensational. Koebel's judgment not to be implicitly depended on. To answer your telegram specifically, I have no idea, and never had, that anything from Australia will prove as effective on red and black scale as vedalia on white, because it is not proved that red scale is indigenous in Australia, while black scale is known not to be.

RESULTS IN A CONTROVERSY.

Subsequently an article appeared holding the state board of horticulture up to ridicule. Professor Riley was accused of writing or instigating the objectionable article.

These implications angered Cooper and Kelong. The controversy with the department of agriculture ensued. The merits and demerits of the parasites were discussed, the entire press of Southern California taking part. The members of the board of horticulture were severely criticized by the southern press.

The conduct of the state board of horticulture so annoyed a large number of the fruit growers that a petition making charges against the board was sent to the governor about six weeks ago. The petition expresses an opinion that the members of the state board of horticulture do not know their business and are not entitled to credit for any success that has ensued in fighting the orange pests.

INVIDIOUS REMARKS.

One paragraph is as follows: The state board of horticulture pursues devious methods in the preparation of its literature by "cribbing" and plagiarizing and publishing unreliable statistics regarding the fruit industry. By antagonizing the agents of the national department of agriculture mentioned here in invidious remarks in his published reports it has not only lost the sympathy and co-operation of similar bodies, but has caused California horticulture in its entirety to appear in a bad light before the public and kindred organizations and individuals engaged in similar lines of scientific agricultural and horticultural research.

The petitions declare that the orange-growers of the southern part of the state have been boycotted and demand an investigation.

The governor summoned the mem-

bers of the board before him to answer the charges and complaints. They assured the governor that the trouble would be satisfactorily settled at the state fruit growers' convention in Los Angeles.

After they left the governor the board adopted the following resolution:

Whereas, Numerous petitions and complaints containing charges against the action of the state board of horticulture, presented to the Hon. H. H. Markham, governor, by certain fruit-growers and others; and Whereas, The members of the state board were invited by his excellency to meet in Sacramento in his office to hear said charges and complaints; be it

Resolved, That after a careful review of said papers, the charges not being substantiated by any proof, and our defense accompanied by facts disproving the same, we deem it unnecessary after the expiration of the term of office to further defend. We acknowledge the wisdom in the advice given by his excellency, and with the hope that harmony may be established amongst the fruit-growers throughout the state, we will let the whole matter concerning this unpleasant controversy rest.

EDWARD COOPER, SOL RYUNSON, I. N. MOSELER, F. C. MILLER.

THE FRUIT GROWERS' IRE.

That the fruit growers do not propose to let the matter rest to the satisfaction of the state board the following letter will show:

LOS ANGELES, November 6, 1893.

DEAR SIR: Your letter of October 31st, in reference to the state board of horticulture, has been received. First, let me assure you that in expressing my thanks for your prompt interest I feel I but re-echo the feelings of your constituents.

The whole matter concerning this unpleasant controversy rest. The fruit growers do not propose to let the matter rest to the satisfaction of the state board the following letter will show:

There is one faction in connection with the wish for "harmony" that the state board seems to desire so anxiously, and that is: At the state convention, held in San Jose in November, 1892, the fruit growers of the state, and the horticulturists present at that meeting, and the state board of horticulture in executive session promised that no further cause for friction or irritation between it and the people of the state it is assumed to serve should exist.

How well the department of agriculture, you yourself know by the facts and doings of the board that have happened since that time. Not only has Southern California been "boycotted" to authorities at Washington, libeled and the fruit growers of this section charged with the importation of pestiferous insects, but the board, and particularly its secretary and president, have been instrumental in losing to the great industry of horticulture, valuable aid from Washington, and presumed to seek the discharge of people in the name of the state. Under the circumstances you can readily see why the promises of "harmony" that the commissioners seem to want so badly are taken with the usual grain of allowance.

How are they to make reparation for the mischief already done? The prompt dismissal of Mr. Kelong as secretary of the board would do much to restore public confidence. You will recollect that particular stress was laid upon this fact by the committee waiting upon you in this connection.

It is not disposed to be arbitrary in this matter, but in the light of all the evidence you must pardon the strong feeling existing for a change of administration. The delicacy of your position in the present state of affairs is self-evident. In September of last year, John Scott, horticultural commissioner, residing in Los Angeles, wired Entomologist Riley as follows:

Consignments of parasites from Australia sent by Mr. Koebel not satisfactory in breeding or feeding on red and black scales. Many growers, also horticultural commissioners of six southern states, have doubts of their efficacy. State board say they will breed in sufficient numbers in four or five years. ELONG SQUARES HIMSELF.

to the combined judgment of all interests, to direct its movements to the general good.

We especially urge the importance of a large attendance from all parts of the state at the meeting called by the state horticultural society for the 29th of December next for the purpose of settling and endorsing the plans for the exchange, awakening enthusiasm in its support and selecting them to carrying it on for the first year.

(Signed)—L. H. Thomas, chairman, Tulare county; T. H. B. Chamblin, Riverside county; D. T. Fowler, Fresno county; Edward Berwick, Monterey county; N. W. Blanchard, Ventura county; R. O. Keila, Kern county; A. Brainerd, Santa Clara county; Edward F. Adams, Santa Cruz county—Committee.

Mr. Berwick then read some statistics concerning governmental ownership of railroads. These figures, he said, supplementary to an article upon the nationalization of railroads read on Tuesday.

After he had concluded, a short discussion was held and it was suggested that some resolutions be taken by the convention in regard to the nationalization of railroads.

