Rooms \$2 a week and up. U. S. hotel, Dr. Reese, 119 1/2 S. Spring.

Busby Held for Murder

The preliminary examination of William J. Busby, the colored man who poisoned two of the employees on the Southern California railway by putting strychnine in a bottle of wine which he intended for another railroad band, was concluded in Justice Morrison's court yesterday morning. No additional evidence was presented, the only transaction being a motion by the defendant's attorney to admit him to bail. This was denied by the court and Busby was held to answer to the charge of murder in the first degree.

Spoke Too Soon

A humorous incident occurred in the police court yesterday morning which resulted first in humiliating an over-anxious attorney and afterward in rejoicing him. The case was being heard by a jury and before a verdict had been rendered the defendant's counsel asked for a stay of execution. The motion was ruled out of order, as no verdict had yet been given. The jury then announced their verdict, unanimously acquitting the defendant.

The Modern Beauty

Thrives on good food and sunshine, with plenty of exercise in the open air. Her form glows with health and her face blooms with its beauty. If her system needs the cleansing action of a laxative remedy, she uses the gentle and pleasant liquid Laxative, Syrup of Figs.

IS AGAIN ON HER WALK

The Woman in Black Haunts South Hill Street

And it is Said That She Carries a Keen-Edged Dagger for the Benefit of Molesting Persons

The lady in black whose phoshy and mysterious visitations in the south end have given rise to so much speculation and comment is again on deck, and there is every indication of her continuing to make the nights terrible to the superstitious who are forced to pass her haunts. Some time ago an account was given exclusively in The Herald of her midnight exploits, and since that time until the present she has been giving the people a short rest.

Last evening several pedestrians who passed down Hill street, between Eleventh and Twelfth streets, at about 11 o'clock were startled by seeing a tall, slender, black form slowly pacing up and down the east side of the street. All along the side of the street there is a high board fence of a grayish white hue, and as the figure passed along it the shadow revealed the fact that it was a woman.

"The woman in black" is known to the residents, and on one occasion a minister residing on Hill street approached the mysterious visitor, and was severely reprimanded for his pains. This pedestrian knew, and one of them, A. Newman, residing on South Olive street, determined to solve the mystery.

Accordingly, he crossed the street and approached the woman. "Anything I can do for you?" he asked gruffly. "My own business," was the reply snapped at him, and there was a savage expression on her face that caused the investigator to beat a hasty retreat.

The woman passed rapidly down Hill street to Tenth, and there, it is said, got into a buggy tied in front of a house and drove away. Newman is unable to give any definite description of the woman, but says she is young and pretty. He also claims to have seen a glittering object in her hand that looked like a dagger. Under these circumstances he concluded not to investigate further.

The apparition is undoubtedly one of the "M" and "H" kind, and it would seem to have an object, and that no light one, in waiting on that particular portion of the city.

The apparition is undoubtedly one of the "M" and "H" kind, and it would seem to have an object, and that no light one, in waiting on that particular portion of the city.

DE LAGUNA'S FRANCHISE

The Board of Public Works Recommends Its Advertisement

Various Other Recommendations Made Yesterday by the Board for Action on Monday

The board of public works yesterday agreed to recommend to the council the draft of the ordinance for a franchise for the telephone system in which Herman de Laguna is the ruling spirit, be adopted, and that the city clerk be instructed to advertise the franchise for sale, as is provided by law. Other recommendations yesterday made by the board are as follows:

In the matter of the petition from Mrs. S. E. McLean et al., asking to have the obstructions removed from Magdalena street, between Railroad street and San Fernando street, recommend that the city engineer be directed to give the lines of the street to the street superintendent, that he may be able to remove any obstructions that may exist.

In the matter of the petition from J. A. Reid et al., asking to have Maple avenue, between Washington and Twenty-seventh streets, graded and gravelled, according to specifications No. 5 and sidewalk with cement sidewalk four feet wide, under the bond provisions of the Vrooman act, recommend that a city engineer make the necessary estimate of cost, and if the same exceeds the sum of \$1 per front foot, present the necessary ordinance of intention.

In the matter of the petition from Thomas J. Heil et al., asking permission to grade, gravel and construct a street curb on Maple avenue, between Twenty-seventh street and the crossing of the Southern Pacific railroad, recommend that the same be removed from the present necessary ordinance, the property owners having presented the necessary contract.

In the matter of the petition from S. W. Hiller et al., complaining of the existence of the oil refinery at the corner of Second street and Broadway avenue and asking that the same be removed from that neighborhood, recommend the same be referred to the board of health and that they take such measures as they can to abate the nuisance complained of.

In the matter of the petition from Mary E. Stilson, asking to have a five-foot cement sidewalk constructed on the north side of Bellevue avenue from Kensington road to Figueroa street; also on the west side of Figueroa street from Bellevue avenue to Temple street, recommend that the city engineer be directed to present the necessary ordinance of intention.

In the matter of the petition from the Sunset Telephone company, submitting plans for the extension of underground conduit system on Broadway between First and Second streets, recommend that the same be approved.

Recommend that the city engineer be instructed to present map showing the property lines in the rear of the lots between Fourth and Broadway, and also showing what portion of property in this block has private alley at the present time.

In the matter of the petition from Central Woman's Christian Temperance union, asking that watering troughs be established and maintained at suitable points, recommend that the city engineer be directed to designate where such watering troughs should be located.

In the matter of the petition from J. Goldsworthy et al., protesting against the construction of sidewalk on Sixth street, recommend the same be referred to the city engineer to report the frontage between Main street and Glays avenue.

In the matter of proposals for repairing the pavement on Upper Main street, recommend that the same be referred to the city engineer instructed to present specifications for repairing this street with porphyry.