Mr. Berwick said that while he was not quite prepared, still he had a roughly written resolution which he would present. He then presented two resolutions, one favoring the governmental ownership and control of railroads, and the other favoring the government constructing the Nicaragua canal.

The resolutions were given to the secretary to read, but Mr. Kelong was not quite onto the Monterey gentleman's improved system of shorthand, and Mr. Berwick in despair finally offered to rewrite them. However they were finally read, and after a short discussion were temporarily disposed of by being referred to the committee on resolutions, with instructions to report at tonight's session.

Mr. Rowley, arising to a question of privilege, referred to the recent death of William T. Coleman, and suggested that suitable resolutions be passed, and it was so ordered.

Mr. Adams called attention to the fact that in adopting the report of the transportation committee the various members were supposed to work for the various points suggested.

Mr. R. C. Kells next delivered a brief address upon co-operation among the growers for the purpose of placing their fruit on the market.

A general discussion followed, and the meeting finally adjourned until 9:30 this morning.

A JOINT INDICTMENT.

HENRY G. AND HENRY J. STANLEY ARRESTED YESTERDAY.

They Are Charged With Opening a Letter Belonging to A. S. Tentschel—The Story.

Among the recent indictments returned by the federal grand jury was one jointly against Henry G. and Henry J. Stanley, the Broadway real estate dealers.

They were arrested yesterday upon a warrant issued by the United States district court charging them with printing into the business and secrets of A. S. Tentschel by opening a letter addressed to him.

The alleged crime was committed on the 22d of last August. There had been some negotiation between the parties concerning the purchase of a grocery store, and Tentschel had authorized the Stanleys to do certain business for him in that connection.

Tentschel said he did not have the cash to pay for the store, and would notify his banker. It was understood between them, it is claimed, that the money expected would be sent to Stanley's office and in his care. It is further claimed that Stanley had Tentschel's permission to open the letter, which he did in his presence. They went to the bank together and secured the money. Some time after the deal had been consummated, it is said that Tentschel claimed the business was not as good as the Stanleys had represented it to be. He went to them and wanted \$50, which the real estate dealers refused to give him. He then wrote a letter to them, and have the Stanleys arrested for breaking open his letters.

Accordingly Henry G. Stanley was arrested and taken before Commissioner Van Dyke, and he was held to await the action of the grand jury.

The Stanleys were placed under \$1000 bonds each, yesterday, to appear for examination.

A Dance Without a Smile.

They have a singular kind of dance conducted on the greens of country villages in Russia. The dancers stand apart, a knot of young men, here, a knot of maidens there, each sex by itself, and silent as a crowd of mutes. A piper breaks into a tune, a youth pulls off his cap and challenges his girl with a wave and a bow. If the girl is willing, she waves her handkerchief in token of assent. The youth advances, takes a corner of the handkerchief in his hand and leads his lassie round and round.

No word is spoken, and no laugh is heard. Stiff with cords and rich with braids the girl moves heavily by herself, going round and round, and never allowing her partner to touch her hand. The pipe goes droning on for hours in the same sad key and measure, and the prize of merit in this "circling," as the dance is called, is given by spectators to the lassie who in all that summer revelry has never spoken and never smiled.—New York Ledger.

The Railing Passion. Mr. Theophilus—Speaking of the mysteries, I knew an adept who predicted that he would be taken sick on a certain day, at a certain hour, and would die exactly 2 hours and 10 minutes later. Everything occurred just as he foretold. What do you think of that?

Mr. Hardhead—He must have been in New York when he had lived in Jersey and had become accustomed to doing everything on schedule time.—New York Weekly.

Buckley's Arctic Salve. The best salve in the world for cuts, bruises, sore throats, sore mouths, corns and all skin eruptions, and positively cures piles or any required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by C. F. Heitzman, 222 N. Main street.

FINANCE AND TRADE.

Stock Exchange Review.

New York, Nov. 22.—The stock market was not as steady today as yesterday. The general market at opening was strong, but reaction soon quickly changed the tone and caused a slight reaction. By noon the market recovered itself and under steady buying the list made an advance of 1/8 percent. During the last hour the market was heavy and final dealings were at a reaction of 1/32 percent.

Government bonds closed steady. MONEY QUOTATIONS. New York, Nov. 22.—Money on call was 3 1/2 percent; time, 4 percent; 60-day bill, 4 1/2 percent; 90-day bill, 4 3/4 percent; 120-day bill, 4 1/2 percent.

San Francisco, Nov. 22.—Sight drafts, 3 1/2 percent; telegraphic transfer, 4 percent. STOCKS AND BONDS. New York, Nov. 22.—Closing quotations were as follows:

WINE AND LIQUORS.

BAIRNHEADS! What is the condition of your hair? Is your hair dry, harsh, brittle? Does it split at the ends? Has it a lifeless appearance? Does it fall out when combed or brushed? Is it full of dandruff? Does your scalp itch? If dry or in a heated condition? If these are some of your symptoms be warned in time or you will become bald. Skookum Root Hair Grower. Is what you need. Its production is not an accident, but the result of scientific research. Knowledge of the disease of the hair and scalp led to the discovery of Skookum Root Hair Grower. It is not a drug, but a delicately cooling and refreshing tonic. By stimulating the follicles it stops falling hair, cures dandruff and grows hair on bald heads. Keep the scalp clean, healthy, and free from irritating eruptions, by the use of Skookum Root Hair Grower. It destroys parasitic insects, which feed on and destroy the hair. If your dandruff cannot supply you send direct to us, and we will forward you a sample of our Skookum Root Hair Grower, free of charge. Trade mark. THE SKOOKUM ROOT HAIR GROWER CO. 57 South Fifth Avenue, New York, N. Y.