In the matter of the petition from E. S. Chase et al., asking that Matthews street from the south line of Brooklyn avenue to the north line of Michigan avenue be graded, gravelled, guttered and curbed with redwood curb on both sides of said street under specifications No. 5, the same to be done under the bond provisions of the Vrooman act, recommend that the city engineer make the necessary estimate of cost, and if the same exceeds the amount required by law, present the necessary ordinance of intention.

Recommend that the proceedings for the improvement of First street between Boyle avenue and Fourth street be abandoned and the city engineer be instructed to present the necessary ordinance to change the grade of First street from the west line of Anderson street to the east line of the official bed of the Los Angeles river when the property owners present a petition signed by a majority of the frontage affected thereby.

A FORTUNATE ESCAPE

Death from a Falling Tree Narrowly Avoided

John Englebret narrowly escaped losing his life yesterday morning at 11 o'clock, while he was seated on the curb stone on Aliso street, below Alameda. Mr. Englebret and his friend, M. Dietsch, were seated in the shade of a large pepper tree when the latter lashed the tree with redwood curb on both sides of said street under specifications No. 5, the same to be done under the bond provisions of the Vrooman act, recommend that the city engineer make the necessary estimate of cost, and if the same exceeds the amount required by law, present the necessary ordinance of intention.

Recommend that the proceedings for the improvement of First street between Boyle avenue and Fourth street be abandoned and the city engineer be instructed to present the necessary ordinance to change the grade of First street from the west line of Anderson street to the east line of the official bed of the Los Angeles river when the property owners present a petition signed by a majority of the frontage affected thereby.

Recommend that the proceedings for the improvement of First street between Boyle avenue and Fourth street be abandoned and the city engineer be instructed to present the necessary ordinance to change the grade of First street from the west line of Anderson street to the east line of the official bed of the Los Angeles river when the property owners present a petition signed by a majority of the frontage affected thereby.

THE SUBURBAN COMPANY

Opposition to the Vernon Irrigation Company

A Proposition to Use the Zanja System Which Is Not Unlike Another Offer

The Suburban Water company is the name of a corporation which has been organized as an opposition to the Vernon Irrigation company. The latter corporation recently made a proposition to lease from the city the waters of the zanja system in the southwest territory. The new company is composed of the land owners affected by the proposed change, and the new company has now made a proposition to the city engineer similar to the Vernon Irrigation company's proposition, word for word. The zanja committee, to whom the matter was referred by the council, has indicated its position on the consideration of the whole matter.

Chairman George Pessell of the committee is now preparing a report to the council upon the matter, and he will recommend that neither the Vernon Irrigation company nor the Suburban Water company's proposition be accepted by the city. Should the south eastern district be annexed the residents of Vernon will then be able to secure the waters of the river at \$2.50 a head, instead of \$5, the price which they are now compelled to pay. This latter solution of the troublesome question will be generally acceptable to the people affected.

FOUND DEAD IN BED

Coroner's Jury Decided That Death Resulted From Alcoholism

The coroner held an inquest yesterday afternoon over William Kennedy, who was found dead in his bed in a lodging house at 325 East Third street early yesterday morning. The principal witness examined was Jack Kennedy, in whose room the dead man was found. Kennedy testified that he and his friend were drinking a good deal during the night, and at a late hour they retired to his lodgings, both sleeping in the same bed. At 5 in the morning he awoke and found that his companion was dead.

From what could be learned of the deceased he had been a heavy drinker. He had been troubled on previous occasions with alcoholism and this overindulgence at this time was undoubtedly the cause of his death.

The coroner's jury brought in a verdict of death by heart failure, superinduced by alcoholism.

TOM GARVEY'S PRANKS

He Left the City Owing Several Bills

Thomas Garvey, the freeman ordered dismissed last Wednesday, is missing from the city, the last heard of him being at Kansas City. Drink was Garvey's ruin. He had been a member of the department for over five years. His wife sent him money to return to Los Angeles several days ago, but so far he has not returned. He is supposed to be in the city and is also alleged to have several times threatened his August salary warrant. There was a rumor in circulation yesterday that he had been seen on his way to this city to face his creditors.

ARE YOU A BICYCLIST?

If So; Are You Certain It Agrees With You?

WHAT PHYSICIANS SAY

Some Good Advice to All Riders of the Wheel Who May Be in Danger Without Knowing It

"Next to my friends I love my bicycle!" she was an enthusiastic young woman who uttered these words and she evidently meant them. There is so much exhilaration and pleasure in riding a bicycle that it is no wonder it is so popular.

But like every good thing, it has its drawbacks. People who have ridden a bicycle any length of time are almost always troubled at times with pain in the back. It is a fact which admits of no dispute that the vibration of the wheel causes in nearly every case, more or less nervous, shattered strength and untimely death are sure to follow.

Any man, woman or child can ride a bicycle without any danger from these troubles if the kidneys and urinary organs are only kept regulated. But, of course, there is the great difficulty. Every physician knows that it is difficult to regulate these delicate organs, and all physicians admit that there is absolutely but one cure for these troubles; that remedy is Warner's Safe Cure. This great discovery is acknowledged to be the only cure for these difficulties, because it stimulates gently the kidneys and all adjacent organs and causes them to continue in perfect health. There need be no fear of backache, peculiar pains, depressed feelings or any of the thousand things which indicate kidney difficulty, where this great Safe Cure is used continuously and in time. So that bicycle riders need not fear, but can ride to their hearts' content, providing only they are careful, providing only they watch for the approach of the first symptoms of kidney difficulty, and providing only they check them in time.
